REMARKS

GUIDELINES FOR RECORDKEEPING

- Use the official daily record book. Do not use substitutes. If you prefer to record notes in another text, transcribe to the daily record book immediately.
- Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
- 3. If the water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or headgate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and headgate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
- 4. If the water being delivered is not actually measured, enter an "E" in the fraction portion of the grid space for the particular day that the flow rate is estimated. An "E" should always follow an estimated numerical flow that is observed and set in the field.
- 5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of nondelivery.
- A blank grid space means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
- 7. If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference.
- 8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream rightholders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.

REMARKS

GUIDELINES FOR RECORDKEEPING

- Use the official daily record book. Do not use substitutes. If you prefer to record notes in another text, transcribe to the daily record book immediately.
- Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
- 3. If the water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or headgate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and headgate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
- 4. If the water being delivered is not actually measured, enter an "E" in the fraction portion of the grid space for the particular day that the flow rate is estimated. An "E" should always follow an estimated numerical flow that is observed and set in the field.
- 5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of nondelivery.
- A blank grid space means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
- 7. If possible, please list the water right not in the dally record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference.
- 8. Record unusual or noteworthy happerdings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream rightholders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.

REMARKS

GUIDELINES FOR RECORDKEEPING

- Use the official daily record book. Do not use substitutes. If you prefer to record notes in another text, transcribe to the daily record book immediately.
- Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
- 3. If the water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or headgate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and headgate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
- 4. If the water being delivered is not actually measured, enter an "E" in the fraction portion of the grid space for the particular day that the flow rate is estimated. An "E" should always follow an estimated numerical flow that is observed and set in the field.
- 5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of nondelivery.
- A blank grid space means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
- 7. If possible, please list the water right no. in the daily record rather than a number assigned by the district of the decree. Future users of the records will likely look for a water right reference.
- 8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream rightholders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.

61-A Canyon Creek

Monday March 3, 2014

Open meeting at 2:30p.m.

Visitors- Calvin Ireland, Anita & Harold Fickle, Terry Seegrist, Bob Norstabon, Bob Horgan, Jack Cox, John Westra, Nick?

Read minutes from Last year

Old business- there was none

New Business- Terry asked that all water orders be called in, Terry also asked for a minimum of \$5.00Water bills for the 2015 season, it was voted on and approved,

Opened the floor for any new discussion, there was none

Election- Terry was voted for 2014 Watermaster, board of directors stayed the same

Closed meeting, 2:15p.m.

March 1, 2014

C. L. "BUTCH" OTTER Governor

> GARY SPACKMAN Director

Terry Seegrist 140 S. 3rd E Mountain Home, ID 83647

RE: Water District #61A Canyon Creek

Dear Terry Seegrist:

Enclosed is your Watermaster Certificate of Appointment.

You will take charge of the water of the district and distribute the same in accordance with the laws of Idaho and decrees of the courts. Distribution shall be in accordance with the terms and conditions of the user's respective rights, and as may be required by the Department of Water Resources. You should note that the enclosed Certificate of Appointment authorizes delivery of natural flow and also stored water pursuant to Section 42-801, Idaho Code.

Feel free to contact me at our Western Regional Office if you need assistance during the irrigation season, phone 334-2190.

Sincerely,

John Westra Western Region

Enclosure

State of Idaho Department of Water Resources

SCANNED APR 29 2015

Certificate of Appointment

This is to certify that I have on this day appointed	Terry Seegrist as W	VATERMASTER of
Water District 61A Canyon Creek for the 2014	IRRIGATION SEASON	or until his/her successor is
appointed and qualified under the provisions of Section	ons <u>42-605</u>	Idaho Code, at
such rate of compensation as established by applicable	le law.	

This certificate has been issued and the seal of the Director fixed at Boise, Idaho, this <u>lst</u> day of <u>March</u>, 20<u>14</u>

Director

SECTION 42-615, IDAHO CODE

PROPOSED BUDGET FOR SUCCEEDING YEAR. Each watermaster shall, at least fourteen (14) days prior to the annual meeting of the water users of the water district, also prepare a proposed budget for the succeeding year, together with a distribution of the amount of the budget to the respective water users, using the actual deliveries for the past irrigation season or seasons, as the basis for distribution. The proposed budget and distribution shall be submitted to the water users for consideration and approval at the next annual water meeting.

In conformity with the above statute, I hereby submit a Proposed Budget for $\frac{2014}{(YEAR)}$.

Terry Seegrist WATERMANTER

(This report must be forwarded to the Secretary of the last Annual Water User's Meeting of your District.)

			WA	TERMASTER'S PRO	POSED BUDGET				
NEXT YEAR	ANNUAL	646, 89						645. 89	

Complete this proposed budget report form as follows:

- 1) Enter water right holder name, corresponding IDWR water right number or numbers, and corresponding diversion name and/or remarks on page 2;
- 2) If you wish to estimate next season's assessments based on the average delivery of past seasons, then enter the actual water deliveries to each user for the past two to five seasons on page 3. You have the option of using at least the past two seasons or up to five seasons for averaging. You also have the option of using last year's delivery or one year's delivery as a basis of determining assessments for the next season. Enter deliveries as total 24-hour second feet is a flow rate expressed in terms of one day or 24 hours. For example, a continuous diversion of 2 cfs over 20 days would equal 40 24-hour second feet.
- 3) If using the averaging method, enter the average delivery for past seasons in column 6 of page 3. If you are not averaging, then enter each user's delivery from last year in column 5 and skip column 6.
- 4) In the work space provided at the top of this page, enter next year's proposed watermaster salary, secretary and/or staff salaries, and expenses. You may use the past season costs and expenses, or average past seasons' costs and expenses as an aid in determining next year's budget. A more detailed listing or itemization of expenses and salaries can be attached to this form.
- 5) Divide the total proposed budget amount for next year by the total past season delivery (total of column 5, page 3) or average past seasons deliveries (total of column 6, page 3) to obtain a unit cost factor.
- 6) Under column 7, page 3, multiply the unit cost factor by each user's past season or average past seasons deliveries to obtain the estimated billing for the next year.
- 7) Use column 8, page 3, to enter the adjusted billing amount if the district wishes to carryover debits and credits from the previous season. (Refer to the last watermaster report. If a user had a credit, subtract that credit from his or her estimated billing in column 7 of this report, and enter the difference or adjusted amount in column 8. If a user had a debit, then add that debit to his or her billing amount shown in column 7 and show as adjusted billing in column 8.
- 8) Sign the report and retain to present to the water users at the next annual meeting for the water district.
