5. Description of diverting works:

Originally there was a spring box with a 2" diameter pipe approx. 3 ft. long going to a stock trough. When the land was put into a CRP in 1985, the pipe was lengthened and the tank moved to supply water outside of the CRP to the cattle. In 2018 we renovated the spring to improve flow and fix damage caused by the cattle. We installed a new trough around this time too.

Priority Date Explanation:

The statutory claim has 1964 listed, but mentions that Jess Orchard had developed the spring prior to Charles Jenkinson acquiring the property. On further investigation we determined that the property was homesteaded on by James V Hanson. We believe that the spring was being used and developed by Hanson for stock water and has been in continual use since then.

There is also a well that supplies water to the cattle in the same pasture.

13. Basis of Claim: Statutory Claim
