4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☐ No ☒

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL			
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of **\$28,162.20 per year** was calculated based on the current rental rate of \$33.00 per acre-foot times a diversion volume of 853.4 acre-feet. Skyler,

I am commenting on Agreement 906, 908, and 910 that you submitted.

Comments/Questions Rental Agreement 906

- Condition 9. (Min Stream Flow Condition) Is this for all rentals in WD02 or just some? The rented rights have priority date senior to the Swan Falls Agreement cutoff 10/25/1984 I think.
- Condition 10. and Condition 11. These two seem to contradict each other, that the any combination of rights cannot do more than 4 AF/Acre but the condition 11 math shows 10553 AF/2345 acres is 4.5 AF/acre. Not sure if there is a typo in condition 10. that might make it read differently (and, or, or and/or), while the cfs/acre is still under the limits. I am not sure if this matters, but when looking at data and compliance each season this would give some questions.
- In memo under the Enlargement of Use Paragraph, you reference wr 2-2255 but I think it should be 2-2251

Comments/Questions Rental Agreement 908

- None

Comments/Questions Rental Agreement 910

- This rental is including a water right that is junior to the Swan Falls agreement (2-10014) but does not have the minimum stream flow condition that 906 does. Does condition 7 suffice?
- Condition 11 water right list is from a different diversion. If the water will be diverted from the Grand View Mutual Canal, those water rights listed are delivered at the Bybee and should be adjusted to reflect the POD of Grandview Mutual.

Let me know if there are question about my questions, thank you.

I have completed my review of a Water Supply Bank Rental Application 3063 with the point of diversion within Administrative Basin 2 and Water District 2 . The applicant is the Anderson Family Irrevocable Trust. They proposes to to rent 176 acres worth of irrigation for at least 5 years. They did not propose spesific water rights to rent. I found a amagamation of lease contracts; 1927, 1555, 1587 and 1622 that fit the applicants proposal from 2025-2026. Attached is a copy of a draft rental agreement, review memo, and map of the place of use. If you have any comments on the applicant's proposal or my review, please let me know within 7 days. If you have any questions or concerns, please let me know.

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 3063 was sent in by the Anderson Family Irrevocable Trust and received by the Department on September 26th, 2024. The applicant proposes to rent 176 acres worth of irrigation from at most 5 years diverting from the Snake River. The applicant did not request specific water rights to rent from. An amalgamation of lease contracts and water rights (WR) depicted in the table below filled the applicant's request from 2025-2026. The proposed point of diversion is within the Snake River Basin Moratorium Area and Trust Water Area. This application is intended as a renewal of rental agreement 377, which expired on December 31st, 2024.

Table 1. List of WSB Lease Contracts Rented to fulfill the applicant's rental proposal.

Contract #	WR #	Rate (CFS)	Vol (AF)	Acres	Rate/Acre	Vol/Acre
1927	2-2356	0.71	180.0	36.0	0.02	5.00
1555	2-10395	0.96	204.4	45.4	0.02	4.50

<i>Combined Total</i>		3.46	853.4	176.0	0.02	4.85
After Reduction to Achieve 4.0 AF/Acre.		3.46	704.0	176.0	0.02	4.00

AUTHORITY TO FILE:

Mark R Anderson signed the application. Mr. Anderson has the authority to file this agreement because he is a co-owner of the proposed place of use (POU) according to Idaho Tax Parcel Data. The Anderson Family Irrevocable Trust is also the current owner of overlapping WR 61-2152 according to Department records.

INJURY TO OTHER WATER RIGHTS:

The lease PODs are between 4 and 50 miles downstream of the rental POD. All PODs are within Administrative Basin 2. Since the Snake River is such a vast source of water it's unlikely, even with the large distance between the POD's, there would be any injury to other Snake River users in between the lease and rental POD's. There are no other injury concerns.

ENLARGEMENT OF USE:

The applicant is also the owner of WR 61-2152 which authorizes the irrigation of 68 acres diverting from Little Canyon Creek and Snake River. The applicant proposes to rent the remaining acres in excess of 61-2152 authorization in Section 3A on the application. However, they did not provide a map indicating where the proposed new irrigated acres are located. They

indicate the total irrigated area, and the number of acres proposed within each PLSS Quarter/Quarter. Therefore, to prevent an enlargement of 61-2152 I recommend a condition be added to the contract limiting this rental and WR 61-2152 be limited when combined to the irrigation of 244 acres.

Water right 61-2152 authorizes a diversion volume/acre of 4.0 af/acre while the majority of the WR's being rented, with exception to 2-7127, authorize 4.5 to 5.0 af/acre. Therefore, to prevent an enlargement of 61-2152 the authorized volume should be reduced to achieve 4.0 af/acre. There are no other enlargement concerns.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The proposed POD is within Administrative Basin 2 and Water District 2. The Watermaster and Western Regional Manager were contacted for comment on February 3rd, 2025. Comment was received by the Watermaster on February 10th, 2025. They did not have any concerns about the applicant's proposal.
