1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. 4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.

Is this application being submitted with a lease application as a lease/rental package?

Yes ☒ No ☐

If yes, specify companion water rights in Section 4

This application must be completed according to the minimum requirement checklist below. This checklist is part of the rental application and must be included with the rental application. **Applications that do not meet the minimum requirements will not be placed in the processing queue and may be returned until all minimum requirements have been met.**

Rental applications should be submitted well in advance of the desired start date for the use of rental water. Rental applications may be processed as early as November 1 of the year prior to the intended use of rental water. Any rental application received on or before November 1 for use in the next year will be assigned a received date of November 1. Rental applications submitted more than one year in advance of the proposed start date for the use of rental water will not be accepted and will be returned to applicants. Rental applications may be returned to applicants if the desired start date for the use of rental water cannot be accommodated by the Water Supply Bank. Rental requests will not be accepted once the rental season of use period has concluded.

One rental application per beneficial use of water. For multiple beneficial uses of water, separate rental requests should be submitted for each unique beneficial use of water. One rental application can be submitted if you propose to rent water from multiple sources.

For additional instructions on completing a rental application, visit the Bank's website at http://idwr.idaho.gov/water_supply_bank.

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
36-8266	stockwater	0.12	13.4			0.12	13.4	
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL			
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

n/a

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

WATER RIGHT NO. 36-8266 AGREEMENT 736**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of \$30.82 per year was calculated based on the current rental rate of \$23.00 per acre-foot multiplied by a diversion volume of 13.4 acre-feet.

Please send a check for \$30.82 for 2023 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing. An annual payment shall be received by the Department prior to the execution of this agreement and prior to January 1 in all subsequent years for the duration of the rental period. Pursuant to the Water Supply Bank Rules, the fee will be retained by the Department to offset administrative costs for **2023**.

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 2617 was sent in by Melinda Bunn, Personal Representative of the Estate of Herb D Allen, deceased and John O. Fitzgerald II, Trustee of the Spousal Trust and received on March 1st, 2023. The application is part of a lease rental package with lease application 2616. The application proposes to rent contract 1700 from the water supply bank from 2023-2027. This application is connected to an agreement between the Northside Canal Company, who purchased the leased water right from the rental applicant. The canal company would lease the stockwater portion of water right 36-8266, for the applicant to rent, until the applicant sold property containing the POU. The point of diversion is within the Eastern Snake Plain Aquifer GWMA, Snake River Basin Moratorium, Groundwater District North Snake, and Trust Water Area. The Groundwater District was informed on March 10th, 2023. This is the first time this water right has been rented from the water supply bank.

AUTHORITY TO FILE:

Melinda Bunn signed the application. Ms. Bunn has the authority to file this application because she is the personal representative of the current owner of the property for which rental water will be applied. The current owner, Herb Allen, is deceased. Due to the circumstances, it is likely that Ms. Bunn would have the authority to file on Mr. Allen's behalf.

INJURY TO OTHER WATER RIGHTS:

The place of use and points of diversion are the same as in the lease contract. Since water is remaining within the same grid cell in the ESPA Modeling Boundary, modeling is not required. There are no other injury concerns.

ENLARGEMENT OF USE:

The place of use and point of diversion are not moving under this application. The diversion rate was reduced to 0.06 cfs from what the applicants proposed. If the unleased commercial and domestic uses from 36-8266 and the proposed rental were diverted the total rate would be 0.18 cfs leading to the enlargement of 36-8266. The reduction ensures the total diversion rate matches the total diversion rate for 36-8266, 0.12 cfs. There are no other water rights with the same beneficial use within the place of use. Therefore, there are no enlargement concerns.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The point of diversion is within basin 36 and Water District 130 but not administered. The Southern Regional Manager was contacted for comment on March 10th, 2023. No response was received, it is assumed there is no concern with this proposal.
