G. NARRATIVE/REMARKS/COMMENTS

This permit qualifies for an in-office examination because it is for irrigation of less than 5 acres. Field exam was conducted on December 8, 2023, by Justin Shearer. Ownership of the permit is in the name of Ted and Robin Tenbrink. Current Lemhi County Taxlot data represents the Tenbrink's own the land appurtenant to the place of use (POU) and documents in the backfile show evidence of authorization to divert water from a point of diversion (POD) located on Forest Service land and subsequently across Forest Service lands in an approved ditch. Proof of Beneficial Use was submitted on August 31, 2023.

Proof of Beneficial Use indicates that water is diverted out of Sheep Creek into a ditch that conveys the water to the permit holder's property where it is then pumped into a sprinkler system. Permit authorized 3.9 acres of irrigation. Aerial imagery available to the department indicates that said 3.9 acres of irrigation is developed(see attached Irrigation Map). As a result, I am recommending 0.08 cfs and 3.9 acres of irrigation to be licensed. I am not recommending a volume because it is not required for irrigation using natural stream flow from a stream or spring.

All conditions of approval have been met. Condition 01H is being updated to condition R02 as per department licensing standards. Condition 939 requiring the permit holder to obtain Forest Service authorization necessary to access the POD should be considered the condition to have been met, this condition is not carried over to licensing and is therefore being removed. Condition 004 will remain on the license since POD ownership will continue to be an issue of consideration into the future. All other conditions will remain on the license.

Have conditions of permit approval been met? _X_ Yes ____ No
