**Re: Measuring Devices: Water Right 61-2249 and 61-7398.**

In response to your letters dated February 14, 2024, regarding the installation of a flow meter on the point of diversion for 61-2249 and the installation of a flow meter for one of the points of diversion described under 61-7398; groundwater will not be withdrawn from either point of diversion identified during 2024. Should Simplot decide to resume diverting groundwater from either well in 2025 a flow meter compliant with IDWR's standards will be installed prior to diversion.

Unfortunately, I do not have an address for Ed Van Etten, Watermaster for Water District 161. For his use in remaining current on the status of Simplot's withdrawals from these wells, please forward a copy of this letter to Mr. Van Etten.

Sincerely,

Vic Conrad

Land, Water & Asset Recovery

c: Ed Van Etten WD 161 Watermaster.
