322 East Front St, PO Box 83720, Boise, ID 83720-0098 • 208-287-4800 • www.idwr.idaho.gov

# Certificate of Appointment

This is to certify that I have appointed *Terry Seegrist* as *Watermaster* of Water District 61A, from this day until the 2017 annual meeting or until his/her successor is appointed and qualified under the provisions of Idaho Code Section 42-605, at such rate of compensation as established by applicable law.

This certificate has been issued and the seal of the Director fixed at Boise, Idaho, this day, June 27th . 20 16.

**IDWR Director** 

# State of Idaho DEPARTMENT OF WATER RESOURCES

Western Region, 2735 Airport Way . Boise, Idaho 83705-5082

Phone: (208) 334-2190 • Fax: (208) 334-2348 • Web Site: www.idwr.idaho.gov

C. L. "BUTCH" OTTER Governor GARY SPACKMAN Director

June 27, 2016

TERRY SEEGRIST 140 S. 3RD E MTN HOME ID 83647

Dear Mr. Seegrist,

Enclosed is your certificate of appointment as watermaster of Water District 61A Canyon Creek. Per Idaho Code Section 42-608(1), the watermaster's term of service "...is throughout the year, extending until the annual meeting for the ensuing year, or until a successor is appointed." Based on the code, the watermaster's appointment is from one annual meeting to the next, generally speaking.

Thank you for serving the State of Idaho and your community. Feel free to contact this office with any questions or concerns.

Sincerely,

Rachel Neely

Administrative Assistant

#### REMARKS

#### GUIDELINES FOR RECORDKEEPIN

- Use the official daily record book. Do not use substitutes. If you prefer to record notes in another text, transcribe to the daily record book immediately.
- Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
- 3. If the water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or headgate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and headgate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
- 4. If the water being delivered is not actually measured, enter an "E" in the fraction portion of the grid space for the particular day that the flow rate is estimated. An "E" should always follow an estimated numerical flow that is observed and set in the field.
- 5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of nondelivery.
- A blank grid space means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
- If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference.
- 8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream rightholders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.

#### REMARKS

#### **GUIDELINES FOR RECORDKEEPING**

- 1. Use the official daily record book. Do not use substitutes. If you prefer to record notes in another text, transcribe to the daily record book immediately.
- 2. Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
- 3. If the water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or headgate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and headgate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
- 4. If the water being delivered is not actually measured, enter an "E" in the fraction portion of the grid space for the particular day that the flow rate is estimated. An "E" should always follow an estimated numerical flow that is observed and set in the field.
- 5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied. and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of nondelivery.
- 6. A blank grid space means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
- 7. If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference.
- 8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream rightholders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.

#### REMARKS

#### GUIDELINES FOR RECORDKEEPING

- Use the official daily record book. Do not use substitutes. If you prefer to record notes in another text, transcribe to the daily record book immediately.
- Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
- 3. If the water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or headgate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and headgate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
- 4. If the water being delivered is not actually measured, enter an "E" in the fraction portion of the grid space for the particular day that the flow rate is estimated. An "E" should always follow an estimated numerical flow that is observed and set in the field.
- 5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of nondelivery.
- A blank grid space means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
- If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference.
- B. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream rightholders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.

#### REMARKS

#### GUIDELINES FOR RECORDKEEPING

- Use the official daily record book. Do not use substitutes. If you prefer to record notes in another text, transcribe to the daily record book immediately.
- Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
- 3. If the water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or headgate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and headgate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
- 4. If the water being delivered is not actually measured, enter an "E" in the fraction portion of the grid space for the particular day that the flow rate is estimated. An "E" should always follow an estimated numerical flow that is observed and set in the field.
- 5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of nondelivery.
- A blank grid space means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
- If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference.
- 8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream rightholders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.

#### SECTION 42-606 IDAHO CODE

REPORTS OF WATERMASTERS. All watermasters shall make an annual report to the department of water resources prior to the expiration of the watermaster's appointment for the current year. This report shall show the total amount of water delivered by the watermaster during the preceding year, the amount delivered to each water user, the total expense of delivery and the apportionment of expenses among users and all debits and credits to be carried over to the following year. Such report shall also include records of stream flow the watermaster used or made in the process of distributing water supplies. The director may ask for other information deemed necessary in assuring proper distribution of water supplies within the district. The reports of watermasters to the department of water resources shall be filed and kept in the office of the department.

#### Instructions For Completing Annual Watermaster's Report

This form has been developed to assist the watermaster in complying with some of the annual reporting requirements of Section 42-606, Idaho Code. The form provides for summary of the amount of water delivered by the watermaster to each user, the total expense of delivery and the apportionment of expenses among water users, including debits and credits. Water distribution and hydrologic information including stream flow records, daily diversion data, water right information and water right priority cut summaries should be presented in a separate water distribution report.

Complete this annual report form of delivery and costs as follows:

- 1) Enter water right holder name, corresponding IDWR water right number or numbers, and corresponding diversion name and/or remarks on page 2;
- 2) Enter the total amount of water delivered to each user as total 24-hour second feet under column 1, page 3. Total 24-hour second feet is a flow rate expressed in terms of one day or 24 hours. For example, a continuous diversion of 2 cfs over 20 days would equal 40 24-hour second feet.
- 3) Under column 3, page 3, enter the amount of money assessed or billed to each user at the beginning of the year. The assessment may be found in the previous year's adopted budget report.
- 4) In the work space provided on the right hand side of page 3, add up total watermaster salary costs and expenses and enter as 'TOTAL COST'. Then divide this total cost by the total number of 24-hour second feet delivered (sum of column 1) to obtain the cost per 24 hour second feet delivered, or the unit cost factor.
- 5) Under column 2, page 3, multiply the unit cost factor (obtained in step number 4 above) by each user's total 24-hour second feet delivery in column 1 to obtain the total cost against each user.
- 6) For each user, subtract the total cost amount in column 2 from the adopted budget in column 3 and enter the difference either as a credit or debit (negative differences entered as debits, positive differences entered as credits).
- 7) Sign the report before a notary public and submit the original to the appropriate regional office of the Department of Water Resources. Retain one copy for the Water District.

# Annual Water District Meeting Checklist

Water District Number and Name:

Per Idaho Code Title 42 Chapter 6 (Distribution of Water Among Appropriators), annual water district meetings must include (at a minimum) the actions listed below.

IDWR wants to ensure each water district is meeting these minimum standards. Please return this completed checklist to the appropriate IDWR regional office with the annual meeting minutes (this list does not replace meeting minutes) or ensure that all of these actions are clearly addressed in the meeting minutes.

61-A 200 pm Canyon Creek	APR 0 8 2016 WATER RESOURCES WESTERN REGION
Meeting Date:	
7 MARCH 2016	
☐ Election of meeting chairman and secretary ☐ Election of water district watermaster  — Election of water district assistant watermaster(s) (optional)  — Election of water district secretary/treasurer (optional) ☐ Approval of adopted budget ☐ Next year's meeting date, location, and time	
By signing below I verify that all required actions have been addressed at annual meeting	the water district
Completed by:    June   Seegut     Water District Representative	

RECEIVED

March 7, 2016
61-A Annual meeting,
Open meeting at 1:55p.m.
Visitors present, Terry Seegrist-Water master, Calvin Ireland-Board member, Patrick Kelly-I.D.W.R. Bob Norstabon- Board member, Jim Norstabon, Bob Horgan, Jack Cox, Anita Fickle-Board member, Howard Fickle, Kate Mink
Elect Board, talked about , voted to stay same.
Elect Water master, Bob N. nominated Terry, Jim N. seconded, vote was unanimous
Budget, adopted budget was approved, none against
Old business, Make sure you call water master before turning on
New Business. Hoffman/Wartham water dispute was discussed at length, Patrick Kelly thought that from the testimony he heard that maybe Wartham did not have an easement, He would talk to Nick Miller, Terry will wait for call from Nick on delivery of Wartham water,
Close meeting at 2:20 p.m.

C.L. "BUTCH" OTTER Governor

GARY SPACKMAN

Director

January 19, 2016

TERRY SEEGRIST 140 S. 3<sup>RD</sup> E MTN HOME ID 83647

Dear Water District Secretary or Watermaster,

Enclosed are several documents related to the annual water district meeting.

- 1) Information form to provide the Idaho Department of Water Resources (IDWR) the date, time, and location of the next annual water district meeting. Please complete the meeting information form and return it to IDWR. Upon receipt of the completed form, IDWR will send a meeting notice to each water user and interested party in the district. Meeting notices must be mailed no later than three weeks before to the meeting date. Therefore, to provide IDWR adequate time to create and mail the notices, please return the completed form to IDWR as soon as possible or at least four weeks before the meeting dates.
- 2) **List of water right owners within your district.** Look over the list and mark any name or address changes or additions. An accurate review of the list will ensure all users and interested parties are informed of the meeting. Return the corrected list with the completed meeting information form.
- 3) **Annual Meeting Checklist.** Per Idaho Code Title 42 Chapter 6 (Distribution of Water Among Appropriators), annual water district meetings must include (at a minimum) the actions outlined on the checklist. Fill out this form during the meeting and return with the meeting minutes or ensure your meeting minutes describe each of these actions.

If you are no longer the water district secretary or watermaster, please forward this to the current secretary or watermaster or return this correspondence to IDWR as soon as possible.

If you or water users have any questions or concerns about the annual water district meeting or ownership/address changes, please contact Rachel Neely at (208)334-2190 or Rachel.Neely@idwr.idaho.gov.

Sincerely,

Rachel Neely

Administrative Assistant
