5. Description of diverting works:

2 horizontal wells approximately 15ft apart. There is a hillside which my father and I drilled two 70ft long pieces of galvanized pipe to create the wells, and then put pvc pipe to distribute the water out of the hillside. This home is part of the system that is fed by two 300 gallon holding tanks and one 1000 gallon holding tank. To the best of our knowledge we would describe this system as wells because we drilled 70ft into the hillside to capture water. The spring pops up further down the hillside, and we are not capturing that for our drinking water.
