RE: Watermaster Appointment 2012— Reynolds Creek #57R

Dear Ms. Brandau:

Enclosed is your Watermaster Certificate of Appointment for the 2012 season.

You will take charge of the water of the district and distribute the same in accordance with the laws of Idaho and decrees of the courts. Distribution shall be in accordance with the terms and conditions of the user's respective rights, and as may be required by the Department of Water Resources. You should note that the enclosed Certificate of Appointment authorizes delivery of natural flow and also stored water pursuant to Section 42-801, Idaho Code.

During the 2011 session, the legislature made several significant changes to the Watermaster Statutes in Chapter 6. In summary the following changes were made:

- Under IC42-605, new watermasters will continue to file an oath of office with the Department. However, a duly appointed watermaster that is reelected in consecutive years will no longer be required to file additional oaths each year.
- Under IC 42-608, a wateruser no longer is required to submit a written Petition for Watermaster Services to the Department when calling the Watermaster. The wateruser now calls the watermaster directly when there is a necessity for control and distribution of water within the district.
- Under 42-615, the watermaster no longer have to submit the district proposed budget to the Department. They are to prepare a proposed budget 14 days in advance of the annual meeting. The proposed budget and distribution should be submitted at the annual meeting for consideration by the water users.

These changes definitely will eliminate significant paper work and time for all parties. Feel free to contact our Western Regional Office if you need assistance during the irrigation season, phone 334-2190.

Sincerely,

John Westra,
Western Region

**REYNOLDS CREEK DIST. 57R
2012 WATERMASTERS DIARY**

March 6, 2012 Annual water users meeting in Murphy. Connie Brandau elected watermaster, Gary M. Penny appointed assistant watermaster, Richard Brandau elected district chairman, Jarry Hoagland elected secretary, Connie Brandau reappointed treasurer. Advisory board: Lou Sanchez and Dean Young.

April 1, 2012 Brandau's have burned RID lateral to China Ditch Road and put in stock water today. With the OK of RID ditch rider.

April 10, 2012 Jason Muller called, wants to put more water in RID lateral. Dean Young called and is cleaning the Boise Trust ditch with a track hoe tomorrow. Kyle Moos called, wants to know about Young's ditch rights through his property. I referred him to Idaho Code 42-1204.

April 11, 2012 Lou Sanchez called. They put boards in RID waste gate and says there is no head pressure. I told him that they probably need to put their board in their dam. Unpaid bills to date: Agenbroad Lateral; CRM Ranch; George Earll; Ed Frisbie; Keith Goering; Heart Diamond; Jaca; Paul Jesenko; Dan Muller; Ron Gabert; Snake River Valley LLC; Kevin Smith

April 17, 2012 Lou Sanchez called, they want more water in RID Lateral. 7:15 pm Matt Duckett called and wants water in West Reynolds Lateral. There is no water going to the river. Gary or I will go out tomorrow 4/18/12 to see what is available.

April 18, 2012 9 am Forrest Stimpson called. They are wanting water in the Last Ditch. He needs to build dam first. I called the ARS and asked if I could get the Tollgate and Outlet weir readings from them this year like I usually do.

April 19, 2012 Gary brought up the water measurements from yesterday. He had the Boise Trust ditch measure at 2.6 cfs but it looked like more to me so I checked their weir and they did NOT have a weir blade in. I called Dean Youngs and left a message. I spent the evening extending amounts and figuring where everyone should be according to priority date & water right amounts. Then started making the necessary calls. Dean Young called me back about 7 pm and we talked about measuring devices; the proper construction of cipoletti weir blades and their proper installation. He said that he has the printed information that I gave him last year from the IDWR handbook. I called Kelly Clemens/Junayno and had him shut their weirs down to measure 1 ft of depth in each parshall flume on the lower place (to start with).

April 20, 2012 The creek is up a little from the adjustments and is running clear.

April 21, 2012 Eighty degrees yesterday. The creek is way up this morning and running a little cloudy.

April 22, 2012 I talked to Jason Muller to let him know the West Reynolds ditch is leaking across their access road on the Brandau property in five different places according to Richard Brandau. Jason needs to check the WR lateral to see why it is leaking, ei. Gophers, weed jams, etc. WR did NOT burn their ditch out this year prior to opening the headgate. Jason called me back at 3 pm. He said that he went out and looked and that he will try to get a backhoe up there to take care of it. Brandau can't use this road to his fields because it is so soft and muddy due to WR ditch leaks. I told Jason to call me if they can't get in to fix it and I could go in from the top end and shut off the water until it is repaired. There was a backhoe working on their ditch at dusk.

May 5, 2012 At 3 pm Forrest Stimpson made an official call for water for the Last Ditch. 7 pm Dean Young called. They had Hill do backhoe work on the Last Ditch dam and want water. Boise Trust ditch still does NOT have a weir blade in. 8 pm Gary Penny brought up water measurements from yesterday.

May 6, 2012 Worked on extending cfs measurements of ditches to appropriate individuals. I called ARS to get their weir readings. I made a special trip to see if Youngs had a blade in their ditch yet.

May 8, 2012 11 am Dean Young called to tell me he got the weir blade in the Boise Trust ditch this morning so I called Junayo/Clemens and told them to adjust their east side weir from 9.54 cfs down to 2.09 cfs. Then I adjusted Boise Trust weir and waste gate to allow a steady head to flow on to Last Ditch diversion.

May 11, 2012 Gary measured upper reach today and I ran the lower creek and figured the cfs being used.

May 19, 2012 The creek has been dropping daily. Jason Muller was at RID diversion today. About 9 pm I discovered that he had opened the head gate from where I'd had it set so I immediately shut it back down and called him. I called him and left a message that I had set the weir and if he wanted changes made to talk to me first. I had also told him that mid-week. I also stated that I would padlock the head gate if necessary.

May 20, 2012 Sunday 8:30 am Jason called me back and apologized for opening up the RID head gate. They will start another pump out of the river tomorrow. I told him that they probably shouldn't be expecting water from the creek for much longer.

May 23, 2012 Rich Brandau built dam at the upper end of his place. He'd only had about 20" - .4 cfs. So I had to adjust on down on the lower reach of the creek. I shut the RID lateral down from 4" to 2" across a 7 ft blade and left the rest of the lower reach set as it was. I will check it again tomorrow. 9:30 pm figured water measurements that Gary turned in.

May 26, 2012 Saturday Jason Muller called to say it looked like the creek was up a little this morning and wanted to know if I thought it would stay. I told him it was most likely because it was Memorial Day weekend and people up above weren't changing

their water and that it probably wouldn't last past Monday. So he said he would probably just leave the head gates on his ditches where they were.

May 27, 2012 Sunday 9:30 am Kelly Clemens wants to move his water to the east side ditch and wanted to know where the water level should be on the staff gauge in the 2 ft parshall flume.

June 1, 2012 Friday Gary Penny ran both upper and lower reaches of creek.

June 2, 2012 Extended ditch measurements from 6/1 to individual water rights sheet.

June 4, 2012 Monday 9 am Tony Richards called and wants me to call and let everyone on the creek where they should be on their water amounts so I did; 6/1/12 measurement would fill through the 1888 water rights. Jeff Clausen (new guy for Junayo) called me back and told me that he had water from the Ram Field ditch but wasn't getting any out of the Community ditch. I explained to him that he only has 1.28 cfs right and that he can't take that amount in two places at once. I called Huff's and 10:15 and left information that High Ditch should be running 4.7 cfs. We had one heck of a wind and rain storm this evening.

June 5, 2012 Jerry Hoagland called at 7 am and said that they were starting water at the orchard (Dobson) on Saturday. They have a 9" parshall flume on their diversion ditch. Eliad Jaca called me back and said that they would shut down to one head of water and that they were about ready to start haying anyway. I called Tony Richards at 7:30 am to let him know that Brad and Jerry will adjust on the High Ditch this morning at that Elias will kick one head loose. Tony will co-ordinate with them and Jeff on the Community and Ram Field ditches that he uses in common with them.

June 13, 2012 Wednesday The creek is dropping fast. Not much in WR lateral. I followed it all the way to Gerald Mullers place. Only about 40" getting to place of use. I tried to call them but got no answer.

June 17, 2012 Fathers Day I called West Reynolds ditch rider and left a message asking him how much water is reaching place of use. I did not receive an answer by evening so I drove the entire length of the lateral. There was about .4 cfs getting to the point where the creek water co-mingles with the pump water from the river. I had measured 1.62 cfs at the head of the ditch – so there is about 1.42 cfs of ditch loss. I made the determination of futile call and went back and closed the WR head gate. The WR lateral would have gone down more tomorrow as Rich Brandau is done haying and had notified me that he was turning his water back on tomorrow morning.

June 19, 2012 Tuesday morning. There is still a little water in the WR lateral. The head gate slide is out of its track and rusted out. I put a couple of flaked of hay in front of it to shut it off. I need to advise WR board of directors that it needs repaired.

November 7, 2012 Norris and Forrest Stimpson asked me to check to see if there is any way to get water brought down to the Calvin Johnston place (which they are renting) for stock water. I will remove the boards from the Boise Trust waste gate and call Junayo/Clemens to see what their situation is up there.

November 8, 2012 Daniel Richards wants stockwater at the Henry Brandau place. Daniel used backhoe to pull beaver dams to see if creek would flow. Kelly Clemens called at 8 pm and said they are not taking any water out of Reynolds Creek and that Macks and Salmon Creeks are dry.

November 9, 2012 I called Stimpsons and Richards to let them know there is no water to bring down, even for stockwater.

December 5, 2012 Kelly Clemens called about a measuring device for their new project at Cottle Creek. He will get the printed information from me at a later date.

December 12, 2012 Gary Penny presented me with his assistant watermaster bill for payment; \$.40 per mile and \$70 per day.

December 30, 2012 I typed up the watermaster diary, consolidated water use on a spread sheet, figured individual use, submitted my bill for payment and calculated the water cost per cfs for billing purposes.

Respectfully submitted,

Connie M. Brandau, Watermaster
Reynolds Creek Dist. 57R

WATERMASTER'S REPORT

RECEIVED

JAN 30 2013

WATER RESOURCES

Water District No. REYNOLDS CREEK DIST. 57R
Stream REYNOLDS CREEK
Watermaster Name CONNIE M. BRANDAU
Mailing Address 9902 WILSON CEMETERY LAVE WILSON ID 83641
Name of Secretary JERRY HOAGLAND
Secretary Mailing Address 13528 REYNOLDS CREEK ROAD WILSON ID 83641

SECTION 42-615, IDAHO CODE

PROPOSED BUDGET FOR SUCCEEDING YEAR. Each watermaster shall, at least fourteen (14) days prior to the annual meeting of the water users of the water district, also prepare a proposed budget for the succeeding year, together with a distribution of the amount of the budget to the respective water users, using the actual deliveries for the past irrigation season or seasons, as the basis for distribution. The proposed budget and distribution shall be submitted to the water users for consideration and approval at the next annual water meeting.

In conformity with the above statute, I hereby submit a Proposed Budget for 2013.
(YEAR)

Connie M. Brandau
WATERMASTER

WATERMASTER'S REPORT

From MARCH 1, 2011 To MARCH 5, 2012

Water District No. 57R

Name of Watermaster CONNIE M. BRANDAN

P.O. Address 9902 WILSON CEMETERY LAKE, WILSON, ID 83641

AFFIDAVIT OF WATERMASTER

STATE OF IDAHO }
 } ss.
COUNTY OF _____ }

Connie M. Brandan, being first duly sworn, deposes and says that he is Watermaster of Water District 57R, having been lawfully appointed by Dery Spackman, Director, Idaho Department of Water Resources, and that the volumes of water, as stated in this report and prorated by him to the water right holders of the district are correct.

Connie M. Brandan

(Deputy) Watermaster District No. 57R

Subscribed and sworn to before me this 8th day of February, 2012, at Boise, Idaho, # 334011
Vicky Unsil
Notary Public
My Commission expires 1-27-10

(SEAL)

Boise, Idaho, February 8, 2012

I HEREBY CERTIFY, that Connie Brandan was lawfully appointed by me as Water Master of Water District No. 57R, and that the information contained in this report, as herein sworn to, is, to the best of my knowledge and belief, correct.

Director, Department of Water Resources

By J. W. Wether, Manager
Western Region

SECTION 42-606 IDAHO CODE

REPORTS OF WATERMASTERS. All watermasters shall make an annual report to the department of water resources prior to the expiration of the watermaster's appointment for the current year. This report shall show the total amount of water delivered by the watermaster during the preceding year, the amount delivered to each water user, the total expense of delivery and the apportionment of expenses among users and all debits and credits to be carried over to the following year. Such report shall also include records of stream flow the watermaster used or made in the process of distributing water supplies. The director may ask for other information deemed necessary in assuring proper distribution of water supplies within the district. The reports of watermasters to the department of water resources shall be filed and kept in the office of the department.

Instructions For Completing Annual Watermaster's Report

This form has been developed to assist the watermaster in complying with some of the annual reporting requirements of Section 42-606, Idaho Code. The form provides for summary of the amount of water delivered by the watermaster to each user, the total expense of delivery and the apportionment of expenses among water users, including debits and credits. Water distribution and hydrologic information including stream flow records, daily diversion data, water right information and water right priority cut summaries should be presented in a separate water distribution report.

Complete this annual report form of delivery and costs as follows:

- 1) Enter water right holder name, corresponding IDWR water right number or numbers, and corresponding diversion name and/or remarks on page 2;
- 2) Enter the total amount of water delivered to each user as total 24-hour second feet under column 1, page 3. Total **24-hour second feet** is a flow rate expressed in terms of one day or 24 hours. For example, a continuous diversion of 2 cfs over 20 days would equal 40 24-hour second feet.
- 3) Under column 3, page 3, enter the amount of money assessed or billed to each user at the beginning of the year. The assessment may be found in the previous year's adopted budget report.
- 4) In the work space provided on the right hand side of page 3, add up total watermaster salary costs and expenses and enter as 'TOTAL COST'. Then divide this total cost by the total number of 24-hour second feet delivered (sum of column 1) to obtain the cost per 24 hour second feet delivered, or the unit cost factor.
- 5) Under column 2, page 3, multiply the unit cost factor (obtained in step number 4 above) by each user's total 24-hour second feet delivery in column 1 to obtain the total cost against each user.
- 6) For each user, subtract the total cost amount in column 2 from the adopted budget in column 3 and enter the difference either as a credit or debit (negative differences entered as debits, positive differences entered as credits).
- 7) Sign the report before a notary public and submit the original to the appropriate regional office of the Department of Water Resources. Retain one copy for the Water District.

Reynolds Creek Dist. 57R 2011 Water Masters Diary

March 1, 2011 – Tuesday, annual district meeting 1 PM at Owyhee County Courthouse, Murphy, Idaho. I reported that I had received an updated delivery schedule from IDWR, the first update that I had received since 1984. I asked for the name of the contact person for each lateral users group. We talked about lateral maintenance and the occasional need for locks. I reported that having an assistant water master for the district was working out exceptional well. Present at the meeting were Richard Brandau, Jerry Hoagland, Connie Brandau, Kelly Clemens, LaVar Young, Jackie Benson, Tom Benson. The advisory committee for 2011 is Dean Young and Lou Sanchez. The water masters budget will remain the same as last year, \$5,000.00. Compensation for the water master and assistant was set the same as last year at \$70.00 per day and \$.40 per mile. Compensation for the position of treasurer was set at \$12.00 per hour, \$.40 per mile and out of pocket expenses for office will be reimbursed. Connie Brandau elected water master for 2011. Gary Penny appointed as assistant water master and Connie Brandau will be the treasurer. The next annual meeting will be held on either the 1st Monday or Tuesday of March 2012.

April 6, 2011 – Richard Brandau put stock water in the RID lateral, just enough for stock water. He had burned the weeds out of the ditch to the Stone Quarry on the 4th and on around to Idaho Power property on the 5th.

April 9, 2011 – 9am to 10:30am - I was called on to do a “preliminary check” on 57R. The creek has been (and still is) running high. I called Gary Penny, Lou Sanchez and Dean Young and asked them to accompany me to check for damages to diversions, measuring devices and to see who is irrigating. Tentatively scheduled for next Monday or Tuesday. I made a call to the ARS to request emails of weekly weir measurements. RID and West Reynolds have scheduled McCoy to haul material for diversion dam maintenance. I looked up high flow rights; 57-11516 / 15 CFS if for 30 acres in the Macks Creek drainage ONLY, 5-11510 / 5.87 CFS if for 83 acres on the Cemetery Place. Maximum diversion rate to Storage in the East Side reservoir is 4.6 CFS.

April 12, 2011 – I called the BLM Marsing office and told them that I needed to establish the criteria for Sections 19 and 23 regarding the Land Use Permit, Water Permit and protocol. I was told that there was to be no irrigation on Sec. 19, 2S, 3W or on Sec. 23, 2S, 4W and they could send a tack out with a GPD unit to identify the land area if needed. He also asked why we were going out today and I told him that it is our regular cursory inspection of the 57R system with the assistant water master and the advisory board. Jason Muller, ditch rider, called and said that the ditch has been cleaned and burned all the way to the 7Hi settling pond and he is ready for water. I opened the head gate five turns – estimated 70 to 80 inches of water. Gary Penny, Lou Sanchez and I did a preliminary run of the lower reach from 1-3pm then left to over the upper reach at 3pm and got back at 8pm. I took about 80 digital photos of damages to diversions, weirs and ditches caused by the high flows this spring. The diversions that were “armored” by Chris Hansen withstood the high flows better than the earthwork or straw dams.

April 15, 2011 – At 11am Jason Muller called and wants to turn the “creek ditch” up some more (RID lateral). OK’d.

SCANNED

JAN 09 2015

April 28, 2011 – Jerry Muller came up to pay his bill in person so he could put water in the West Reynolds lateral.

May 5, 2011 – RID lateral board had a track hoe up resetting the ecology blocks displaced by January 17th high water. Ditch rider turned more water in.

May 7, 2011 – GM Penny called at 7am and said that there is water to their house coming from somewhere. When I went to check I noticed that the creek was up higher than it had been on the 5th. The water was coming through Jeff Theis property. They had allowed trash, tires, pallets, tin and other junk to be placed in or over the ditch and had floated down the ditch restricting the flow of water through the 4 foot culvert on Rocky Top lane. This caused the water to overflow at a place where Theis' had been "fording" or crossing the ditch with vehicles that had worn the bank down by at least one to one and a half feet. I took photos, went back to the head gate and shut the water down. Then, since it had cut across a county road (China Ditch Road) and run down and washed out about ¼ mile of a private lane (Wilson Cemetery Lane) I called the Owyhee County Sheriffs Office, the Owyhee County Road District, the Reynolds Irrigation District ditch rider Jason Muller, the 57R advisory board and a county commissioner. The ditch is to be cleaned and encroachment by Jeff Theis on the ditch easement (for access maintenance and cleaning) addressed and RESOLVED prior to putting water back into the lateral.

May 13, 2011 - Assistant GM Penny went out to measure.

June 8, 2011 – GM Penny called and is going out to measure today.

June 17, 2011 – I got a letter from Owen Orndorf's attorney stating that he was withdrawing his application for "transfer" of water right in regard to Section 19 and the BLM LUP.

June 24, 2011 – GM Penny took photos of Junayo's Macks Creek outlet weir when he went out to measure today. It was put in so late this year that we never got a reading over it.

June 27, 2011 – Last Ditch users were working on tightening up their dam and waste gate today. There was still a little water going past State Highway 78 to the river.

July 12, 2011 – GM Penny measured today.

August 1, 2011 – Theron Hook called me out to measure and adjust water tomorrow. He said that he has no water and that there is still water being diverted into the High Ditch.

August 2, 2011 – I called Hoaglands to give them notice that I will probably be shutting down, or off, some of the junior rights. Due to ditch loss it takes about 40 inches to get water through the High Ditch, so if there isn't at least that much to divert I will determine it is a futile call and send it on down the creek. He said there is no water at the Dobson today but they will probably turn it on this morning. Their measuring device is by the road above the corral, about 200 feet below their diversion. It has been in for over three years but hasn't had water in it when I've been out to measure. There is still water at the Bridge and the Barn diversions.

August 4, 2011 – Tony Richards called and left a message. He had heard that I had been called out on 8/2 and wanted to know “what priorities were being served?” I called him back and left a message that Hooks (priority #1) should have 1.60 cfs coming, Junayo’s (priority #4) was not being used because they were haying, so the balance of the water available at the Community Ditch diversion, 1.00 cfs, should be going to him.

November 27, 2011 – Gary Penny requested review and payment of his assistant water master bill.

December 13, 2011 – I received a call from a district patron asking about water rights on Cottle Creek. The only rights that I know of are theirs. I told them that they should probably call IDWR with their concerns. I heard back from them later in the day. They said IDWR said they should probably take some pictures for documentation. They don’t have a camera and asked if I could come up and take photos, which I did.

December 15, 2011 – I received a letter from Bensons which stated in part, “I noticed that Orndorff is putting in new fields across the road from us. So I called Water Resource to ask them if he had water rights on Cottle Creek or even storage rights. And they told me that he did not have any water rights or storage rights on Cottle Creek.” Her question was “I guess I want to know if or what Reynolds Creek 57R is going to do about it?”

January 12, 2012 – I hand delivered a packet to IDWR, with copies going to Dist 57R secretary, in response to the Jan 11, 2012 email I received from IDWR which stated in part “As soon as I get your photos and the complaint file from the effected property owners I will discuss it with John Westra our regional manager and map out a plan to address this issue and contact you with the results.” The packet included the letter of complaint I had received, Google Earth historical data photos, a CD of photos I took on Dec.13, 2011 and a copy of the email.

January 13, 2012 – Spent the day updating and finalizing the Water Master records for the year 2011.

I’ve spent two weeks during the past month trying to get people to update their water right ownerships, take care of splits and bring my water delivery books up to date. I have contacted: Dennis Agenbroad 57-2094F about his property sale and splits to Mick Lathrop, Eric Fritzler and J and M Cattle; Dean Young about their purchase of Esther Keith 57-2007A property, the William Tincher 57-2093B property and subsequent partial resale and split thereof, Walter Smith 57-2094H change of ownership, changing ownership of J LaVar Young rights to Youngs Rivers Ranch; Theron Hook about Hook Family Limited Partnership 57-11776 & -11778 sale to Kevin Smith who has never transferred those rights; Dan Muller about IDWR records showing that Tom Hook is the owner of record for the water right 57-278 but Dan claims does not own the property; Karla Chester needs to split the Sam Pitman right 57-2006B between herself and J and M Cattle and update ownership; Paul Jesenko needs a change of ownership on 57-10839 Dan Hall (died over 40 years ago); Richard Brandau 57-10847 about the Brandau Subdivision, name change and place of use.

I also discovered a water license 57-2093 for District 57-J for Catherine Hurley that IDWR said should probably be removed from their records. Mrs. Hurley died many years ago and there has been NO application for or use of water since that time for that right.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Connie Brandau". The signature is fluid and cursive, with a long horizontal stroke at the end.

RE: 2011 Watermaster Report- 57R Reynolds Creek

Dear Mr. Hoagland:

Enclosed is a copy of the Watermaster's Annual Report for the 2011 irrigation season. The report has been approved by this Department in conformity with Idaho Code Sections 42-610 thru 42-615. **The Watermaster should be compensated for services conforming to the report.**

Feel free to contact me if you have any questions, phone 334-2190.

Sincerely,

A handwritten signature in black ink, appearing to read 'John Westra', with a small 'for' written below it.

John Westra
Western Region

Enclosure: Watermaster's Report
