VICTOR, IDAHO, July 24th 19

Department of Reclamation,

Mr. W.G. Swendsen, Commissioner,

Boise, Idaho.

Dear Sir:

I am incloseing here-with a copy of the minutes of a meeting recently held which is self explanatory.

We shall be glad to have your confirmation of our action, and your recommendation of an Engineer to measure the water as outlined in the minutes.

If you have no objections, Mr.T. Ross Wilson, of this valley, an Engineer, with a state licence, and who is qualified to measure water might be secured.

We shall hope to hear from you by return mail, and shall thankfully recieve any instruction you may offer, in regards to the best means and methods of speedily accomplishing the work expected of us.

Yours truly,

C.M. Hatch

Committee Chariman.

1919

July 12, 1919

Minutes of a meeting of the water users of Teton County, held in the County Court House at Driggs, Idaho. at 8:30 P.M. Called to order by Atty. R.S.Wilkie.

Nahum Curtis was elected Chairman, and L.T.Varin was elected secretary by unanimous vote of the meeting.

Atty. R.S.Wilkie stated that the purpose of the meeting was to create a separate irrigation district for Teton County.

State watermaster John E. Empey of District 36 being present was asked by the chairman to address the assembly, which he did. After going over the water situation in a general way, showing the extensive size of his district, and the requirements of the law in the distribution of water according to priority of decree, Mr. Empey stated that in his experience he had observed that there was apparently more water flowing out of this valley during the irrigation season than there was coming into it from the various mountain streams.

And that it had long been his opinion that we were and should be an independent irrigation system, and that he would be glad to so recommend to the state officials.

Ed. S. Little and others stated that they had lived here from the early settlement of this valley, something like twenty five years ago, and that where the ground in the early days was dry along the low land adjoining the river that it is now a swamp, and that hundreds of springs and small streams are now active where there were none during the early settlement, and use of the water here. Also that the river where it leaves this Valley is many times larger now than it was in those days. It was pointed out that not a few ranches that were located in 1887 to 1895 along the river bottom have been abandoned because of the sub arising, and practically making of them a swamp, and that the cause of all this was that the waters of the small mountain streams had been turned out and used for irrigation purposes, early in the season, on higher ground, thus storing the water in the ground to spring up later in the season along the low land adjoining river.

After general discussion, Geo. Tonks moved that we appoint a committee of three to employ a competent engineer, to measure all the waters that flowed into the Valley, and then to measure the river as it leaves the Valley, and to submit the figures to the commissioners of reclamation for the state of Idaho as evidence that we are an independent irrigation system, and to request that we be acknowledged and set aside as such. Seconded by Chas. Linsemann, and carried unanimously. The following committee was appointed, C.M.Hatch, Eli Curtis and Ed.S.Little. Mr. Wilson moved that the expense of measuring the waters be charged to the water users as water taxes. Seconded by C.M. Hatch, carried unanimously.

E.Taylor moved that we adjourn, carried.

Nahum Curtis

Chairman

L.T.Varin
Sec.

July 24, 1919.

Re: District 36C.

Mr. C.M. Hatch,
Victor, Idaho.

Dear Sir:

This will acknowledge yours under date of July 21st with copy of the minutes of the meeting held by the water users of Teton County at Rigby, Idaho.

Upon the passage of the law in 1915 abolishing the office of Water Commissioners and the Three Water Districts in the state, this office had in mind the creating of new water districts, the method of doing so by water sheds. District No. 36 comprises Snake River and all tributaries from the Montana and Wyoming lines to the Milner Dam. However, if it can be shown conclusively to this Department that conditions are such as stated in the minutes, I see no reason why this office will not willingly comply with the wishes of the water users in the said district.

The scheme as suggested should be followed out in its entirety, however, it will entail considerable work. The data so collected should then be presented under affidavit to this Department and same will be given full consideration and if proofs warrant it, the wishes of the water users will be carried out.

Very truly yours,

W. G. SWENDESEN,

Commissioner of Reclamation.

By

Deputy.

A F F I D A V I T.

STATE OF IDAHO,
SS
County of Teton

T. Ross Wilson being first duly sworn deposes and says; that he is a regular licensed and practicing civil engineer of the State of Idaho, and that pursuant to instructions received from Messrs E. C. Little, C. M. Hatch and Eli Curtis, a special water committee appointed by the water users of Teton County, Idaho, he measured the discharge of all of the streams flowing into Teton County from which any irrigation water is or has ever been used for irrigation purposes in said County, and also measured the discharge of Teton River the only stream flowing out of Teton County between the 26th and 31st days of August, 1919, with the results shown in the tabulation below.

In general the measurements were made above all points of diversion of any irrigation ditch or ditches of the streams flowing into said County and below all tributary streams with one exception to this, was the measurement of Trail Creek to all her tributary streams, Game Creek and Warm Creek were measured respectfully as those streams joined Trail Creek below points of diversion.

The weather during the time of these gages was uniformly fair there being no storms during the period of August 15th to August 31st, both dates inclusive.

To determine the velocity of each stream I used a Price Watter Current Meter No. 1398 made by W. and L. E. Gurley. This water meter was purchased from Thomas R. Newell of Idaho Falls, Idaho, and according to his statement had not been used since it had been rated by the U. S. Bureau of Standards. In making my calculation for velocity I used the rating table furnished by the above named Bureau.

The following tabulation taken from my field book will show the method used in measuring each stream.

MAHOGANY CREEK.

| <u>Station</u> | <u>Depth.</u> | <u>Rev.</u> | <u>Time.</u> | <u>Velocity.</u> | <u>Area.</u> | <u>Discharge.</u> |

PROSECUTING ATTORNEY
TETON COUNTY

DRIGGS, IDAHO,

November 1st, 1919.

Department of Reclamation,
Boise, Idaho.

Gentlemen:

Inclosed you will find affidavit
and proof of the measurements of water in
Teton County made at the request of the
citizens of said County for the purpose of
being segregated and put into a water district
by themselves.

A copy of the inclosed affidavit
has been mailed to John Empy water master of
this district at Idaho Falls, Idaho.

Yours truly,
WILKIE & WILKIE,

Re: District 36C. ✓

Mr. G. Clyde Baldwin,
Federal Building,
Idaho Falls, Idaho.

Dear Sir:

I am enclosing all correspondence and affidavits with respect to the request from the water users in District 36C, asking that they be made a separate and distinct water district. Kindly write us in detail as to your opinion concerning the granting of such request, and any additional information which you may have personally regarding the same. After the papers have served their purpose, kindly return to us for our files.

Very truly yours,

W. C. SWENSON,
Commissioner of Reclamation.
