Approximately 40 LF of pipe is installed into the Pend Oreille River. The piping will run underneath the existing dock. A 1.5 HP Gould pump will be encased in a 6-inch PVC submersible pump cradle. The pump cradle will have intake screens that tee off of the pump cradle to allow water to flow into the piping through the pump and up to the 1.25" pipeline to the distribution box. The distribution box will be located near an existing residential structure. The pump and screen have been sized for 25 gpm.
