Rules for Record Keeping

- 1. Use the daily record book or personal spreadsheet.
- Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
- 3. If the Water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or head gate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and head gate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
- 4. If the water being delivered is not actually measured, enter an "E" in the grid space under the column meas method for the particular day that the flow rate is estimated. An "E" should always follow an <u>estimated</u> numerical flow that is observed and set in the field.
- 5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of non delivery.
- A blank grid space; means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
- 7. If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference. If there are multiple rights at diversion, please list the most senior right first. You may supplement this book with a list of water rights by priority for each diversion.
- 8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream right holders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.
- If necessary or requested, watermasters should submit a separate water rights list or reference sheet that associates water rights with current owners or diversion names.

Rules for Record Keeping

- 1. Use the daily record book or personal spreadsheet.
- Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
- 3. If the Water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or head gate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and head gate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
- 4. If the water being delivered is not actually measured, enter an "E" in the grid space under the column meas method for the particular day that the flow rate is estimated. An "E" should always follow an <u>estimated</u> numerical flow that is observed and set in the field.
- 5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of non delivery.
- A blank grid space; means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
- 7. If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference. If there are multiple rights at diversion, please list the most senior right first. You may supplement this book with a list of water rights by priority for each diversion.
- 8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream right holders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.
- If necessary or requested, watermasters should submit a separate water rights list or reference sheet that associates water rights with current owners or diversion names.

A service								l .		T								I
C Rose 18 - Mary										Remarks								

Rules for Record Keeping

- 1. Use the daily record book or personal spreadsheet.
- Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
- 3. If the Water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or head gate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and head gate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
- 4. If the water being delivered is not actually measured, enter an "E" in the grid space under the column meas method for the particular day that the flow rate is estimated. An "E" should always follow an estimated numerical flow that is observed and set in the field.
- 5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of non delivery.
- 6. A blank grid space; means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
- 7. If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree.

 Future users of the records will likely look for a water right reference. If there are multiple rights at diversion, please list the most senior right first. You may supplement this book with a list of water rights by priority for each diversion.
- 8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream right holders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.
- 9. If necessary or requested, watermasters should submit a separate water rights list or reference sheet that associates water rights with current owners or diversion names.

Rules for Record Keeping

- 1. Use the daily record book or personal spreadsheet.
- 2. Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.

ALL VICE

- 3. If the Water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or head gate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and head gate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
- 4. If the water being delivered is not actually measured, enter an "E" in the grid space under the column meas method for the particular day that the flow rate is estimated. An "E" should always follow an <u>estimated</u> numerical flow that is observed and set in the field.
- 5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of non delivery.
- A blank grid space; means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
- 7. If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference. If there are multiple rights at diversion, please list the most senior right first. You may supplement this book with a list of water rights by priority for each diversion.
- 8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream right holders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.
- 9. If necessary or requested, watermasters should submit a separate water rights list or reference sheet that associates water rights with current owners or diversion names.

Watermaster's Proposed Budget

FOR 2019

Water District No. 33

Stream Little Lost River							
Name of Watermaster <u>David S. Andreason</u>							
Address _ 3794 Little Lost River Hwy. Howe, ID 83244-0031							
Name of Secretary Rick Pancheri							
Address Howe, ID 83244							
Section 42-615 - IDAHO CODE ANNOTATED							
PROPOSED BUDGET FOR SUCCEEDING YEAR - Said Watermaster shall on or before November fifteenth in each year, also prepare and file with the secretary of said water meeting a proposed budget for the succeeding year, together with a distribution of the amount of said budget to the respective water users, using the actual deliveries for the past irrigation season or seasons, as the basis for said distribution as hereinabove provided, which said proposed budget and distribution shall be submitted to the water users for consideration and approval at the next annual water meeting.							
In conformity with the above statute, I hereby submit a proposed Budget for the season of 2019.							
David S. Andreason, Watermaster

David Andreason 3794 Little Lost River Hwy Howe Id 83244-0031

WATER DISTRICT #33

Dear Watermaster:

Enclosed herewith is a copy of the Watermaster's Annual Report for the past season.

The same has been prepared by the watermaster and approved by this Department in conformity with Sections 42-610, 42-614 and 42-615, Idaho Code.

During the 1993 legislative session, the legislature enacted a new law which amends Section 42-619(9), Idaho Code and removes the independent financial audit requirement for most state water districts. The new law, referenced by Section 67-450B, Idaho Code (copy enclosed) identifies minimum audit requirements for all local government entities. Under the new statute, the governing body of any local government entity (i.e.; water district) whose annual budget does not exceed one hundred thousand dollars (\$100,000) has no minimum audit requirements under this section. This means that any district which handles its own money and whose budget is one hundred thousand dollars (\$100,000) or less does not have to have an independent public account firm conduct a financial audit every few years as previously required by Section 42-619(9).

Please note that only the statutory requirement regarding the independent financial audit has been changed. Districts handling their own fund (i.e.; districts who collect and / or disburse their own funds) must still submit their own statement of the water district's financial affairs at the end of each fiscal year. As recommended in the Department's February 16, 1993 letter and the 1993 Watermaster Handbook, a copy of the financial statement may be submitted either with the annual water masters report or with the minutes of the annual meeting for the ensuing year. An example of an annual financial statement may be found in Appendix C of the 1993 Watermaster Handbook.

The purpose of this letter is to remind all water districts that workers compensation insurance is required for all water district employees. This requirement applies to all water districts in Idaho, regardless of annual budget. Insurance should be applicable at least to all paid water district staff, including the water master as week as well as watermaster assistants, advisory committee, secretary and treasurer. The costs associated with workers compensation insurance is paid directly by the water district and should be considered an expense of the district. For information about obtaining insurance costs etc., please contact the Idaho State Insurance Fund. The State Insurance Fund has offices in Boise, Coeur d'Alene, Idaho Falls, Pocatello and Twin Falls. Water Districts are also reminded that all paid water district staff may be subject to state and federal taxes. These tax requirements will vary depending on salaries and total income of each watermaster or employee. In many water districts, particularly smaller districts with part-time staff, payment of watermaster or each employee. Districts may wish to contact the State Tax Commission or the Internal Revenue Service for information about state and federal withholding taxes.

Sincerely,

Sharla Cox

Administrative Assistant

BEFORE THE DEPARTMENT OF WATER RESOURCES

OF THE STATE OF IDAHO

RECEIVED NOV 2 6 2018

Department of Water Resources Eastern Region

IN THE MATTER OF THE PROPOSED)	o opani
REVISION OF BOUNDARIES OF WATER	.)	
DISTRICT NO. 33, LITTLE LOST RIVER)	
AND TRIBUTARIES, TO INCLUDE)	NOTICE OF PUBLIC HEARING
GROUND WATER RIGHTS WITHIN)	
WATER DISTRICT NO. 33.)	
	_)	

The Director of the Idaho Department of Water Resources ("Department") is authorized to divide the state into water districts for the purpose of distributing water among appropriators under the laws of the State of Idaho. Idaho Code § 42-604 provides authority for the Director to create, revise the boundaries of, or abolish a water district or combine two (2) or more water districts.

NOTICE IS HEREBY GIVEN, pursuant to Idaho Code § 42-604, the Department will conduct a public hearing regarding the proposed revision of the boundaries of Water District No. 33 ("WD33") as follows:

<u>PUBLIC HEARING FOR PROPOSED REVISION OF BOUNDARIES OF WATER DISTRICT</u> NO. 33 TO INCLUDE GROUND WATER RIGHTS

Wednesday, December 12, 2018 6:30 PM Howe Community Center Highway 33 Howe, ID

The authority to revise or expand the boundaries of water districts applies to those streams, or other water sources including ground water, for which the priorities of appropriation have been adjudicated by court decree. The Little Lost River drainage boundary forms the boundaries of WD33 and the Department's Administrative Basin 33. Both surface water and ground water rights in the Little Lost River drainage area have been adjudicated by the Snake River Basin Adjudication ("SRBA") Court. The SRBA was completed on August 25, 2014.

The Director proposes to revise WD33, Little Lost River and tributaries, to include ground water rights within the boundaries of WD33, as shown on the attached map. The proposed water district revision shall include all ground water rights within the Little Lost River drainage area except for ground water domestic and stock water rights as defined under Idaho Code §§ 42-111 and 42-1401A (11).

The revised water district is required to properly administer the ground water uses and ground water rights within the Little Lost River drainage area. The water district is also needed to facilitate the measurement and reporting of ground water use diversions. Additionally, a portion of the Little Lost River drainage is included within the Eastern Snake Plain Aquifer ("ESPA") Model and the ESPA Ground Water Management Area ("ESPA GWMA"). Ground water in the Little Lost River drainage is hydraulically connected to the ESPA and the Snake River. The potential adoption of an ESPA GWMA management plan will affect ground water rights in the Little Lost River drainage overlapping the ESPA GWMA. Nearly all the ground water

rights in the ESPA GWMA are already included in a water district. Inclusion of ground water rights in the Little Lost River drainage will ensure that the rights are administered or managed in accordance with any future ESPA GWMA management plan. Moreover, some ground water rights in the Little Lost River drainage are injected into and re-diverted from the Little Lost River or tributary sources and are already regulated by WD33. Extending WD33 administration to all ground water rights in the Little Lost River drainage, as opposed to the creation of a separate water district for ground water rights, creates a more efficient administration and regulatory scheme.

Information and testimony presented at the hearing on December 12, 2018, will create a record upon which the Director will rely to determine whether the revision of the boundaries of WD33 is appropriate. It is important that holders of water rights understand the proposed action and participate in the hearing process. James Cefalo of the Department will serve as the hearing officer. Persons attending the hearing will be provided an opportunity to make an oral presentation regarding the proposed action. Written comments may be submitted to the hearing officer at the hearing or at any time prior to the close of the written comment period on December 24, 2018. Written comments not presented at the hearing should be sent to the Director, Department of Water Resources, PO Box 83720, Boise, Idaho, 83720-0098.

The Department will present information at the hearing about why it is proposing to revise the boundaries of WD33 to include ground water rights, a time frame for district formation and operation, and proposed water measurement requirements. The hearing will be held in accordance with the Department's Rules of Procedures (IDAPA 37.01.01). These rules may be viewed at the Idaho Department of Administration's website as follows: http://adminrules.idaho.gov/rules/current/37/0101.pdf

The hearing will be conducted in a facility that meets the accessibility requirements of the Americans with Disabilities Act. Should you require special accommodations in order to attend, participate in, or understand the hearing, please contact the Department at least five days prior to the hearing.

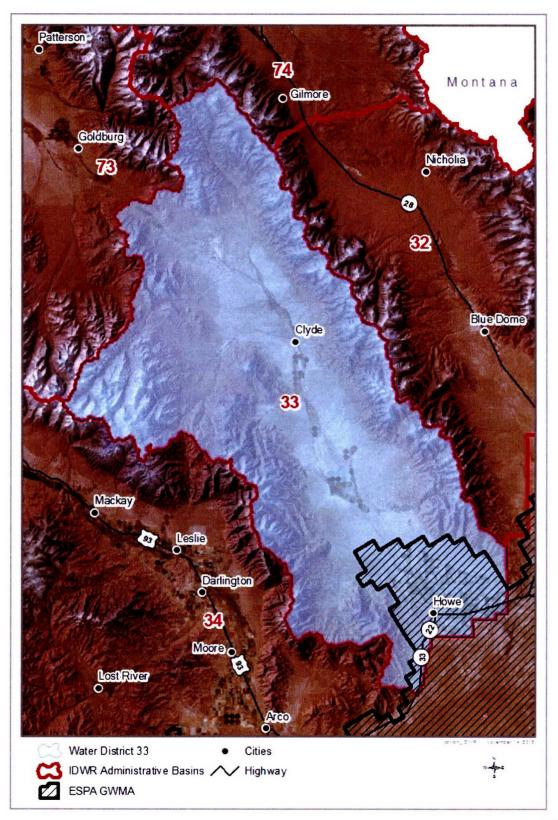

This notice of hearing has been sent to all surface water and ground water right holders of record in the boundaries of WD33, or the Little Lost River drainage area except ground water domestic and stock water rights defined under Idaho Code §§ 42-111 and 42-1401A (11), and surface water rights used for in-stream watering of livestock as defined by Idaho Code § 42-113.

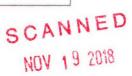

If you have questions concerning this notice, please call the Department's State Office at (208) 287-4800 or the regional office in Idaho Falls at (208) 525-7161.

RE: WATER DISTRICT #33

Dear Watermaster:

Your CERTIFICATE OF APPOINTMENT is enclosed herewith. You will, therefore, take charge of the waters of such district and distribute the same in accordance with the law and the decrees of the courts to the various users in such district in accordance with the terms and conditions of their respective rights, and perform such other duties as may be required by the Department of Water Resources, under the laws of the State of Idaho. You are hereby requested to assume your duties at once and continue thereat until the necessity therefore shall cease.

Please feel free to call upon this office whenever we can be of assistance to you. We have a personal interest in the success of your year's work and desire to keep in as close touch with you as conditions will permit.

Respectfully submitted.

Sharla Cox

RE: WATER DISTRICT #33

Dear Secretary / Treasurer:

We acknowledge receipt of the Minutes of the Annual Watermaster's Election Meeting held in your district. The Watermaster Certificate will be sent under separate cover.

Thank you.

Sincerely,

Sharla Cox

Administrative Assistant
