4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

10. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 143.

Application to Rent Water (Continued)

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
43-13797	Irrigation	0.3	101.2	25.3		0.3	101.2	25.3
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.3	101.2	25.3
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

MEMORANDUM FOR AGREEMENT # 845

To: Water Right No. 43-13797

From: Bob Howe

Date: 03/22/2024

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE:

The Water Supply Bank (WSB) received rental application 2908 on January 19, 2024, signed and submitted by Hyrum Gibby, on behalf of Valley View Farms LLC. The application proposes to rent the portion of right 43-13797 leased into the WSB under contract 1839, for 2024. This application is part of a lease/rental package. This application is only requested for one year to provide for irrigation until the transfer application submitted in 2023 can be completed to move water permanently to the place of use. This application is a renewal of agreement 720, which expired in 2023.

AUTHORITY TO FILE:

The 2024 annual report for Valley View Farm LLC lists Hyrum Gibby as a member and Von Gibby as registered agent and manager. Cassia County tax parcel records list V & R Farms LLC as the current owners of the parcel appurtenant to the rental place of use (POU). The 2024 annual report for V & R Farms LLC list Von Gibby, as the registered agent and manager. There are no concerns regarding the authority to file the rental application.

INJURY TO OTHER WATER RIGHTS:

The proposed rental point of diversion (POD) is also in the companion lease contract 1839. The proposed rental POU is across the road from the idled acres under contract 1839. It is unlikely movement of groundwater from the lease to rental place of use would impact neighboring water users.

ENLARGEMENT OF USE:

The application proposes to rent the full leased water for contract 1839 and does not change the nature of use or season of use. The combined duty of water for rights 43-2359, 43-2460, 43-4010, and 43-7054, which share the rental POD is the same as the duty of water for leased right 43-13797. Therefore, there are no enlargement concerns.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The point of diversion is within Basin 43 and Water District 143. The Water Master and Southern Regional Manager were contacted for comment on March 22, 2024.
