## **Water District 130 Diversion Report for 2018**

Compiled by: Nathan Erickson, Watermaster

Pursuant to Idaho Code 42-606, all Watermasters shall file an annual report to the Idaho Department of Water Resources, which includes the amount of water delivered by the Watermaster in the prior water year(s). The report of diversions is then used to determine annual assessment amounts to each water user.

Up to five years' diversion records may be averaged for each water user, and the average annual diversion used for assessment purposes. The following report averages diversion data for years 2012 through 2016. Data for 2017 are not included in this report, but will be included in the 2019 report.

The attached workbook is organized into reporting units and also includes non-reporting (small user) water users. Non-reporting water users are assessed a nominal administrative fee by Water District 130 but are not required to measure and report annual diversions at this time. Nonconsumptive water users are required to measure and report in Water District 130, and are assessed pursuant to Idaho Code 42-605A and the Water District 130 Adopted Resolutions.

Each worksheet contains specific diversion identification information (WMIS number, Metal Tag Number, Diversion Name, Measurement Option(OP)), owner information and annual use data in acre-feet. All data are averaged over the period 2012 to 2016. Data qualifiers (DQ) have been attached to some data. The Measurement Option and Data Qualifier keys appear below.

**All data appearing within this report are proprietary and may be updated by Water District 130.** Water District 130 and subdistricts conduct ongoing measurement of diversions and measuring device certifications. Calibration factors for flow meters and coefficients for power consumption estimates are recomputed every three years. As these numbers are updated, prior years' data may be adjusted.

### Measurement Option key (OP)

- 1 - Totalizing flow meter on irrigation diversion
- 2 - Power Consumption Coefficient (PCC)
- 3 - Alternate method
- 4 - non use of well due to CRP
- 6 - non use of well, other reasons
- 7 - Time clock or Hour meter
- 8 - Totalizing flow meter on non-irrigation diversion
- 9 - Open channel or non-totalizing device

### Data Qualifier key (DQ)

- Flow meter or timeclock qualifiers-
- est - diversion volume estimated or water right volume used
- NEW - new diversion, has not yet reported
- NM - no reported data, diversions are occurring and may be estimated
- ND - no measuring device installed, diversions are occurring and may be estimated
- OW - data reported combined with another diversion
- EM - reported data are erroneous, and could be higher or lower than actual diversions
- Z - no diversions as confirmed by user, hydrographer or watermaster

### PCC qualifiers

- 1 Simple systems, one operating condition
- 2 Systems with multiple operating conditions and PCC for measured conditions varies by 10% or less
- 3 Systems with multiple operating conditions and PCC for measured conditions varies more than 10%.
- 4 Systems with multiple operating conditions, using low PCC (high flow) condition to estimate volume
- 5 Systems with multiple operating conditions, not all conditions known or measured
- 6 Known problem with reported kwh data
- 7 Measured PCC during flowmeter check

DEPT OF WATER RESOURCES  
SOUTHERN REGION

The water users of the Thousand Springs Area Water District, designated as Water District 130, meeting at the annual district meeting on Tuesday, February 7, 2017 at Jerome, Idaho HEREBY ADOPT THE FOLLOWING RESOLUTIONS:

1. That the watermaster perform the duties as required by Chapter 6, Title 42, Idaho Code and in accordance with the duties described in the Final Order Creating Water District 130<sup>1</sup>, signed by the Director of the Idaho Department of Water Resources (IDWR), February 19, 2002.
2. The Idaho Department of Water Resources be elected to provide the watermaster services for Water District 130 and that the Director of IDWR appoint Nathan Erickson, an employee of IDWR, or other employees of IDWR as may be necessary, to serve as the watermaster for the ensuing fiscal year or as otherwise provided in Idaho Code § 42-608(4) and the Memorandum of Understanding dated February 13, 2009 and executed July 13, 2013.<sup>2</sup>
3. Lynn Carlquist be elected Water District 130 treasurer. The duties of the treasurer will be to approve expenses, oversee disbursement of Water District funds, and to prepare or authorize a review of financial affairs of the district at the end of each fiscal year, in accordance with Idaho Code Section 42-619.
4. The budget for Water District 130 for the fiscal year 2017 beginning March 1, 2017 and ending on February 28, 2018, be as follows: Sixty-three Thousand Six Hundred Seventy Five Dollars (\$63,675) for Watermaster duties, and Thirteen Thousand Two Hundred and Twenty Two Dollars (\$13,222) for measuring and reporting of diversions not reporting to a subdistrict, for a total budget amount of Seventy-six Thousand Eight Hundred Ninety Seven Dollars (\$76,897) . An itemized budget sheet is attached. Carryover amounts from the budget of 2016 in the amount of \$30,000 will be used to offset the amount assessed in 2017.
5. The Watermaster of Water District 130 is hereby authorized to collect the assessments of the Water District in accordance with Idaho Code § 42-618.
6. Given that the water district cost for administering water for many water users is greater than their normal assessments would be based upon their total annual use of water, it is resolved that pursuant to Idaho Code § 42-612 (4) the watermaster of Water District 130 is authorized to assess a \$25 minimum charge for watermaster services for water users within his or her jurisdiction.
7. In accordance with Idaho Code § 42-612 (5), the assessment amount for each individual user as shown in the annual adopted budget shall constitute a final determination of the amount due for that year. In the computation of assessments, the watermaster shall use a 5-year rolling average of diversions
