RENTAL AGREEMENT CONDITIONS OF ACCEPTANCE

1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
7. Renter acknowledges and agrees that the Director may terminate authorization for the use of a water right based on a water right's priority date.
8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 2789 was sent in by Frank Tiegs LLC and received on October 30th, 2023. The applicant proposes to rent the entirety of lease contracts 1769, 1787, 1788, and 1789 from the water supply bank from 2024-2026. This rental application is part of a lease rental package with the lease contracts proposed. The point of diversion is within the Snake River Basin Moratorium, and Trust Water Area. This application is intended as a renewal of agreement 534 which is set to expire on December 31st, 2023.

AUTHORITY TO FILE:

Frank Tiegs signed the application. Mr. Tiegs has the authority to file this agreement because he is the manager of the Frank Tiegs LLC according to the Idaho Secretary of States Office Database. Frank Tiegs LLC is the current owner of the place of use and point of diversion according to Department records.

INJURY TO OTHER WATER RIGHTS:

This application is included in Mr. Tiegs' irrigation plan along with agreement 531 which expires on December 31st, 2025. This rental proposal could lead to increased depletion of the Snake River flows directly impacting the minimum streamflow's at the Murphy and Weiser Gauges. A condition should be added to the agreement limiting diversion to times when the minimum streamflow at either gauge are being met. The point of diversion is not within Eastern Snake Plain Aquifer Ground Water Management Area Modeling Boundary. Therefore, modeling is not required. There are no other injury concerns.

ENLARGEMENT OF USE:

Agreement 531 authorizes the same point of diversion and is limited to 0.02 cfs per acre and 4.0 af per acre. Some of the water rights proposed for rental authorize 5.0 af per acre. To prevent enlargement of agreement 531 the authorized volume per acre should be reduced the match agreement 531, 4.0 af per acre. In addition a condition should be added limiting the agreement when combined with all other water rights to 0.02 cfs per acre and 4.0 af per acre. There are no other active water rights that share the same beneficial use overlapping the place of use. There are no other enlargement concerns.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The point of diversion is within basin 2, Water District 2, and the place of use is within basin 51. The Watermaster and Western Regional Manager were contacted for comment on January 4, 2024. No response was received, it is assumed there are no concerns with the applicant's proposal.
