STATEMENT OF COMPLETION
FOR SUBMITTING PROOF OF BENEFICIAL USE

FOR OFFICE USE ONLY
Amt. of Fee \$ 50.00
Receipt No. C117302
Received By ICM
Date Received 11.6.23

The Idaho Department of Water Resources (Department) considers this form a statement that the permit holder(s) applied water to beneficial use and completed development of a water right to the extent described below. **This form must be accompanied by an examination fee, when necessary, or by a completed Beneficial Use Field Report prepared by a certified water right examiner (CWRE).** Please refer to the instructions and fee schedule for this form. If ownership of the permit has changed, complete a Notice of Change in Water Right Ownership form. If you wish to relinquish your permit because you have not established the authorized water use and are not applying for an extension, please notify the Department in writing.

- Permit No. 98-07930 Name of Permit Holder(s) Delton and Tracie Isaac
Telephone No. 208-267-3008 Email dtisaac123@hotmail.com
Mailing Address 427 Baldy Mountain Road City Moyie Springs State ID Zip 83845
- Source of Water Surface Spring If Ground Water (well), Date Drilled mo. n/a / yr. _____
Drilling Permit/Tag No. n/a Drilling Company's Name n/a
- Extent of use(s) completed as authorized by the water right permit:
Domestic (No. households) 1 Irrigation (No. acres) 1 Stockwater (No. and stock type) 1-5 head of stock
Other _____
- Total diversion rate or volume (storage only) for which proof is submitted D. 09 cfs OR _____ af
If the total developed water use is 5 acres of irrigation or less, is stockwater storage of 14.6 acre-feet or less, or has a diversion rate of less than 0.24 cfs, attach a map of the place of use and point of diversion and photographs showing beneficial use.
- Describe the diversion and delivery system from the water source to the use (pump, lift, irrigation method, etc.)
See Attached.
- Permit condition compliance. Refer to the permit approval conditions and check all the items required, then check "Yes" or "No" to indicate whether the required items were established, submitted, and/or installed:
Required? Yes No (If "Yes", attach required data, evidence of compliance, or evidence of installation)

☐	☐	☒ Ground water level data, pumping information, or other diversion data
☐	☐	☒ Mitigation plan
☐	☐	☒ Lockable controlling works
☐	☐	☒ Measuring device
☐	☐	☒ Fish screen
☐	☐	☒ Other requirements of the water right permit <u>_____</u>
☐	☒	Reasonably Anticipated Future Needs ("RAFN") Municipal use

If RAFN Municipal use, additional increment of beneficial use developed? ☐ Yes (attach CWRE report) ☐ No
- Fee Enclosed \$ 50.00 or ☐ CWRE field report attached or ☐ No fee required
See fee schedule on page 3 of the instructions. Proof statements filed without an appropriate fee are incomplete.

8. Person to contact to accompany a Department representative during the field examination of the water system:

Name: Delton Isaac Telephone No. 208-267-3008 Email dtisaac123@hotmail.com
Mailing Address 427 Baldy Mountain Road City Moyie Springs State ID Zip 83845

The information given on this form is my true statement of the extent to which the above numbered permit has been developed and water has been diverted and applied to beneficial use. I understand that any undeveloped portion of the permit is relinquished to the State of Idaho.

Spring Number 1:

Parcel # RP62N02E091800 A

The water is collected in two vertical galvanized culverts which are surrounded by six 11 yard loads of washed drain rock, 1" to 1 ¼ " in diameter. The culverts are randomly perforated on the bottom 2/3rds of the culverts. There is a 1 inch black poly water line running 100 feet down to the collecting tank at the home site. This tank has concrete in the bottom and sealed with epoxy paint which is designed for potable water. This system has a 1 horse shallow well pressure pump which brings the water to household pressure, There is also a 50 gallon pressurized tank for household use. The large pressurized tank allows you to use a lot of water without the pump kicking on. There is an over flow safety system on each culvert. Each culvert has a customized cover to eliminate any debris from getting into the culverts.

Spring Number 2:

Parcel RP62N02E094800 A

The water is collected in a vertical galvanized culvert which is surrounded by six 11 yard loads of washed drain rock, 1" to 1 ¼" in diameter. The culvert is randomly perforated on the bottom 2/3rds of the culvert. There is a 1 inch black poly water line running 100 feet to a freezerless faucet for watering stock and for irrigation. There is also an overflow for wildlife consumption.

Culvert System Assembly:

The culverts are 10 feet below the surface of the ground. There is 8 feet of drain rock surrounding the culverts, then 2 layers of black plastic covering the drain rock. Then there is 2 feet of good clay and then 1 foot of good top soil.

The entire system tapers from the culvert out to ground level so that there is not a build up of sediment water around the water system.

There is 1,000 plus gallons of water storage available with the amount of drain rock that is used in this system.
