Mr. Ronald D. Carlson
1515 Lincoln Road
Idaho Falls, Idaho 83401

Dear Watermaster:

In accordance with Chapter 6, Section 42-614 of the Idaho Code, and department regulations, the watermaster of each district is required to submit an annual report in TRIPLICATE for each county served, to the Department of Water Resources. The department will forward one copy to the County Treasurer, another copy will be sent to the secretary of the water district, and the third copy will be retained in the files of the Department of Water Resources. Please be certain all of the report is complete.

In accordance with Chapter 6, Section 42-615 of the Idaho Code, and department regulations, the watermaster is required to submit a watermaster's Proposed Budget. The budget is to be made up from the deliveries for the past irrigation season or seasons. This budget must be made in DUPLICATE for each county served, and ALL copies forwarded to the Department of Water Resources.

We are enclosing sufficient forms for making out the Watermaster's Report and the Proposed Budget.

Do not fail to send the Watermaster's Daily Record Books along with the report and budget.

Very truly yours,

LOY H. JOHNSON
Senior Resource Agent

Re: Rental of Water - Water District No. 1 Upper
Snake River Basin

Gentlemen:

Les Saunders, Chairman of the Committee of Nine, and Bill Watt have advised me of the recent discussions held by the Committee of Nine concerning the lease of water in the Upper Snake River Basin in certain years by the so-called "pool committee". While I recognize that this committee operates through the cooperative efforts of the users who wish to make their water available for lease, the Bureau of Reclamation, and the Water District, I became concerned this year when it was called to my attention that the Rental Committee had received a letter from the attorney for the J. R. Simplot Company (which owns Glen Dale Ranches south of the Milner Low Lift Irrigation District tract) that he took the position that the Company had a continuing right to the use of the water, presumably under Article XV, Section 4 of the Idaho Constitution.

As you know, we employed Professor Doug Grant of the University of Idaho, College of Law in our office last year. As a part of our continuing relationship, I asked him to research the question. I supplied him with a copy of the Committee of Nine minutes and specifically Resolution No. 9. I further made available to him the proposed agreement that Ron Carlson, the Watermaster, had worked out for those seeking to lease water in subsequent years. Doug also had a copy of the letter received from Simplot's lawyer.

P.

Page 2
September 7, 1978

He has prepared a memorandum, a copy of which I enclose. Essentially, he concludes that the Article XV, Section 4 argument is finessed by the fact that the lease has been only of surplus water.

One reason for writing today is to encourage a slightly more sophisticated approach toward the lease of surplus storage water in subsequent years. While I recognize that Ron Carlson's draft of a letter may well cover the situation, obviously we should not have delivered in 1978 to Glen Dale Farms when their lawyer crossed out the portion of the rental agreement which attempts to specifically set out a waiver of any right to future deliveries.

It seems to me that we should probably have a session of those concerned to work out a particular agreement. Some other considerations that we may be thinking about should include as follows:

1. Can storage water from a federal reservoir be utilized on land other than the lands irrigated at the time of the Palisades Contract and to which the water was subsequently decreed?
2. Does the use of water from any reservoir in the Upper Snake River Basin invoke the application of the 160 Acre Regulations in December of 1979 when they are made effective?
3. Should not the charge for rental water be increased to what is anticipated to be the acre foot charge for American Falls water for the 1979 season, even if bonds have not yet then been sold? There is some general reclamation law that indicates that one cannot profiteer on the sale of water in a federal reservoir. On the other hand, I think we should thoroughly research whether or not the annual lease of surplus water falls within the parameter of this rule. A substantial administrative charge should be included.

I recognize that the drought year created some problems concerning the lease of water. Perhaps some things were done that were slightly beyond what would be better for all concerned. Perhaps we should re-think this total question and eliminate any bugs that may exist.

P.

Page 3
September 7, 1978

It seems to me that the district may indirectly have a hammer with the Glen Dale Farms situation if their counsel persists in fighting the waiver matter. All of the water supplied to Glen Dale Farms must be pumped through the Milner Low Lift system and that district has a short-term agreement to supply the water. I am sure if enough pressure were brought to bear on the Milner Low Lift Irrigation people, they would be willing to help us assert a position of clout.

Thank you for your consideration of this letter. To avoid confusion, I think that we should leave it to Steve Allred to organize through Ron Carlson the meeting at which we might discuss these matters and come up with an acceptable agreement for use in future years.

Sincerely,

JOHN A. ROSHOLT

Permanent File

Dear Steve:

The Bureau of Reclamation's proposed guidelines for "Rental of Storage Water - Minidoka Project" were discussed at the Committee of Nine meeting held in Idaho Falls, Idaho, August 30, 1978.

They are as follows:

1. Water will be committed for rental on a voluntary basis and in writing.
2. All requests for rental of water will be in writing and forms will stipulate that this is on a temporary and annual basis without in any way establishing a permanent water right.
3. All lands for which rental water is requested, shall have a bona fide water right from the State of Idaho and the rental water will be only a supplemental supply.
4. All those requesting water on a rental basis shall comply with the Federal Reclamation Laws and regulations issued pursuant thereto.
5. All requests for water rental shall comply with these guidelines before water may be delivered to the requesting party.

After some discussion, it was agreed that I should submit the above proposed guidelines to your office for consideration.

We in turn would appreciate having your comments and an outline of any proposals you may have to develop a workable rental package for next irrigation season.

P.

We would welcome a meeting with you and your staff at your convenience and will await your reply.

Sincerely yours,

A handwritten signature in cursive script that reads "Carlos C. Randolph".

Re: Dedication of Leased Water Under Article 15, Section 4

Date: August 15, 1978

FACTS

Some irrigation district and canal company water contracts with the Bureau of Reclamation on the Minidoka Project are for supplemental water. That is, the stored project water supplements direct flow or other rights of the district or company. In years of ample precipitation the districts and companies do not need all of the supplemental water covered by their contracts.

For years the surplus water has been leased to others. The leasing program is administered under the auspices of Water District No. 1. For the current year the watermaster has drafted a letter to lease applicants which reads in part as follows:

"As you are aware, storage water has traditionally been made available upon a year-to-year basis. Many people have, over the years, become dependent upon rentals as their sole water supply. Unfortunately, no water right or priority has ever been established which can be recognized in delivering rental waters.

". . . you should be aware that any agreement to rent water during 1978 does not represent any commitment to provide you with rental water in the future."

Similarly, a document for the 1978 irrigation season entitled

P

"Rental Agreement" which is to be signed by the lessee states in part: "I understand that present and past use of rental storage water does not establish any water right or assure me of future water right deliveries." Whether such disclaimers about future water delivery have been communicated to lessees since the commencement of leasing is not known, but I understand the practice is probably of recent vintage.

The watermaster is aided in making water rental policy decisions by a storage pool committee appointed by the chairman of the Committee of Nine. The storage pool committee is usually made up of the watermaster, one member of the Committee of Nine, and the Superintendent of the Minidoka Project.

ISSUE

Do lessees have a perpetual right to receive water upon the ground that it has been dedicated to their use under Idaho Constitution article 15, section 4 or any other ground?

CONCLUSIONS

1. A dedication under article 15, section 4 is only of the character of the water supplied. The surplus water leased for agricultural use probably is dedicated to that use, but the dedication would be only of surplus water. In a year in which there is no surplus, article 15, section 4 would not give a lessee of surplus water any right to water.

2. Because of its trust responsibilities to landowners within its boundaries, an irrigation district lacks power to commit water needed within the district for use outside the district. Thus, an attempt by an irrigation district to lease non-surplus water for use outside the district would be ultra vires and void.

3. There is a difference between an actual constitutional dedication and estoppel to challenge water deliveries outside an irrigation district. Even though a district may have no power to commit non-surplus water to users outside its boundaries, a district and its members may become estopped to deny water to users outside district boundaries--- at least if the district has functioned in the nature of a mutual company in supplying users outside its boundaries.

4. If lessees of Minidoka Project water have been led justifiably to believe that their leases entitle them to water without regard to whether the irrigation districts and canal companies with Bureau contracts have a surplus, it is possible that the districts and companies may be estopped to assert the contrary. Estoppel would require the passage of a long period of time, such as 20 years, as well as substantial investment by lessees in reliance. If disclaimers of continuing delivery contained in the 1978 leasing documents have been used for a number of years, the possibility of estoppel should be foreclosed. Even if such disclaimers are new, lessees might well have difficulty in proving the facts

necessary for a claim of estoppel.

CONSTITUTIONAL PROVISIONS

Article 15, section 4: "Whenever any waters have been, or shall be, appropriated or used for agricultural purposes, under a sale, rental, or distribution thereof, such sale, rental, or distribution shall be deemed an exclusive dedication to such use; and whenever such waters so dedicated shall have been once sold, rented or distributed to any person who has settled upon or improved land for agricultural purposes with the view of receiving the benefit of such water under such dedication, such person, his heirs, executors, administrators, successors, or assigns, shall not thereafter, without his consent, be deprived of the annual use of the same, when needed for domestic purposes, or to irrigate the land so settled upon or improved, upon payment therefor, and compliance with such equitable terms and conditions as to the quantity used and times of use, as may be prescribed by law."

Idaho Code § 42-914 is a statutory enactment of essentially the same language.

Article 15, section 5: " Whenever more than one person has settled upon, or improved land with the view of receiving water for agricultural purposes, under a sale, rental, or distribution thereof, as in the last preceding section of this article provided, as among such persons, priority in time shall give superiority of right to the use of such water in the numerical order of such settlements or improvements; but whenever the supply of such water shall not be sufficient to meet the demands of all those desiring to use the same, such priority of right shall be subject to such reasonable limitations as to the quantity of water used and times of use as the legislature, having due regard both to such priority of right and the necessities of those subsequent in time of settlement or improvement, may by law prescribe."

DISCUSSION

A. Constitutional Dedication

In Niday v. Barker, 16 Idaho 73, 101 P. 254 (1909), the Court held that the plaintiff's rental of water for two and one-half years for irrigation of his land resulted in a dedication of such water for use on his land. The Court hastened to explain the meaning of an article 15, section 4 dedication, however:

"In this connection it should be remembered that a dedication within the purview of the constitution is commensurate only with the character and kind of the waters dedicated and the use and regularity of the use to which they were applied. If the waters received and used and applied by a subsequent settler and claimant were a part of the waters included within the appropriation of prior claimants and were merely waters they were not, for the time, claiming or using, then the dedication and right to the subsequent use thereof would only go to such waters, and would merely constitute a claim for the use of such waters as are not needed or applied by prior consumers at any given time during any subsequent season. It is true that it will become a somewhat indefinite and uncertain right, and yet it will be a fixed right to the particular class of waters." 16 Idaho at 79. (Emphasis added.)

Thus, the article 15, section 4 guarantee of "annual use" operates only to the extent that water of the character dedicated is available in a given year.

Niday v. Barker states the basic rule governing the rights of lessees of Minidoka Project water. If they leased only surplus water not needed by entities with regular Bureau contracts in a given year, then the dedication is only of surplus water. They would not be entitled to water when, because of lack of precipitation or other cause of shortage, the irrigation districts and canal companies with Bureau contracts for supplemental water do not have a surplus.

In rejecting an argument by the defendant irrigation district in Niday v. Barker that it lacked enough water to continue to supply the plaintiff, who was situated at the end of the district's delivery system, the Court stated a presumption.

"It is not likely that prior claimants to waters of the canal system who are entitled to receive and use water therefrom have allowed water to be carried past them from year to year, and on down to the extreme end of the canal system and there delivered to a subsequent settler and user. The very fact that water was carried past all other appropriators along the line of the canal and down to the very last settler at the extreme end of the system raises a prima facie presumption that there was sufficient water for this purpose left over after all other users and consumers had been supplied." 16 Idaho at 78.

In assessing possible application of this presumption to Minidoka Project water, it seems unlikely that many lessees would be physically situated analogous to the plaintiff in Niday v. Barker. More importantly, when the water under lease is supplemental water which is not likely to be fully needed by the contracting irrigation districts and canal companies regularly, there would seem to be much less factual basis for applying a presumption. Finally, even if there were a presumption, the Court's use of the term "prima facie" indicates it would be rebuttable rather than conclusive.

B. Estoppel

Niday v. Barker states the fundamental rule which should govern the present situation at least as to lessees who understood all along that they were leasing merely surplus water.

As to any lessees who were led to understand they were getting something more than that (if there are any), the situation is more complex and involves a series of cases: Yaden v. Gem Irrigation Dist., 37 Idaho 300, 216 P. 250 (1923); Bradshaw v. Milner Low Lift Irrigation Dist., 85 Idaho 528, 381 P.2d 440 (1963); Jensen v. Boise-Kuna Irrigation Dist., 75 Idaho 133, 269 P.2d 755 (1954); and Jones v. Big Lost River Irrigation Dist., 93 Idaho 227, 459 P.2d 1009 (1969).

These cases establish that once water has been used on irrigation district land, it becomes dedicated to use on that land; and any attempt by the directors of the district to obligate such water for use on land outside the district during times when it is needed within the district is ultra vires and void. When the facts of Yaden are read with discussion of that case in Bradshaw, it would appear that the dedication occurs (and the ultra vires limitation arises) as soon as the district acquires the water right, i.e., even before the complete supply of water has been fully utilized on lands within the district. Perhaps the rationale for this is that district lands become subject to assessment for the cost of storing the water even before the full water right is actually used on them. At any rate, the result in the present case should be that it would be ultra vires for an irrigation district (or canal company) with a Minidoka Project contract for supplemental water to make a commitment or lead a lessee to believe he has a commitment to receive

water at times when it is needed within district boundaries (or by canal company shareholders).

The complication comes in determining whether the district and its landowners might be estopped to raise the ultra vires point against a lessee who has regularly received water under an expectation that he will continue to do so without regard to whether the district has a surplus. Yaden says:

"The waters were originally appropriated and the systems constructed to apply water to land owners within the boundaries of the district and all persons dealing with the directors or officers of the district are bound to take notice of the various enactments conferring authority upon the directors or officers of the district and the limitation of their powers. The delivery of water by the directors or officers of an irrigation district to exterior lands would simply be an act ultra vires, except in such cases where the district acquired the system burdened with the duty to deliver water without its boundaries, or in case of surplus water." 37 Idaho at 310.

The statement that lessees are on notice of the limitations upon the leasing powers of irrigation districts cuts against estoppel on the ground that no lessee could have a justifiable expectation of receiving non-surplus water.

The Jensen case is even stronger:

"It follows that any water owned by the district and thus dedicated to the irrigation of lands within the district, cannot be supplied to lands outside the district so long as it is needed for the proper irrigation of lands within the district. The officers of the district have no power to contract for the delivery or supplying of such water for use outside the district. Any contract attempting to create or impose an obligation on the district to supply or make available any such water for any such purpose

is ultra vires and void. It also follows that any attempt by the directors of the district to create such an obligation cannot be made the basis of estoppel against the district. Otherwise, the will and purpose of the legislature, and the public policy established by its dedication of such water to the lands within the district, could be defeated by ill-advised contracts of the directors." 75 Idaho at 141-42 (dictum).

The Yaden and Jensen statements about estoppel are clouded by the Jones case, however. Jones was a suit by persons outside an irrigation district against the district for failure to deliver water during a dry year. The Court, in reviewing the evidence, characterized the district as "primarily an irrigation district" with "some additional duties which cause it to function as a ditch company." 93 Idaho at 228. The Court denied the plaintiffs' claim. First the Court relied upon the Yaden ultra vires theory and said the district had no duty to supply water to the plaintiffs when it was needed for lands within district boundaries. Then the Court took up the plaintiffs' argument that the district was estopped to discontinue water delivery because it had functioned as a mutual ditch company and delivered water outside the boundaries of the district for many years. The plaintiffs relied upon Johnson v. Strong Arm Reservoir Irrigation Dist., 82 Idaho 478, 356 P.2d 67 (1960) and Hillcrest Irrigation Dist. v. Nampa & Meridian Irrigation Dist., 57 Idaho 403, 66 P.2d 115 (1937).

The Court made two responses: (1) "The doctrine of estoppel does not apply to use of surplus or waste water.

Jensen v. Boise-Kuna Irr. Dist., supra." 93 Idaho at 230.

(2) The two estoppel cases cited by the plaintiffs were distinguishable, said the Court, because in both the irrigation districts had functioned as mutual ditch companies for over 20 years, while the plaintiffs had received water only for three and one-half years. A possible implication, however, is that estoppel might operate if a longer period had passed.

Turning to the two cases argued by the plaintiffs in Jones, the Hillcrest case involved estoppel but not estoppel of an irrigation district or its members to raise an ultra vires claim against exterior landowners. The Johnson case did involve estoppel of district members to make such an ultra vires claim. However, the counsel in Johnson agreed that the district had failed to function in accordance with the law governing irrigation districts. The Court said its practices tended more toward those of a mutual ditch company. It had sold shares of water stock to persons outside district boundaries. The Court did not even mention the anti-estoppel language in the Jensen case decided six years earlier. Arguably at least Johnson and Jensen can be reconciled on the ground that estoppel to raise the ultra vires limitation is available only when an irrigation district has functioned as a mutual ditch company. (The plaintiffs' argument in the later Jones case was cast in terms of estoppel

of an irrigation district which "has functioned as a mutual ditch company." 93 Idaho at 230.) The cases do not define the characteristics of such functioning. However, it may involve the issuance of stock (as distinguished from the giving of a lease). Presumably it should involve use of the physical facilities of the district to deliver water to users outside its boundaries. If so, it seems unlikely that many lessees could qualify for the protection of estoppel.

There are further factual obstacles to operation of estoppel in the present situation. First, if statements of disclaimer of continued supply like those used in 1978 leasing papers have been made over the years, no lessee could make a case of justifiable expectation of receiving water without regard to whether there is a surplus. Second, the 1978 rental agreement states: "I understand that present and past use of rental storage does not establish any water right or assure me of future water deliveries." Even if such language has not been used over the years, a lessee who assents to it in 1978 might be deemed to waive any claim of estoppel he might otherwise have. Arguably this would not involve waiver of a constitutional right but only waiver of a claim of estoppel, since an irrigation district lacks power to make an actual article 15, section 4 dedication of non-surplus water to exterior lands. The limitations on the waiver possibility are that some lessees may cross out the disclaimer when signing a lease and others may claim coercion

because of threatened loss of even surplus water if they did not sign. Third, arguably under the Yaden statement that people who deal with an irrigation district are bound to know its limitations, no lessee can claim a justifiable expectation of continuous supply without regard to whether there is surplus water. Fourth, if water was not supplied to lessees in a dry year for lack of any surplus and the lessees did not object at that time, this would be circumstantial evidence that they in fact understood their rights were limited to surplus water.

C. Miscellaneous

1. I have assumed that the irrigation districts and canal companies with Bureau contracts would be treated as the actual lessors of water, even though the leasing program is not actually administered by them. I am not sure who ultimately receives the lease rental payments. If they are not credited to the irrigation districts and canal companies, perhaps that would affect the analysis.

2. It is conceivable that some of the above conclusions under state law could be preempted because of inconsistency with a dominant federal policy. Since my attention has not been called to any particular potential federal-state conflict, however, I have not analyzed this issue at this time. I would only note in passing that the recent decision in California v. U.S., 98 S.Ct. 2985 (1978), seems to

allow assertion of state policy regarding surplus water on federal projects absent inconsistency with fairly explicit congressional directive.

3. If the lessees have a continuing right only to surplus water and there is enough surplus for some but not all regular lessees, there is the question of how to determine which of them get water. Since I am not aware of any controversy over this particular issue (I expect a settled practice has developed), I have not researched it specifically. Again, in passing I note that article 15, section 5 provides priority in time gives superiority of right subject to regulation by the legislature as to the quantity of water used and times of use, with due regard to priority of right and the necessities of those subsequent in time. If some lessees have been able to obtain their own permits or licenses (or decreed rights) for the leased water and others have not, it is at least arguable that the provisions of Idaho Code § 42-607 would have to be followed by the watermaster. This section, of course, calls for distribution to the holders of decreed, permit or licensed rights ahead of users lacking such documentation.

4. Arguably there is ambiguity in the statement of the 1978 letter to lease applicants: "any agreement to rent water during 1978 does not represent any commitment to provide you with rental water in the future." Does this mean there is no commitment even though plenty surplus water is available in the future? Or does it mean only that there is no commitment

that surplus water will be available?

5. There is some question about whether even clear language of disclaimer could avoid an article 15, section 4 dedication of surplus water (to the extent surplus should be available in the future). The sentence after the semicolon in that section seems to require that a person receive water with a particular "view" in order to have the water dedicated to his use. Is it enough if his expectation is to receive water for agricultural use under a sale, rental, or distribution thereof (which under the literal language before the semicolon automatically becomes dedicated to agricultural use) or must he have an expectation of receiving water annually before the section 4 guarantee of water becomes operative?

There is no definitive answer, although there are some indications that an expectation of continued supply is necessary. The syllabus by the court in Wilterding v. Green, 4 Idaho 773, 45 P. 134 (1896), indicates that; but there does not seem to be comparable language in the opinion proper. Also, explanation of article 15, section 4 at the constitutional convention by its president, a Mr. Claggett, indicates a purpose to protect people who have settled on land under a promise of receiving water supply. 2 Idaho Constitutional Convention 1178, see also Mellen v. Great Western Beet Sugar Co., 21 Idaho 353, 122 P. 30 (1912) (suggesting Claggett's views are entitled to weight in inter-

preting the section). However, as a matter of strict logic Claggett's statement would not necessarily preclude broader application of article 15, section 4.

6. If lessees have a right to water only when there is a surplus (which should be the case absent estoppel), the Yaden case, supra, may be significant for what it says about determining whether there is a surplus. The district in that case was not obligated to continue to supply water to a person outside its boundaries after it ceased to have a surplus due to an increase in the amount of land irrigated within the district. The expansion of irrigated land within the district occurred within about a decade after the district was created. Whether expansion more remote in time would be allowed to reduce the calculation of surplus water was, of course, not before the Court. It is possible that the Court's view of a district's trust responsibilities to its member landowners would allow even more remote expansion to reduce surplus available to lessees.

STATE OF IDAHO

DEPARTMENT OF WATER RESOURCES

WATER DISTRICT NO. 1

John V. Evans
Governor

C. Stephen Allred
Director

1515 Lincoln Road
Idaho Falls, Idaho 83401
(208) 523-7186

Your application to rent _____ acre feet of storage water during the 1978 irrigation season has been reviewed and it appears that there will be ample water available to fill your request.

As you are aware, storage water has traditionally been made available on a year-to-year basis. Many people have, over the years, become dependent upon rentals as their sole water supply. Unfortunately, no water right or priority has ever been established which can be recognized in delivering rental waters.

The Idaho Department of Water Resources, the Bureau of Reclamation and the Committee of Nine are presently working together to develop a procedure to make future rentals available on a more dependable basis. Until this is worked out you should be aware that any agreement to rent water during 1978 does not represent any commitment to provide you with rental water in the future.

We have enclosed a form that you will need to complete and return to this office with your check in the amount of \$ _____. This will allow your water needs to be considered in any rental allocation procedure which may be adopted in the future.

Very truly yours,

RONALD D. CARLSON
Watermaster

RDC:cw

Enclosure

P.

R E N T A L A G R E E M E N T

I hereby request the rental of _____ acre feet
of storage water during the 1978 irrigation season. I understand that
present and past use of rental storage water does not establish any
water right or assure me of future water right deliveries.

The lands I wish to irrigate with rented water are described
as follows:

This water will be diverted from _____
(stream or river)

at a point within _____, Section _____, Township _____,
(legal 1/16 section)
Range _____, B.M., _____.
(county)

I would like this land included in any program that may be
developed for allocating rental water in the future.

I understand the rental cost for 1978 is \$.75 per acre foot,
\$.25 of which represents the administrative and handling charges of
Water District No. 01.

MINUTES OF ANNUAL MEETING OF WATER DISTRICT NO. 01
Idaho Falls, Idaho, March 6, 1978

The 1978 annual meeting of Water District No. 01 was called to order at 10:10 a.m. in the Westbank Restaurant, Idaho Falls, Idaho, by Watermaster Designate Ronald D. Carlson.

Motion was made by Willis Walker that Leonard Graham be elected as temporary chairman. Motion was seconded and carried by unanimous vote.

Reed Murdock was elected temporary secretary.

The minutes of the March 7, 1977, annual meeting were read by Reed Murdock. It was moved by George Jacobs and seconded by Leo Robison that the minutes be approved as read. Motion carried.

Chairman declared a recess for selection of the Committees on Organization and Order of Business, Credentials, and Committee of Nine. Those nominated for the Order of Business Committee were: Carlos Neilson, Murray Hammond, Martin Bergman, Norman Hillan, Gale Shepard, Leo Hebdey, Glen Larson, Joe Baranaga and Walt Bybee.

Those on the Credentials Committee were Ferra Young, Jack Tominaga, Preston Atchley, Keith Erickson, Frank Kinghorn, Bill Rudd, Bob Burks, Jay Holbrook and Maurice Sharp.

Nominees for the Committee of Nine were: Kenneth Anderson, Reed Murdock, Homer Jones, Reed Oldham, Clyde Beck, William Watts, Lester Saunders, Burdell Curtis, George Stromire as an alternate and Leo Robison.

Wendell Johnson, Carlos Randolph, and Merle Kunz were nominated as Advisory Members.

All members previously mentioned were duly elected.

A roll call of the canals entitled to vote was read by Reed Murdock. Of 110 canals with a total vote of 179,762 votes, 68 canals with total votes of 151,916 were represented.

The 1978 Report of the Committee on Organization and Order of Business:

"We recommend that the temporary organization be made permanent and the following be adopted as the order of business of this meeting:

1. Appointment of a temporary organization.
2. Reading of minutes of previous meeting (omitting the resolutions).

3. Recess for caucus.
4. Roll call of canals shall be held while Committee on Organization, Order of Business, and Committee on Credentials are in caucus.
5. Report of committees.
6. That the temporary organization be made permanent.
7. Financial report of District.
8. Election of Committee of Nine.
9. Resolutions.
10. Election of Watermaster.
11. Unfinished business.
12. New business.
13. Committee of Nine shall serve as a permanent resolution committee and anyone desiring to present a resolution is requested to present it to the Committee of Nine on or before their last meeting prior to Water District No. 01 general meeting.

/s/ Martin Bergman, Chairman"

Upon motion by Reed Murdock, seconded by Willis Walker, the report of the Committee on Organization and Order of Business was adopted by unanimous vote.

1978 Report of Committee on Credentials:

"We, your Committee on Credentials, recommend the following for your consideration:

1. That the representatives of different rights be determined by roll call in advance of voting.
2. That the companies or other organizations owning decreed water rights shall be entitled to vote through their duly elected officers or by written proxy. Each stockholder or any company not represented by duly elected officers or by written proxy shall be entitled to vote the stock held by them.
3. That in case two or more officers are present from any canal company, they shall select one man to vote the stock of said company.
4. That power rights be not recognized in voting.
5. That no person be elected to membership and service on the Committee of Nine, Committee on Organization and Order of Business, or

Credentials Committee unless he be a landowner and wateruser in the canal company or irrigation district which he represents during the term of his office.

/s/

Motion that the report by the Credentials Committee be approved was made by Reed Murdock and seconded by George Jacob. Motion carried.

Ronald D. Carlson, Watermaster Designate, read the Annual Report to the waterusers. It was moved and seconded that the report be accepted. Motion carried.

Meeting recessed for lunch at 11:45 a.m., and reconvened at 1:10 p.m.

The program portion of the afternoon meeting included the following guest speakers:

Chairman Graham introduced Steve Allred, Director of the Department of Water Resources. Mr. Allred indicated the state had received a grant of \$690,000.00 under the National Drought Relief Program to update facilities needed by state water districts. He indicated the water district had received highest priority for these funds and that under this program, the water district would gain a computer capability and 50 canals within the district were being equipped with gate houses and stage recorders.

Steve Allred said the State Water Plan was a major issue before the legislature this session, and that several alternative proposals have been presented. Allred expressed the opinion that he felt the legislature would adopt a modified version of the State Water Plan as an alternative to the hydropower protection initiative.

Carlos Randolph, Superintendent of the Minidoka Project, introduced Rod Vissia, Regional Director of the Bureau of Reclamation, who informed the water users a nine-foot restriction had been placed on Jackson Lake Reservoir. This restriction, amounting to 222,640 acre feet of storage, was imposed because Bureau investigations indicated the hydraulic fill in the north portion of the dike was not safe under earthquake conditions. Mr. Vissia indicated that the nine feet of space could be used for short periods of time for flood control purposes.

Leo Busch, Chief of Reservoir and River Operations of the Bureau's Minidoka Project outlined the water supply season. Data displayed by Mr. Busch indicated that all of the major water sheds are well above normal and that there appeared to be little question that all major reservoirs, with the exception of Jackson Lake, would fill. As of March 3, 1978, American Falls was 72% full, Henry's Lake was 88% full, Island Park was 78% of capacity, Jackson Lake and Palisades were at 39% and 25% respectively. He indicated Palisades was being held down to handle anticipated flood flows this spring.

Ted Diehl, a member of the Legislative Committee of the Idaho Water Users Association, gave a run down on bills presently before the Idaho Legislature. He indicated a large amount of legislation which would be of interest to water users. He urged individuals to make their opinions known to their legislators.

Leon Grieve, member of the Education Committee of the Idaho Water Users Association, reported on the Association's safety program for school children last year and made proposals for the coming year. He announced the 1978 first aid program which will be conducted at various locations within the state.

Chuck Brockway, of the U of I Experiment Station, outlined a research program in which they hoped to evaluate the efficiencies of certain irrigation systems within the district. He indicated this research hoped to identify areas of excessive loss within delivery systems, determine present water use efficiencies and identify improvements which would have the greatest benefit to the company or irrigation district. He urged canal companies who would be interested in having their systems evaluated to contact him.

Ronald Carlson expressed an optimistic outlook for the coming year. He indicated that the drought of 1977 may have been a blessing in disguise since it pointed out weaknesses of the present water accounting procedures, allowed American Falls Reservoir to be evacuated to complete the reconstruction of the American Falls Dam, and it made money available to the water district to make certain needed improvements.

Mr. Carlson said he was confident that, with the computer accounting procedures, he hopes to implement this summer, the water users within Water District No. 01 will have available much better information more rapidly than was possible in the past. He also expressed the hope that the watermaster would be more available to act upon individual problems within the district.

The attached resolutions were presented by Reed Murdock.

Upon motions duly made and seconded, each of the attached resolutions was adopted as presented for the coming year.

A motion was presented by Leonard Graham and seconded by Homer Jones that Ronald D. Carlson be elected watermaster for the ensuing year. Motion carried by unanimous vote.

Two additional resolutions honoring Willis Walker and Leonard Graham were presented by John Rosholt.

Meeting adjourned at 4:10 p.m.

Respectfully submitted,

Reed D. Murdock
REED MURDOCK, Secretary

P.

WATER DISTRICT NO. 01

March 6, 1978

RESOLUTIONS

Resolution No. 1. That the watermaster be requested to make such changes in the established water distribution practices as will result; in more accurate deliveries of natural flow and stored water, improved regulation procedures to assure deliveries of all water rights by priority, to improve the availability of water supply and diversion records to the water users, and to assure that all water users are charged for water deliveries on accurate and equitable basis.

Resolution No. 2. Since the Director of the Department of Water Resources is charged by Section 42-602, Idaho Code, with the distribution of all water from streams and rivers in the state and since all watermasters in the state must be appointed and supervised by the Director of the Department of Water Resources pursuant to Section-42-608, Idaho Code, it is hereby recommended that the waterusers of Water District No. 01 enter into a cooperative program with the Idaho Department of Water Resources to provide watermaster services as outlined in a Memorandum of Understanding signed by the Chairman of the Committee of Nine and the Director of the Department of Water Resources on March 5, 1978.

Resolution No. 3. We recommend that Ronald D. Carlson be elected watermaster for the ensuing year, including a staff of a deputy, assistant and a clerk, with an aggregate salary of \$40,953.00. This amount represents 67% of the salary of the watermaster and the salaries of the watermaster and clerk shall be paid from non-water district funding provided by the Idaho Department of Water Resources.

Resolution No. 4. Resolved that the duties of watermaster shall begin on this date and continue for a full period of one year.

Resolution No. 5. Proposed budget for Water District No. 01 for year beginning April 1, 1978:

Hydrographers:

Teton Basin	4½ mos. @ \$750 (+ mileage)	\$ 3,375.	
Idaho Falls area	4½ mos. @ \$800 (+ mileage)	3,600.	
Lower Valley	4 mos. @ \$800 (+ mileage)	3,200.	
Henry's Fork	5 mos. @ \$825 (+ mileage)	4,125.	
Falls River	150 days @ \$ 35 (incl mileage)	5,250.	
Teton River	130 days @ \$ 35 (incl mileage)	4,550.	\$24,100.

River Riders:

Heise Division	100 days @ \$ 20 (incl mileage)	2,000.	
Rigby Division	100 days @ \$ 20 (incl mileage)	2,000.	
Blackfoot Division	100 days @ \$ 20 (incl mileage)	2,000.	
Swan Valley	100 days @ \$ 20 (incl mileage)	2,000.	
Upper Fall Ri. Div.	4 mos. @ \$180 (incl mileage)	720.	
South Leigh Creek	250 days @ \$ 4 (incl mileage)	1,000.	
Willow Creek	5 mos. @ \$500 (incl mileage)	2,500.	\$12,220.

P.

Balance forward

\$ 36,320.

Miscellaneous

Transportation	50,000 @ 20¢ per mi.	\$ 10,000.	
Subsistence & Travel		1,000.	
(watermaster and staff)			
Watermaster & staff Social Security		4,736.	
Insurance (Workmen's Compensation)		1,000.	
Health, Life, Retirement, etc.		5,533.	
Maintenance & construction		2,000.	
Rent office space		2,500.	
Part-time help		2,000.	
Telephone & telemark		1,200.	
Postage & P.O. Box rent		900.	
Supplies, watermaster's bond, misc.		1,500.	
Printing, binding watermaster report		600.	
Interest on loans		1,500.	
Ground water investigations		2,250.	
Computer costs		5,667.	\$ 43,146.
<u>Watermaster & staff</u>		\$40,953.	40,953.
<u>Streamgaging operations</u> - proportionate share		17,256.	17,256.
<u>Committee of Nine</u>		2,000.	2,000.
GRAND TOTAL			\$139,675.

Resolution No. 6. Resolved that the watermaster shall prepare a report in accordance with Idaho Code, Section 42-614, which shall become the official billing to the individual water users, canal companies, and irrigation districts, and is hereby authorized to collect all of the expenses of delivering the waters of the District, including his salary and that of his assistants, and shall make all disbursements necessary to the conduct of the business of administering and delivering the waters of the District.

Resolved that no ditch, canal company, or other water user shall have the right to demand and receive water, and the watermaster shall not deliver to such person until receipt of the amount due and payable from such user.

Resolved that copies of the minutes of the annual meeting, the budget as approved, all resolutions approved, and the report prepared in accordance with Section 42-614, shall be filed with the county clerks of Bonneville, Madison, Teton and Fremont Counties.

Resolution No. 7. We recommend that the Committee of Nine be continued with nine regular members, the members representing the Burley and Minidoka Irrigation Districts are to be alternated between the two districts as they may arrange. In addition, advisory members representing the Bureau of Reclamation, Teton Basin, Gooding Canal, and a member from the Burley or Minidoka District, whichever is not desiring to have representatives attend meetings of the Committee of Nine should notify the watermaster, who will then advise them of dates and times of committee meetings so that they may have an opportunity to attend such meetings.

P.

Resolution No. 8. Whereas in the operation of Water District 01 it is necessary to borrow money at times to meet expenses of operation prior to collection from the canal companies at the close of the irrigation season.

Therefore, be it resolved that the watermaster or his designated representative on the Committee of Nine is hereby authorized to borrow from time to time during the year ending March 31, 1979, such sums as are necessary to pay outstanding bills, signing notes as authorized office of District No. 01 as security therefore, the total amount of any such outstanding indebtedness at any one time not; however, to exceed \$60,000.

Resolution No. 9. Whereas, the operation of the storage pool committee in past years has proved to be of valuable assistance to the watermaster in providing an orderly distribution of rental water.

Therefore, be it resolved, that a pool committee again be appointed by the Chairman of the Committee of Nine for the following purposes:

1. to determine general policy regarding source of rental water;
2. to assist the watermaster in the allocation of rental water;
3. to consult with the watermaster on ways to most fully utilize available storage water.

Resolution No. 10. Whereas, it is in the best interest of the water users of Water District No. 01 to account for all diversions which might adversely affect any prior natural flow or storage diversions be it resolved that the watermaster shall collect records of water diversions during the entire year.

Resolution No. 11. Whereas, Mr. Clifford N. Scoresby served on the Committee of Nine faithfully and conscientiously for 24 years, 19 of them as secretary; and, whereas his career and services were terminated by his death on August 3, 1977,

Now therefore, be it resolved, by the waterusers of Water District No. 01 at their annual meeting held in the City of Idaho Falls, Idaho, this sixth day of March, 1977, that they express their deep appreciation for his many years of dedicated service, and

Be it further resolved, that this expression of appreciation be conveyed to his family.

Dear Mr. Carlson:

Please find enclosed an executed Rental Agreement for Glen Dale Farms, Inc.'s rental of 1,000 acre feet of storage water and a check in the amount of \$750.00. Glen Dale Farms, Inc. has taken a position in the past and still maintains that past and present use of rental water which has been diverted and applied to a beneficial use entitles Glen Dale Farms, Inc. to the continued availability of that water.

Sincerely,

Jon Steele

JUN 22 1978

Department of Water Resources
a c Eastern District Office

I hereby request the rental of 1,000
of storage water during the 1978 irrigation season. ~~I understand that
present and past use of rental storage water does not establish any
water right or assure me of future water right deliveries.~~

The lands I wish to irrigate with rented water are described
as follows:

Sections 13, 14, 23, 24 T.11 South, R 20 East B.M.

This water will be diverted from Snake River
(stream or river)

at a point within SE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 29, Township 10S,
(legal 1/16 section)
Range 21E, B.M., Twin Falls,
(county)

I would like this land included in any program that may be
developed for allocating rental water in the future.

I understand the rental cost for 1978 is \$.75 per acre foot,
\$.25 of which represents the administrative and handling charges of
Water District No. 01.

Dear Steve:

Pursuant to the provisions of Chapter 7, Section 41-701 and 41-702 of the Idaho Compiled Statutes, notice is hereby given that the United States, as the owner of Jackson Lake Reservoir, Grassy Lake Reservoir, Island Park Reservoir, Palisades Reservoir, and American Falls Reservoir, desires to use the bed of the Snake River and its tributaries, natural water courses in the State of Idaho, for the purpose of carrying the stored water from said reservoirs to the several projects entitled to use the same, and requests that a special deputy be appointed as provided in said sections to adjust the headgates of the various canals diverting from said stream in such a manner that the parties having the right to the use of such stored water shall secure the volume thereof to which they are entitled.

The dates when the stored water will be discharged, its volume in acre-feet and rate of flow in cubic feet per second will depend upon climatic and runoff conditions and cannot be determined at this time. Stored water released from Island Park and Grassy Lake Reservoirs during the season of 1978 will be for the benefit of the Fremont-Madison Irrigation District.

It has been the custom in the past for the Watermaster of District No. 01 to act in the capacity of the special deputy under appointment by your office. The continuation of this custom is requested for the current year.

Sincerely yours,

Carlos C. Randolph

Carlos C. Randolph
Project Superintendent

MEMORANDUM OF UNDERSTANDING

This memorandum of understanding is entered into by and between the State of Idaho Department of Water Resources, hereinafter called the Department and the water users of Water District 01, Upper Snake River, hereinafter called Water District 01 acting through the advisory committee known as the Committee of Nine.

WHEREAS, the statutes of the State of Idaho provide for the Department to administer and supervise the distribution of the waters of the State to those holding valid rights to the use thereto; and

WHEREAS, the Committee of Nine, as advisors to, and elected representatives of, the water users of Water District 01, voted unanimously on December 10, 1977 to recommend that Water District 01 enter into a cooperative program with the Department to provide watermaster services for Water District 01; and

WHEREAS, the Committee of Nine will serve as advisors to the Department in matters relating to the operation of Water District 01:

NOW, THEREFORE, the Department agrees to provide the following services to Water District 01, effective upon signature of this Agreement and upon authorization and adoption of the Agreement and budget to implement the agreement by the regular meeting of Water District 01 on March 6, 1978:

- 1) To provide watermaster and associated services to Water District 01 for the period from the effective date of this Agreement until March 4, 1979, or until the end of any subsequent water district year as agreed to by the water users of Water District 01 at their annual meeting and the Director of the Department. Such watermaster services will be provided under the direction of the Regional Supervisor of the Department's Eastern Region consistent with Chapter 6 of Title 42 Idaho Code.

2) To provide the equivalent of 2/3 of a man year of the Regional Supervisor as watermaster throughout the Water District year and to provide any additional part time or full time employees necessary for the operations of Water District 01.

3) To provide office space as necessary for operation of Water District 01 and to provide the Department vehicles for use by full time employees of the Department, to conduct Water District 01 business, and to share the use of other Department equipment and facilities as necessary to equitably distribute the waters to the users within Water District 01.

WATER DISTRICT 01 agrees as follows:

1) To pay to the Department, on an advance basis, sufficient funds to cover the costs of operations incurred in providing watermaster and associated services to Water District 01, provided, however, that reimbursement for the watermaster shall not exceed 2/3 of the personnel costs of the Regional Supervisor, and provided further that all other costs incurred in conducting Water District 01 business will be paid in full. Indirect costs will be paid at the rate utilized by the Department in federal contracts, modified to reflect direct cost identified as a Water District cost. Mileage and per diem costs will be based upon the rate provided by state law for state employees.

Nothing in this Agreement will act to change, modify or release either party of any obligation or responsibility provided by contract or by law.

SIGNED this 5 day of MARCH, 1978.

May 26, 1978

Dear Water User:

Water District No. 01 has, for many years, financed its operation by borrowing money and then at the end of the season, billing water users for the actual costs. This procedure, beside being inconsistent with the intent of the Idaho Code, is more costly for the water users within the district.

The Committee of Nine has reviewed this procedure and has recommended that Water District No. 01 change its billing procedures to conform to the Idaho statutes. This will mean that in the future the District will estimate, from the past records, the amount of water each company or individual will use during the coming season, and will determine their proportionate cost of the estimated annual budget adopted by the water users at the annual meeting. This amount will be billed to each water user in April. Adjustments for over or under payment will be made each April when the new budget is prepared.

In implementing this new procedure, we have estimated the cost for the coming season and are sending out these bills at this time. We understand that it will not be possible for all water users to pay early this year and, therefore, payment will not be due until December 1, 1978. However, we encourage all water users who have funds available to pay as soon as possible since it will allow the Water District to borrow less money during the season and will result in a lower assessment for the season.

We appreciate your assistance in implementing this change and look forward to working with you during the coming season.

Very truly yours,

RONALD D. CARLSON
Watermaster

Re: Ronald D. Carlson - #Bond No. 91 71 219

Gentlemen:

We received the enclosed Idaho Official Bond back from your office concerning Ronald Carlson. This bond is to be on file with your office since Mr. Carlson has been newly elected as Watermaster of Water District No. 1 and is required to have this bond.

If there is some reason that you do not wish this bond filed with your office, please advise our office as soon as possible.

MAY 1 1978

Idaho Official Bond

Department of Water Resources
Eastern District Office

KNOW ALL MEN BY THESE PRESENTS:

That we, Ronald D. Carlson
of Rt. #1, Box 120, Firth, Bingham County, State of Idaho,
as Principal, and FIDELITY AND DEPOSIT COMPANY OF MARYLAND, of Baltimore, Maryland, as Surety, are jointly
and severally held and firmly bound unto State of Idaho

in the penal sum of Five Hundred and no/100 * * * * * (\$500.) Dollars,
for the payment of which, well and truly to be made, we bind ourselves, our heirs, executors, administrators,
successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this 17th day of April 19 78

THE CONDITION OF THE ABOVE BOND IS SUCH, That, WHEREAS,

The above bound Principal was ~~on the~~ 19th day of ~~April~~ April, 19 78, duly
elected to the office of Water Master of Water District No. 1
of the State of Idaho in the State of Idaho.

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION IS SUCH,

That, if the said Ronald D. Carlson
shall well, truly and faithfully perform all the duties of h is said office now required of h im by law, and
also all such additional duties as may be hereafter imposed upon h im by any law enacted and in force in the
State of Idaho, for the term of One (1) year, beginning on the 7th day of
March 19 78, and ending on the 7th day of
March 19 79.

And the said Ronald D. Carlson
shall pay over, in accordance with the requirements of the statutes of the State of Idaho, all moneys that may
come into h is hands by virtue of h is said office and shall deliver to h is successor in such office
all writs, papers and other things pertaining to h is said office, which may by law be required to be so turned
over, then the above bond shall be void otherwise to be and remain in full force and effect.

This bond is executed by the Surety upon the following express condition, which shall be a condition
precedent to the right of recovery hereunder:

That regardless of the number of years this Bond shall continue or be continued in force, or be renewed,
and of the number of annual premiums that shall be payable or paid, the Surety shall not be liable hereunder
for more in the aggregate than the above named penalty.

IDAHO WATER SUPPLY CONDITIONS

May 8, 1978

RECEIVED

MAY 11 1978

Department of Water Resources
Eastern District Office

1. WEATHER

Precipitation during April was well above average over the entire state. Several stations reported over twice their normal amounts. Ketchum Ranger Station recorded 3.27 inches, or 321 percent of normal, making it the wettest April on record. The distribution of April precipitation is shown in Figure 1.

Figure 2 illustrates the accumulated precipitation since October 1, 1977. Figure 3 illustrates the twelve station average or statewide accumulated precipitation. April precipitation was 2.57 inches or 175 percent of normal, and it brought the accumulated total for the water year to 14.73 inches or 121 percent of normal.

2. SNOW

Above average precipitation and below normal temperatures during April resulted in many high elevation sites registering more snow on May 1 than was present on April 1. Normally, the maximum accumulation occurs on April 1. Also, low elevation snowpack has largely disappeared.

3. RESERVOIRS

Table 1 lists operation data for major Idaho reservoirs. Several reservoirs are at capacity, and flood control releases are continuing at many others.

4. STREAMFLOW FORECASTS

Table 2 lists volume runoff forecasts for major Idaho streams. Most values are somewhat higher than those issued on April 1 as a result of the above average precipitation during the month. The list is compiled from Soil Conservation Service, Bureau of Reclamation and National Weather Service sources.

5. FLOOD POTENTIAL

The overall flood potential has lessened somewhat as the result of gradual snowmelt at lower and middle elevations. Streams with higher elevation source areas still have potential for flooding as the result of the heavy April precipitation. Snowpacks are not, however, great enough to be a cause for alarm.

MEMORANDUM

TO: Bob Fleenor, Glen Saxton, and Steve Allred ✓

FROM: Alan Robertson *AR*

SUBJECT: Priorities of Storage Rights for District 1 Accounting

Based upon a memo (enclosure 1) from the USDI field solicitor to USBR and data (enclosure 2) from Alan Jensen, USBR, it appears that the federal storage priorities should be treated as shown in enclosure 3. The basis for separating the priorities between winter and summer is contained in the last paragraph of the solicitor's memo in which he makes it clear that the winter water contracts changed only the winter storage priorities.

Since the winter water savings contracts, which are made a part of the decree, clearly state that the contracting canals cannot divert for 150 days, we will assume these canals have no diversion rights from 1 November through 30 March. This involves all canals shown on enclosure 2 except number 42, the North Side Canal. The North Side and Twin Falls canals participate in the winter water savings program, but only at their option; therefore, it does not appear that any winter diversion rights they may have have been affected by their contracts.

Advancement of 45,000 acre feet of the Island Park's right to 29 March 21 is apparently based on pages 62 and 63 of the Aberdeen Springfield vs. Henry Eagle decree which relate to storing winter flows made possible by curtailing power generation at Minidoka Dam. Advancement of the 12 June 1940 right of 21,000 acre feet in Island Park to 14 March 35 is based upon page 55.

Bob Sutter and I discussed these storage priorities in a meeting on April 24 with Alan Jensen, Dan Yribar, Rich Allen, and Perry Harrison of USBR.

May 1, 1978

MEMORANDUM

TO: ^{MS} Glen Saxton, Bob Fleenor, Steve Allred
FROM: Alan Robertson ^R
SUBJECT: Return Flow Credit to Minidoka Project

The Foster Decree states that the natural flow supply for the Twin Falls projects shall be determined as if the Minidoka Project did not exist. This decree, therefore, prevents any gains from Minidoka to Milner attributable to return flow from the Minidoka Project, or losses due to Lake Walcott, from being included in the natural flow computation at Milner Dam. These losses and gains have historically been absorbed by the Minidoka Project. The natural flow available at Milner was computed at Neeley below American Falls Dam. The gain or loss absorbed by the Minidoka Project was computed as the entire Neeley to Milner gain. The computation period was only during the time when some of the rights below Neeley were not completely filled. Actual computations were usually done after the irrigation season had ended using monthly data.

The daily water right accounting procedure prepared for use for the Upper Snake this year requires that the Minidoka Project return flow credit be computed somewhat differently. The credit does not follow normal water right computations since return flow is usually considered a part of natural flow and not credited back to the diversion. Since water right allocation computations will be done daily throughout the year, provision has been made to either include or exclude the Minidoka return flow (Minidoka to Milner gain). When the natural flow at Minidoka is high, the Minidoka Project will not be using stored water, and the return flow is then credited to the next priority.

Presently, the total system (Water District #1) diversions and natural flow at Milner are used as the indicator of how to account for the Minidoka return flow. If diversions exceed the Milner natural flow

P.

May 1, 1978

by more than 2000 cfs on any given day, then it is probable that the canals below Neeley require stored water, and the Minidoka to Milner gain is withheld from the natural flow allocation. After the entire natural flow is allocated, the Minidoka to Milner gain is credited to the Minidoka Project up to the amount not met by natural flow. It is possible that only part, or none, of the gain is needed by the project. The portion not used is then reallocated to the rights below Minidoka in order of priority.

The above described daily approximation introduces only small errors in the allocation and is far more accurate than a monthly calculation. It eliminates the need for an iterative procedure to determine what portion of the Minidoka to Milner gain to include in the Milner natural flow supply.

A second variation in the accounting procedure is that the entire Neeley to Minidoka gain is included in the Milner natural flow supply. Previously, this gain was also credited to the Minidoka Project because losses in Lake Walcott were to be absorbed by the project. In the past five years, this reach has shown a predominant gain during the period of stored water use. The daily accounting procedure corrects for evaporation losses by adding the daily evaporation loss at Lake Walcott to the natural flow at Minidoka. Therefore, the natural flow at Minidoka includes the Neeley to Minidoka gain plus Lake Walcott evaporation and is allocated to all rights below Neeley in order of priority.

The Neeley to Minidoka gain will be continually observed for fluctuations, and if the gain should again show significant losses because of Lake Walcott, adjustments will be made to remove these effects from the natural flow supply for downstream rights.

FILE		

To: Regional Planning Officer, Boise, Idaho
From: Field Solicitor, Boise, Idaho
Subject: Winter Water Savings, Minidoka Project (Your Memorandum Dated March 2)

The matter of winter water savings and the priority of these rights both with respect to federal storage and natural flow rights are covered in supplemental water decrees. All parties having water rights were made parties and the water agreements made in the Palisades contracts with all the various users were judicially examined and approved.

This adjudication was accomplished in two proceedings in district court. The Upper Valley users brought proceedings in Fremont County, Cause No. 6117, entitled Aberdeen-Springfield Canal Co. v. Henry Eagle, with decree entered March 12, 1969. The Lower Valley proceedings were in Twin Falls County, entitled Burley Irrigation District v. Henry Eagle, with the decree entered July 10, 1968. 01-A

The decree confirms all provisions of the existing storage contracts on the Snake River. The decrees, being supplemental to the initial Snake River decrees, also constitute judgment in rem and bind all parties and water users in the state. The decrees specifically approved the Palisades contract articles dealing with winter water savings and Island Park priorities (see, for example, Parsons Ditch Co., articles 11 and 23 respectively referred to and incorporated into the Fremont County decree).

The provisions for winter water savings were required by the United States as a condition precedent to building Palisades. The winter water users in consideration of exchanging this right, required and were granted bottom rights ahead of American Falls storage. This bottom right was agreed to by all the water users and confirmed by the court.

There is no conflict between this stored winter water and post 1921 natural flow rights as the two rights are in completely different categories. The winter water was a winter appropriative right changed to a winter storage right by agreement of all the water users and approval of the court. Use of such stored water in the irrigation season can of course have no impact on natural flow rights which can only be satisfied from water appearing naturally in the river.

I trust this answers your inquiry.

Joseph B. Brooks
Field Solicitor

MINUTES OF ANNUAL MEETING OF WATER DISTRICT NO. 01
Idaho Falls, Idaho, March 6, 1978

The 1978 annual meeting of Water District No. 01 was called to order at 10:10 a.m. in the Westbank Restaurant, Idaho Falls, Idaho, by Watermaster Designate Ronald D. Carlson.

Motion was made by Willis Walker that Leonard Graham be elected as temporary chairman. Motion was seconded and carried by unanimous vote.

Reed Murdock was elected temporary secretary.

The minutes of the March 7, 1977, annual meeting were read by Reed Murdock. It was moved by George Jacobs and seconded by Leo Robison that the minutes be approved as read. Motion carried.

Chairman declared a recess for selection of the Committees on Organization and Order of Business, Credentials, and Committee of Nine. Those nominated for the Order of Business Committee were: Carlos Neilson, Murray Hammond, Martin Bergman, Norman Hillan, Gale Shepard, Leo Hebdey, Glen Larson, Joe Baranaga and Walt Bybee.

Those on the Credentials Committee were Ferra Young, Jack Tominaga, Preston Atchley, Keith Erickson, Frank Kinghorn, Bill Rudd, Bob Burks, Jay Holbrook and Maurice Sharp.

Nominees for the Committee of Nine were: Kenneth Anderson, Reed Murdock, Homer Jones, Reed Oldham, Clyde Beck, William Watts, Lester Saunders, Burdell Curtis, George Stomeir as an alternate and Leo Robison.

Wendell Johnson, Carlos Randolph, and merle Kunz were nominated as Advisory Members.

All members previously mentioned were duly elected.

A roll call of the canals entitled to vote was read by Reed Murdock. Of 110 canals with a total vote of 179,762 votes, 68 canals with total votes of 151,916 were represented.

The 1978 Report of the Committee on Organization and Order of Business:

"We recommend that the temporary organization be made permanent and the following be adopted as the order of business of this meeting:

1. Appointment of a temporary organization.
2. Reading of minutes of previous meeting (omitting the resolutions).

3. Recess for caucus.
4. Roll call of canals shall be held while Committee on Organization, Order of Business, and Committee on Credentials are in caucus.
5. Report of committees.
6. That the temporary organization be made permanent.
7. Financial report of District.
8. Election of Committee of Nine.
9. Resolutions.
10. Election of Watermaster.
11. Unfinished business.
12. New business.
13. Committee of Nine shall serve as a permanent resolution committee and anyone desiring to present a resolution is requested to present it to the Committee of Nine on or before their last meeting prior to Water District No. 01 general meeting.

/s/ Martin Bergman, Chairman"

Upon motion by Reed Murdock, seconded by Willis Walker, the report of the Committee on Organization and Order of Business was adopted by unanimous vote.

1978 Report of Committee on Credentials:

"We, your Committee on Credentials, recommend the following for your consideration:

1. That the representatives of different rights be determined by roll call in advance of voting.
2. That the companies or other organizations owning decreed water rights shall be entitled to vote through their duly elected officers or by written proxy. Each stockholder or any company not represented by duly elected officers or by written proxy shall be entitled to vote the stock held by them.
3. That in case two or more officers are present from any canal company, they shall select one man to vote the stock of said company.
4. That power rights be not recognized in voting.
5. That no person be elected to membership and service on the Committee of Nine, Committee on Organization and Order of Business, or

Credentials Committee unless he be a landowner and wateruser in the canal company or irrigation district which he represents during the term of his office.

/s/

Motion that the report by the Credentials Committee be approved was made by Reed Murdock and seconded by George Jacob. Motion carried.

Ronald D. Carlson, Watermaster Designate, read the Annual Report to the waterusers. It was moved and seconded that the report be accepted. Motion carried.

Meeting recessed for lunch at 11:45 a.m., and reconvened at 1:10 p.m.

The program portion of the afternoon meeting included the following guest speakers:

Chairman Graham introduced Steve Allred, Director of the Department of Water Resources. Mr. Allred indicated the state had received a grant of \$690,000.00 under the National Drought Relief Program to update facilities needed by state water districts. He indicated the water district had received highest priority for these funds and that under this program, the water district would gain a computer capability and 50 canals within the district were being equipped with gage houses and stage recorders.

Steve Allred said the State Water Plan was a major issue before the legislature this session, and that several alternative proposals have been presented. Allred expressed the opinion that he felt the legislature would adopt a modified version of the State Water Plan as an alternative to the hydropower protection initiative.

Carlos Randolph, Superintendent of the Minidoka Project, introduced Rod Vissia, Regional Director of the Bureau of Reclamation, who informed the water users a nine-foot restriction had been placed on Jackson Lake Reservoir. This restriction, amounting to 222,640 acre feet of storage, was imposed because Bureau investigations indicated the hydraulic fill in the north portion of the dike was not safe under earthquake conditions. Mr. Vissia indicated that the nine feet of space could be used for short periods of time for flood control purposes.

Leo Busch, Chief of Reservoir and River Operations of the Bureau's Minidoka Project outlined the water supply season. Data displayed by Mr. Busch indicated that all of the major water sheds are well above normal and that there appeared to be little question that all major reservoirs, with the exception of Jackson Lake, would fill. As of March 3, 1978, American Falls was 72% full, Henry's Lake was 88% full, Island Park was 78% of capacity, Jackson Lake and Palisades were at 39% and 25% respectively. He indicated Palisades was being held down to handle anticipated flood flows this spring.

Ted Diehl, a member of the Legislative Committee of the Idaho Water Users Association, gave a run down on bills presently before the Idaho Legislature. He indicated a large amount of legislation which would be of interest to water users. He urged individuals to make their opinions known to their legislators.

Leon Grieve, member of the Education Committee of the Idaho Water Users Association, reported on the Association's safety program for school children last year and made proposals for the coming year. He announced the 1978 first aid program which will be conducted at various locations within the state.

Chuck Brockway, of the U of I Experiment Station, outlined a research program in which they hoped to evaluate the efficiencies of certain irrigation systems within the district. He indicated this research hoped to identify areas of excessive loss within delivery systems, determine present water use efficiencies and identify improvements which would have the greatest benefit to the company or irrigation district. He urged canal companies who would be interested in having their systems evaluated to contact him.

Ronald Carlson expressed an optimistic outlook for the coming year. He indicated that the drought of 1977 may have been a blessing in disguise since it pointed out weaknesses of the present water accounting procedures, allowed American Falls Reservoir to be evacuated to complete the reconstruction of the American Falls Dam, and it made money available to the water district to make certain needed improvements.

Mr. Carlson said he was confident that, with the computer accounting procedures, he hopes to implement this summer, the water users within Water District No. 01 will have available much better information more rapidly than was possible in the past. He also expressed the hope that the watermaster would be more available to act upon individual problems within the district.

The attached resolutions were presented by Reed Murdock.

Upon motions duly made and seconded, each of the attached resolutions was adopted as presented for the coming year.

A motion was presented by Leonard Graham and seconded by Homer Jones that Ronald D. Carlson be elected watermaster for the ensuing year. Motion carried by unanimous vote.

Two additional resolutions honoring Willis Walker and Leonard Graham were presented by John Rosholt.

Meeting adjourned at 4:10 p.m.

Respectfully submitted,

A handwritten signature in cursive script that reads "Reed D. Murdock". The signature is written in dark ink and is positioned above the printed name.

REED MURDOCK, Secretary

WATER DISTRICT NO. 01

March 6, 1978

RESOLUTIONS

Resolution No. 1. That the watermaster be requested to make such changes in the established water distribution practices as will result; in more accurate deliveries of natural flow and stored water, improved regulation procedures to assure deliveries of all water rights by priority, to improve the availability of water supply and diversion records to the water users, and to assure that all water users are charged for water deliveries on accurate and equitable basis.

Resolution No. 2. Since the Director of the Department of Water Resources is charged by Section 42-602, Idaho Code, with the distribution of all water from streams and rivers in the state and since all watermasters in the state must be appointed and supervised by the Director of the Department of Water Resources pursuant to Section 42-608, Idaho Code, it is hereby recommended that the waterusers of Water District No. 01 enter into a cooperative program with the Idaho Department of Water Resources to provide watermaster services as outlined in a Memorandum of Understanding signed by the Chairman of the Committee of Nine and the Director of the Department of Water Resources on March 5, 1978.

Resolution No. 3. We recommend that Ronald D. Carlson be elected watermaster for the ensuing year, including a staff of a deputy, assistant and a clerk, with an aggregate salary of \$40,953.00. This amount represents 67% of the salary of the watermaster and the salaries of the watermaster and clerk shall be paid from non-water district funding provided by the Idaho Department of Water Resources.

Resolution No. 4. Resolved that the duties of watermaster shall begin on this date and continue for a full period of one year.

Resolution No. 5. Proposed budget for Water District No. 01 for year beginning April 1, 1978:

Hydrographers:

Teton Basin	4½ mos. @ \$750 (+ mileage)	\$ 3,375.	
Idaho Falls area	4½ mos. @ \$800 (+ mileage)	3,600.	
Lower Valley	4 mos. @ \$800 (+ mileage)	3,200.	
Henry's Fork	5 mos. @ \$825 (+ mileage)	4,125.	
Falls River	150 days @ \$ 35 (incl mileage)	5,250.	
Teton River	130 days @ \$ 35 (incl mileage)	<u>4,550.</u>	\$24,100.

River Riders:

Heise Division	100 days @ \$ 20 (incl mileage)	2,000.	
Rigby Division	100 days @ \$ 20 (incl mileage)	2,000.	
Blackfoot Division	100 days @ \$ 20 (incl mileage)	2,000.	
Swan Valley	100 days @ \$ 20 (incl mileage)	2,000.	
Upper Fall Ri. Div.	4 mos. @ \$180 (incl mileage)	720.	
South Leigh Creek	250 days @ \$ 4 (incl mileage)	1,000.	
Willow Creek	5 mos. @ \$500 (incl mileage)	2,500.	\$12,220.

Balance forward

\$ 36,320.

Miscellaneous

Transportation	50,000 @ 20¢ per mi.	\$ 10,000.	
Subsistence & Travel		1,000.	
(watermaster and staff)			
Watermaster & staff Social Security		4,736.	
Insurance (Workmen's Compensation)		1,000.	
Health, Life, Retirement, etc.		5,533.	
Maintenance & construction		2,000.	
Rent office space		2,500.	
Part-time help		2,000.	
Telephone & telemark		1,200.	
Postage & P.O. Box rent		900.	
Supplies, watermaster's bond, misc.		1,500.	
Printing, binding watermaster report		600.	
Interest on loans		1,500.	
Ground water investigations		2,250.	
Computer costs		5,667.	\$ 43,146.
<u>Watermaster & staff</u>		\$40,953.	40,953.
<u>Streamgaging operations</u> - proportionate share		17,256.	17,256.
<u>Committee of Nine</u>		2,000.	2,000.
	GRAND TOTAL		\$139,675.

Resolution No. 6. Resolved that the watermaster shall prepare a report in accordance with Idaho Code, Section 42-614, which shall become the official billing to the individual water users, canal companies, and irrigation districts, and is hereby authorized to collect all of the expenses of delivering the waters of the District, including his salary and that of his assistants, and shall make all disbursements necessary to the conduct of the business of administering and delivering the waters of the District.

Resolved that no ditch, canal company, or other water user shall have the right to demand and receive water, and the watermaster shall not deliver to such person until receipt of the amount due and payable from such user.

Resolved that copies of the minutes of the annual meeting, the budget as approved, all resolutions approved, and the report prepared in accordance with Section 42-614, shall be filed with the county clerks of Bonneville, Madison, Teton and Fremont Counties.

Resolution No. 7. We recommend that the Committee of Nine be continued with nine regular members, the members representing the Burley and Minidoka Irrigation Districts are to be alternated between the two districts as they may arrange. In addition, advisory members representing the Bureau of Reclamation, Teton Basin, Gooding Canal, and a member from the Burley or Minidoka District, whichever is not desiring to have representatives attend meetings of the Committee of Nine should notify the watermaster, who will then advise them of dates and times of committee meetings so that they may have an opportunity to attend such meetings.

Resolution No. 8. Whereas in the operation of Water District 01 it is necessary to borrow money at times to meet expenses of operation prior to collection from the canal companies at the close of the irrigation season.

Therefore, be it resolved that the watermaster or his designated representative on the Committee of Nine is hereby authorized to borrow from time to time during the year ending March 31, 1979, such sums as are necessary to pay outstanding bills, signing notes as authorized office of District No. 01 as security therefore, the total amount of any such outstanding indebtedness at any one time not; however, to exceed \$60,000.

Resolution No. 9. Whereas, the operation of the storage pool committee in past years has proved to be of valuable assistance to the watermaster in providing an orderly distribution of rental water.

Therefore, be it resolved, that a pool committee again be appointed by the Chairman of the Committee of Nine for the following purposes:

1. to determine general policy regarding source of rental water;
2. to assist the watermaster in the allocation of rental water;
3. to consult with the watermaster on ways to most fully utilize available storage water.

Resolution No. 10. Whereas, it is in the best interest of the water users of Water District No. 01 to account for all diversions which might adversely affect any prior natural flow or storage diversions be it resolved that the watermaster shall collect records of water diversions during the entire year.

Resolution No. 11. Whereas, Mr. Clifford N. Scoresby served on the Committee of Nine faithfully and conscientiously for 24 years, 19 of them as secretary; and, whereas his career and services were terminated by his death on August 3, 1977,

Now therefore, be it resolved, by the waterusers of Water District No. 01 at their annual meeting held in the City of Idaho Falls, Idaho, this sixth day of March, 1977, that they express their deep appreciation for his many years of dedicated service, and

Be it further resolved, that this expression of appreciation be conveyed to his family.

RESOLUTION

WHEREAS, at all times prior to June 5, 1976, the Teton Dam and Reservoir was a very necessary multi-purpose project, and

WHEREAS, the collapse of the Teton Dam which occurred June 5, 1976, has not in any manner altered the necessity for the Teton Dam and Reservoir, and

WHEREAS, in 1977 there was an extreme drouth condition and it appears that in 1978 there might be a flood condition, both of which could have been controlled by the Teton Dam and Reservoir, and

WHEREAS, future increased demand for water, flood control, power and recreation can only be met by adequate upstream storage which the Teton Dam and Reservoir would supply.

NOW, THEREFORE, BE IT RESOLVED that the Congress of the United States be urged to immediately commence the reconstruction of the Lower Teton Project in order that the benefits to be derived therefrom may be utilized as soon as possible.

BE IT FURTHER RESOLVED that a copy of this Resolution be presented to Water District No. 1 at its annual meeting in Idaho Falls, Idaho, March 6, 1978, for its endorsement and concurrence.

BE IT FURTHER RESOLVED that copies of the Resolution be sent to each member of Idaho's Congressional delegation.

RESOLUTION

CERTIFICATE

The foregoing is a true and correct copy of the Resolution passed March 4, 1978, by the North Protective Union Association at its annual meeting held at St. Anthony, Idaho.

Dated this 4th day of March, 1978.

Chairman.

RESOLUTION

WHEREAS, the Committee of Nine has long been the advisory body whose judgment and advice has influenced water decisions in Water District No. 1 and the State of Idaho; and

WHEREAS, LEONARD GRAHAM has demonstrated outstanding service to his area neighbors, the Committee of Nine and Water District No. 1 for thirty (30) years; and

WHEREAS, LEONARD GRAHAM has distinguished himself among his peers for his additional involvement in water matters including the Palisades Dam Project, the Idaho Water Resource Board, the Upper Snake River-Waterusers' Protective Union, the American Falls Replacement Dam Project, and the Teton Dam Project; and

WHEREAS, LEONARD GRAHAM has been acclaimed for outstanding service by the Idaho Waterusers Association and the United States Department of Interior; and

WHEREAS, LEONARD GRAHAM has long served Water District No. 1 and its waterusers as a distinguished Chairman of the Committee of Nine; and

WHEREAS, LEONARD GRAHAM has gained the respect of all Idaho citizens for his distinguished career as a judge, and for those attributes of honesty, friendship and warmth he demonstrated to all his friends;

NOW, THEREFORE, BE IT RESOLVED, that this body here assembled as Water District No. 1 at their annual meeting on this 6th day of March, 1978, do hereby extend their heartfelt thanks and appreciation to LEONARD GRAHAM for thirty (30) years of distinguished service and leadership to the Water District and the State of Idaho;

BE IT FURTHER RESOLVED, that certified copies of this Resolution be forwarded to the Idaho Congressional Delegation, the Governor of Idaho and the Idaho legislature.

BE IT FURTHER RESOLVED, that the members of this body here assembled now rise in standing ovation as a token of thanks to LEONARD GRAHAM for his friendship and service to us all.

MEMORANDUM OF UNDERSTANDING

This memorandum of understanding is entered into by and between the State of Idaho Department of Water Resources, hereinafter called the Department and the water users of Water District 01, Upper Snake River, hereinafter called Water District 01 acting through the advisory committee known as the Committee of Nine.

WHEREAS, the statutes of the State of Idaho provide for the Department to administer and supervise the distribution of the waters of the State to those holding valid rights to the use thereto; and

WHEREAS, the Committee of Nine, as advisors to, and elected representatives of, the water users of Water District 01, voted unanimously on December 10, 1977 to recommend that Water District 01 enter into a cooperative program with the Department to provide watermaster services for Water District 01; and

WHEREAS, the Committee of Nine will serve as advisors to the Department in matters relating to the operation of Water District 01:

NOW, THEREFORE, the Department agrees to provide the following services to Water District 01, effective upon signature of this Agreement and upon authorization and adoption of the Agreement and budget to implement the agreement by the regular meeting of Water District 01 on March 6, 1978:

1) To provide watermaster and associated services to Water District 01 for the period from the effective date of this Agreement until March 4, 1979, or until the end of any subsequent water district year as agreed to by the water users of Water District 01 at their annual meeting and the Director of the Department. Such watermaster services will be provided under the direction of the Regional Supervisor of the Department's Eastern Region consistent with Chapter 6 of Title 42 Idaho Code.

2) To provide the equivalent of 2/3 of a man year of the Regional Supervisor as watermaster throughout the Water District year and to provide any additional part time or full time employees necessary for the operations of Water District 01.

3) To provide office space as necessary for operation of Water District 01 and to provide the Department vehicles for use by full time employees of the Department, to conduct Water District 01 business, and to share the use of other Department equipment and facilities as necessary to equitably distribute the waters to the users within Water District 01.

WATER DISTRICT 01 agrees as follows:

1) To pay to the Department, on an advance basis, sufficient funds to cover the costs of operations incurred in providing watermaster and associated services to Water District 01, provided, however, that reimbursement for the watermaster shall not exceed 2/3 of the personnel costs of the Regional Supervisor, and provided further that all other costs incurred in conducting Water District 01 business will be paid in full. Indirect costs will be paid at the rate utilized by the Department in federal contracts, modified to reflect direct cost identified as a Water District cost. Mileage and per diem costs will be based upon the rate provided by state law for state employees.

Nothing in this Agreement will act to change, modify, or release either party of any obligation or responsibility provided by contract or by law.

SIGNED this 5 day of MARCH, 1978.

C. STEPHEN ALLRED
Director

Department of Water Resources

LEONARD GRAHAM
Chairman
Committee of Nine

File: Water
District 01

February 13, 1978

Mr. Robert Ford
Bureau of Budget Policy Planning
& Coordination
Statehouse
Boise, Idaho 83720

Dear Bob:

Water District 01, through its advisory board, the Committee of Nine, has requested that the Department of Water Resources provide watermaster services for the Water District. Funds for these services will be provided by the Water District without state expense. Expenditures by the Department would be limited to the funds actually received from the Water District as set in the Water District Budget, subject to approval by the water users at their annual meeting on March 6, 1978.

The Department needs approval of a supplemental budget request for Fiscal Year 1978 and approval of an additional request for Fiscal Year 1979. These two requests are necessary for the Department to begin providing the requested services effective March 6, 1978. The following is the estimated budget from which expenditures will be limited to available funds received from the Water District. I recommend that our budget reflect an appropriation to a watermaster service fund, subject to funds being received from the water district.

FISCAL YEAR 1978 (Supplemental Request)

FTE

1 Limited Service Watermaster
1 " " Assistant Watermaster
11 Temporary or Part Time Hydrographers

Personnel Costs	\$40,000
Operating Expenses	<u>25,000</u>
Watermaster Service Fund Total	\$65,000

* gage height

Filling part of October 11, 1900 rights; the natural flow in the river has held up well this year. It has started to drop now and I expect a further drop over the weekend. The cut will probably drop to 1898 on Monday or Tuesday.

PRECIPITATION

	<u>LAST WEEK</u>	<u>MONTH TO DATE</u>	<u>NORMAL FOR JULY</u>
Moran	.07	.07	.97
Island Park	.13	.13	1.02
Palisades	.62	.62	0.95
Ririe	0	0	----

Jackson Lake is expected to fill to its restricted capacity July 12.
Palisades on about July 15. However, Palisades will contain some American Falls
water. The Palisades 1939 rights will probably be in effect for a few days.

Computer terminal has been installed in the Water District Office, 1515 Lincoln Road. We are in the process of programing a list of diversions and water rights for the 1978 operation.

In the past, many people who have storage water have not decided where the storage water would be pumped or diverted until late in the season. This year, for proper accounting, it will be necessary for us to know where all storage water will be diverted prior to the start of the irrigation season.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
EASTERN REGION

John V. Evans
Governor

C. Stephen Allred
Director

1515 Lincoln Road
Idaho Falls, Idaho 83401
(208) 523-7186

April 14, 1978

Mrs. Mary Smith
Attorney at Law
Fremont-Madison Irrigation Dist.
20 South 2nd West
Rexburg, ID 83440

Dear Mary:

As you will recall, last year the Department of Water Resources was requested by water users to improve the methods used in distributing and accounting for water in Water District No. 01. In response to this request, the Department is requiring improvements on all diverting works and measuring devices within the District which do not provide an adequate means of regulation.

In addition, we must identify water rights associated with each diversion to allow us to implement a computer accounting procedure. Therefore, it is essential that we know before the start of the irrigation season the amount of storage water that has been allocated for each diversion. In the past, storage water has been shifted between diversions during the season. This practice makes accurate accounting very difficult. We hope to eliminate this problem during 1978 by requiring that each water user decide where his storage water will be diverted prior to the start of the irrigation season. I request that you contact all of the individuals and companies who receive storage water through Fremont-Madison Irrigation District and obtain a list of the legal descriptions for the points of diversion where storage water will be diverted and the amount of storage water assigned to each diversion.

Your assistance in this matter is greatly appreciated.

Very truly yours,

RONALD D. CARLSON
Supervisor,
Eastern Region

RE: WATER DISTRICT NO. 01

Mr. Ronald D. Carlson, Watermaster
Water District No. 01
1515 Lincoln Road
Idaho Falls, ID 83401

Dear Mr. Carlson:

Reviewing the Water District files within our Eastern Region area, we fail to find the Minutes and Adopted Budget for your Annual Water District Meeting that was to have been held March 6, 1978, as provided for in Section 42-605, Idaho Code. The minutes and adopted budget are to be submitted to this office within 5 days after such meeting.

Please advise us if no meeting was held or if the meeting was held and no water-master elected or budget adopted.

Your cooperation in this matter is greatly appreciated.

Very truly yours,

LOY H. JOHNSON
Senior Water Resource Agent

LHJ:me

WATER DISTRICT NO. 01 - COMMITTEE OF NINE MEETING

Idaho Falls, Idaho

December 10, 1977

Copy
~~ORIGINAL~~
RECEIVED

JAN 8 1978

Department of Water Resources
Eastern District Office

The Committee of Nine was called to order on December 10, 1977, Idaho Falls, Idaho, at 10:00 A.M., by Chairman Leonard Graham.

Committee of Nine members present were Reed Murdock, George Stromire, R. Willis Walker, Jim Steele, Kenneth Anderson, William Watt, and Lester Saunders.

Alternate member present: Burdell Curtis.

Advisory member present: Merle Kunz

Others present were Leon Grieve and Bob Johansen, American Falls Reservoir District No. 2; Clifford Montgomery, Twin Falls; Ted Diehl, North Side Canal Co.; and Arthur L. Larson, Watermaster.

Business on the agenda was review of applications for the position of Watermaster for Water District No. 01. Art Larson explained the point system used to rate the relative qualifications of the candidates and the committee then reviewed the ratings of the thirty applicants. This resulted in narrowing the field to the four best qualified men.

Meeting was then adjourned for lunch.

Meeting reconvened at 1:05 P.M.

Three of the four final candidates under consideration were present for interviews during the afternoon.

Each candidate explained his salary expectations and his concept of the operation of the Water District should he be selected for Watermaster. The proposal of one of the candidates was that he would negotiate an agreement with the Idaho Department of Water Resources somewhat similar to the present arrangement with the U.S. Geological Survey, with the opportunity to share a computer terminal, copying machine and other costly specialized equipment and services in order to do a better job at less cost.

Following interviews and question period, alternate and advisory members and others were then excused.

The Committee of Nine then discussed the relative merits of each of the candidates under consideration with evaluation of an independent Water District operation versus a cooperative program with the Idaho Department of Water Resources as proposed by applicant Ronald D. Carlson.

Copy
~~ORIGINAL~~

This set of Minutes for your files
Ron has a copy of these
Minutes but it was a
copy of the draft before
Mr Murdock had signed -
(2nd Page)

Copy
~~ORIGINAL~~

Bill Watt then made the motion that the Committee of Nine unanimously recommend Ronald Carlson as the new Watermaster and that the Committee also recommend Lola Dunn be hired as Assistant Watermaster. Motion seconded by Kenneth Anderson. Motion carried.

Meeting adjourned.

Respectfully submitted,

Reed D. Murdock
Reed Murdock, Secretary
