REMARKS

#### **GUIDELINES FOR RECORDKEEPING**

- Use the official daily record book. Do not use substitutes. If you prefer to record notes in another text, transcribe to the daily record book immediately.
- Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
- 3. If the water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or headgate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and headgate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
- 4. If the water being delivered is not actually measured, enter an "E" in the fraction portion of the grid space for the particular day that the flow rate is estimated. An "E" should always follow an estimated numerical flow that is observed and set in the field.
- 5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of nondelivery.
- 6. A blank grid space means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
- If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference.
- 8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream rightholders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.

REMARKS

#### **GUIDELINES FOR RECORDKEEPING**

- 1. Use the official daily record book. Do not use substitutes. If you prefer to record notes in another text, transcribe to the daily record book immediately.
- Use a separate daily record book for each stream you administer. Do not mix the users of several streams into one daily record.
- 3. If the water being delivered is measured and the headgate set on a particular day, record the flow in cubic feet per second in the proper grid space. If water diverted at a particular diversion is not measured on a given day, but you believe that water continues to be delivered without a change in the flow or headgate setting, place an "A" in the grid space for that day. The "A" represents that the previous flow and headgate setting is "assumed." An "A" must always be preceded by an actual numerical flow rate.
- 4. If the water being delivered is not actually measured, enter an "E" in the fraction portion of the grid space for the particular day that the flow rate is estimated. An "E" should always follow an estimated numerical flow that is observed and set in the field.
- 5. If water is not being delivered, enter a "0" (zero) in the proper grid space. If the water right is cut off because of unavailability of water, a zero may be entered in the grid space corresponding to the day the right could no longer be satisfied, and all subsequent days when water is not deliverable may be designated with a horizontal line through the grids that represent the days of nondelivery.
- 6. A blank grid space means that the watermaster has no knowledge of the amount of water being delivered on that day. A grid should never be blank while the watermaster is delivering water.
- If possible, please list the water right no. in the daily record rather than a number assigned by the district or by the decree. Future users of the records will likely look for a water right reference.
- 8. Record unusual or noteworthy happenings. For instance, if a senior downstream right holder's water right is no longer available because the creek dries up upstream, and junior upstream rightholders are allowed to divert remaining water upstream, this event should be recorded on the day it happens.

#### RE: 2014 Watermaster Report- 65-K Lake Fork Water District

Dear Secretary & Watermaster:

Enclosed are copies of the Watermaster's Annual Report for the 2014 irrigation season. The report has been approved by this Department in conformity with Idaho Code Sections 42-610 thru 42-615. **The Watermaster should be compensated for services conforming to the report.** 

Feel free to contact me if you have any questions, phone 208-334-2190.

Sincerely, Jennifer Strange

Office Specialist II

#### **RE: Proposed Moss Irrigation Pond**

Dear Mr. Larrondo:

Thank you for your letter of May 8<sup>th</sup> regarding the proposed pond on the Moss property. Our office has reviewed your proposal and forward the following comments and matters that need to be addressed:

The Lake Fork Creek and tributaries are over appropriated; that is water right allocations far exceed the water available in the creek, see right summary. Because of the shortage, junior priority date natural flow water rights are curtailed annually to prevent injury to senior right holders. The water delivered by the Lake Irrigation District (Little Payette Lake) and the Water district Rental Pool provides supplemental water to shareholders to compensate for the shortage.

The shallow groundwater in the proposed pond location is a direct tributary and considered Lake Fork Creek water. A pond excavation exposing shallow groundwater would be viewed as a creek diversion and new beneficial use of water. The water rights held by your client do not authorize the storage of water; therefore, a new storage water right is required.. A new storage appropriation would require the applicant submit convincing evidence and data to show that injury would not be caused to right holders. This is not likely as junior priority creek right holders already face annual curtailed due to lack of creek natural flow.

If the irrigation pumping capacity exceeds the ability of the conveyance ditch to deliver the quantity of water required, a small regulation/pumping pond can be part of the irrigation system. Yes, it is acceptable to irrigate portions of the parcel by gravity/flood irrigation. However due to the proposed location, the following must addressed:

- -The pond excavation <u>cannot</u> expose/encounter shallow groundwater. The map enclosed indicates there may already be standing water near the proposed pond location. This would be prohibitive.
- -Water stored in the pond would have to come from diversions under your water rights and district shares.
- The pond would have to be actively used for regulation/pumping only during the irrigation season. It could not be refilled from 09/01 to 04/01.

Page 2. Crestline

-Water would have to be diverted out of the West Side Ditch into the pond. The ditch cannot flow through the pond.

-Determined the pond site location in not classified as a wetland-Corps of Engineers.

- Present the pond need and specifications to the Lake Fork Water District Watermaster and West Fork Ditch waterusers for comments and approval.

Should you have questions, please contact me at the Western Regional Office, phone 334-2190.

Sincerely,

Uchn Westra, Manager

Idaho Department of Water Resources Attn: John Westra 2735 Airport Way Boise, ID 83705

## Subject: Confirmation regarding Proposed Regulation Pond for Irrigation in Lake Fork, Idaho

Dear John,

This letter is a written request for confirmation regarding a phone conversation that we had in April, 2014 about a proposed regulation pond for irrigation in Lake Fork, Idaho that is scheduled to proceed in the upcoming weeks. Below I have outlined the proposed project and our understanding of the project. If you would respond to this letter with a small confirmation response of our understanding of the permitting requirements of the project either in e-mail or on paper, we and our client would be grateful.

The proposed regulation pond for irrigation is located at 65 Elk Haven Lane, Lake Fork, Idaho on parcel no. RP17N03E145855 and is owned by Shawn and Trina Moss. This parcel is approximately 39 acres and has a water right (no. 65-22967) of 0.79 cfs to be used for irrigation. The Mosses also own the adjacent parcel (RP17N03E157655) of approximately 74.5 acres that has a water right (no. 65-22969) of 1.12 cfs to be used for irrigation. The legal description for the project is the SW 1/4 of Section 14 and the SE 1/4 of Section 15, T.17N, R.3E., BM, Valley County, Idaho.

Attached with this letter is a print-out from the Idaho Department of Water Resources website showing the referenced water rights. The print out does not reflect the current ownership but it has been communicated to Crestline Engineers, Inc. that the Mosses have filed paperwork for the change in ownership of the water rights.

Historically, the properties have been flood irrigated from the West Side Lake Fork Ditch. The proposed project is to dig a regulation pond on the edge of an existing area of high ground water and irrigate the properties by a pumped system necessary but also have the option to irrigate using the current flood irrigation system. Drawings attached with this letter show the intent of the project and are provided for your records.

Based on conversations Crestline Engineers has had with you regarding this project, the proposed pond cannot have a footprint larger than 10,000 S.F. (equivalent to 100'x100'). It is our understanding that a pond larger than 10,000 S.F. would require a new water right, that would likely be denied, to account for evaporation lost by the pond.

As we understand it, approval/notification is not required to build the 10,000 S.F. regulation pond but we are hoping to receive confirmation from you about our understanding of the project.

1 -

Please reply to this letter with a short letter or e-mail acknowledging the project and that our understanding of the project is correct and that it is allowed and/or what additional steps must be taken to proceed.

If you have any questions regarding this project or would like additional information please contact Sam Larrondo of Crestline Engineers, Inc. by phone ((208) 634-4140) or e-mail (slarrondo@crestline-eng.com).

Respectfully submitted by,

Crestline Engineers, Inc.

Sam Larrondo, E.I.T. Associate Engineer

#### WATER DISTRICT NO. 65-K Minutes, Annual Meeting March 3, 2014

RECEIVED APR 2 5 2014 WATER RESOURCES WESTERN REGION

The annual meeting of Water District No. 65-K was held on March 3, 2014 at 1:00p.m.at the Donnelly Bible Church in Donnelly, Idaho.

The following were present: Harry Bettis, Laura Bettis, John Leedom, Justin Florence, Wendell Platt, Will Maki, John Hickcock, Donna Steiber, and Shirley Florence.

The meeting was called to order by Harry Bettis. Justin Florence made a motion to appoint Harry Bettis as chairman for the meeting. Will 2<sup>nd</sup> the motion. Motion carried. Shirley Florence was reappointed as secretary-treasurer for the year.

The following business was transacted:

1. The minutes of the March 4, 2013 meeting were read. Laura made a motion to approve the minutes. Justin  $2^{nd}$  it and the motion passed.

2. The financial report was presented. The balance on hand is \$7774.29 (report attached).

3. The water master's proposed budget for the year 2014 was presented. The amount proposed is 5598.00. Will made a motion to approve the budget as presented. Justin  $2^{nd}$  it and the motion carried.

4. Art made a motion to increase the water master's wage at \$47.50 a day. Harry  $2^{nd}$  it and the motion carried.

5. Laura read the following resolution pertaining to the collection of water user fees as set by the budget:

• "The water users of Water District No. 65-K do hereby resolve: that no ditch or canal company, or other water user shall have the right to demand and receive water, and the water master shall not deliver to such water user, until the amount due and payable from such user, as set forth by the budget, has been paid."

John motioned to accept the resolution. It was seconded and the motion passed.

6. Harry nominated John Leedom as watermaster for the coming year. The motion was  $2^{nd}$  by Justin. John was elected by unanimous vote.

7. Chairman Bettis appointed the following to the advisory committee: Justin Florence, Will Maki, and Harry Bettis.

SCANNED

SCANNED MAY 0 8 2015 8. Report for the 65-K Rental Pool: 315.87 acre feet of water was rented out. (report attached) There is an accumulated balance of \$2916.00 in the rental pool account.

9. With no further business, Justin motioned to adjourn the meeting. It was seconded and the motion carried. The meeting adjourned at 1:35p.m.

Respectfully Submitted

Shirly Hounce Shirley Florence

Secretary

March 1, 2014

John Leedom 370 Knights RD McCall, ID 83638

RE: Water District #65K Lake Fork Creek

Dear Mr. Leedom:

Enclosed is your Watermaster Certificate of Appointment.

You will take charge of the water of the district and distribute the same in accordance with the laws of Idaho and decrees of the courts. Distribution shall be in accordance with the terms and conditions of the user's respective rights, and as may be required by the Department of Water Resources. You should note that the enclosed Certificate of Appointment authorizes delivery of natural flow and also stored water pursuant to Section 42-801, Idaho Code.

Feel free to contact me at our Western Regional Office if you need assistance during the irrigation season, phone 334-2190.

Sincerely,

John Westra Western Region
