**5-28-2010 SETTLEMENT MEETING**

**63-2143** - Split into 63-33232 (Ark Properties) & 63-33233(Lord Ranches)

**63-33233**

License - 63-2143 licensed 4 sources, Big Draw Creek, Dry Hollow Creek, Indian Creek and Slater Creek with a priority date of 10-21-1910 and 53 acres of irrigation showing 15 acres in the NENE, 9 acres in the SENE, 20 acres in the NESE and 9 acres in the NWSE, S23, T1N, R4E.

Claim (after split) – All 4 sources, 10-21-1910 priority date – 28.5 acres – 4.5 acres in the NWSE, 15 Acres in the NENE and 9 acres in the SENE, S.23, T1N, R4E. Added 1 point of diversion on Indian Creek in Sec. 23, NESE.

Rec – Disallowed – Forfeited/Abandoned 1979 – 1987.

Analysis: Need information on whether all the sources above are used on this property. Indian Creek appears to come in too far south of the property leaving the other 3 sources. Where are the points of diversion from these sources, etc. Note: 63-2655 is a groundwater right that was recommended for overlapping ground under this right. It overlaps in the NENE, and SENE for a total of 24 acres. 63-2655 has been objected to concerning the place of use being incorrect on the claim verses the map submitted with the claim as explained below. It appears there may be some irrigation that could be covered under this right. Need information from claimant concerning which acres the **surface** water sources irrigate and when the change in place of use occurred for the **surface** water diversions in order to apply accomplished transfer in place of use.

**63-2655**

License – 12-27-46 priority date for 1 cfs from a well to irrigate 20 acres in the NENE, and 20 acres in the SENE, S23, T. 1N, R4E for a total of 40 acres.

Claim – All same except for place of use claimed was 10 acres in the NENE, 12 acres in the NWNE and 18 acres in the SENE.

Rec – Recommended same except for place of use acres. Same quarter-quarters recommended as claimed with less acres in each 1/41/4 resulting in less cfs recommended.

Analysis: When recommendation was to be decreed a Motion to Alter or Amend was filed by claimant's attorney. An objection was also filed to the recommendation stating that there was a clerical error made in the claimed place of use. The place of use did reflect different 1/41/4's than outlined on the map with the claim. This right does overlap with 63-33233 as explained above. Need to verify that point of diversion is still correct and outline place of use irrigated from **well** with claimant. An amended claim is not needed, however, evidence that the irrigation from groundwater to the existing place of use occurred prior to 1987 is along with the location of

Need information from claimant concerning which acres the **surface** water sources irrigate and when the change in place of use occurred for the **surface** water diversions in order to apply accomplished transfer in place of use.

**63-2655**

License – 12-27-46 priority date for 1 cfs from a well to irrigate 20 acres in the NENE, and 20 acres in the SENE, S23, T. 1N, R4E for a total of 40 acres.

Claim – All same except for place of use claimed was 10 acres in the NENE, 12 acres in the NWNE and 18 acres in the SENE.

Rec – Recommended same except for place of use acres. Same quarter-quarters recommended as claimed with less acres in each 1/41/4 resulting in less cfs recommended.

Analysis: When recommendation was to be decreed a Motion to Alter or Amend was filed by claimant's attorney. An objection was also filed to the recommendation stating that there was a clerical error made in the claimed place of use. The place of use did reflect different 1/41/4's than outlined on the map with the claim. This right does overlap with 63-33233 as explained above. Need to verify that point of diversion is still correct and outline place of use irrigated from **well** with claimant. An amended claim is not needed, however, evidence that the irrigation from groundwater to the existing place of use occurred prior to 1987 is along with the location of

the place of use irrigated only from the **well**. With the mixture of this source and the sources listed under 63-33233 it is hard to tell which changed prior to 1987. Affidavit from the Lord's would be adequate.

**63-2118** – uncontested overlap that did overlap with claimed pou for 63-32536. Does not overlap with the recommended pou for 63-32536. The ADR, based on the claimant's information did not include any lands in Sec. 12. 63-2118 is for lands in Sec. 12 only.  
~~Can this be moved forward to decree?~~

**63-32536** – ADR submitted 5-18-10. Based on working with the claimant recommended lands in Sec. 1, T1N, R4E and Sec. 36, T2N, R4E for 78.4 acres from the W. Fk. Slater Creek and Unnamed stream trib. to the W. Fk. Slater Creek.

Hi Dana –

Sorry I was not available when you and Jeff called this week. Although you and Jeff have only asked about the beneficial use claim 63-32536, I will cover the problems with both claims here.

### 63-2118 –license

I cannot reconcile the acres licensed and claimed with the map submitted with the claim. The map does not show where the 105 acres irrigated are. The POU looks different in the 1987 aerial [no where close to 105 acres irrigated] than the 1998 and 2004. Also, though 3 PODs from Slater Cr were licensed, 6 were claimed, but the PODs were not shown on the map so I have no idea where these are.

So, we can sit down at the initial hearing and Jeff can show me where the irrigated areas are in each QQ and where the 6 PODs are. He commented during our conversation that the system had changed and acres had changed for 63-32536. If those system changes affected these licensed acres too, I will need him to describe when and how so that if the changes occurred prior to 1987, I can consider the changes accomplished transfers in POUs and PODs. The claimant can amend his claim if needed and hopefully we can move quickly from there to an SF5.

### 63-32536 – beneficial use

No evidence of priority was provided for the 1910 priority date. Though I have addressed this in 2 prior emails and the conversation I had with Jeff last week, the letter with the 1968 date that you provided from attorney Anderson from the 63-2143 license file does not provide evidence of priority. [63-2143 - Jackson, now Ark Prop with 1910 priority date]. When we exchanged emails about this in 2006, you stated you could get an affidavit from Erin Lord but I never received one. I explained at length to Jeff that I needed specific information as far back as they can go about the history of water use on this property.

Additionally, the claim states the POD is in Sec 1 but the field exam and the map attached to the claim shows it in Sec 36 NESW. Once we agree on the acres, the Lords can amend the claim but I will need to sit down and discuss this with Jeff with the maps in front of us.

At this point, Dana, I cannot spend any more time on this until I get evidence of priority so a conference call with you and Jeff as you suggested in your voicemail is not going to be productive. Hope this helps.

Dana -

I don not have any earlier aerals to review. The claimant will need to provide those as evidence of acres irrigated and the accomplished transfer. Vicky

Vicky:

It appears that 1987 was a very dry year out there. Could you check some other aerial photographs for other years? Also, aerial photos taken earlier during the irrigation season, rather than later, would show the POU better. The change in POU would predate 1987 and should be reflected on aerial photos at least back to the late 1960's, if not even earlier. I will get back to you on the point of diversion issues.

Thank you,  
Dana

I am reviewing the above claim you filed on 10/30/2006, for your client, Erin Lord. The claim is based on a license. Here are some issues that need to be addressed before I can recommend this claim as allowed:

1 - Points of diversion: The license map does not include the locations of the 3 licensed PODs. The claim map does not include the locations or these 3 licensed POD or the 3 additional PODs claimed. Please submit a map of the PODs. Also, if the claimant intended for the 3 additional PODs to be included under the accomplished transfer statutes, then I need information about how/when these PODs changed.

2 - Neither the license nor the claim provide a description of the diverting works as required

under claim item #5. IT is reasonable to assume that the diversion and delivery works have changed since the license was issued 96 years ago. Please provide information about the current diversion and delivery system.

3 - The 1987 aerial shows very little, if any, irrigation in the claimed place of use. Additionally, the claimed place of use does not match the licensed place of use. If the claimant contends the an accomplished transfer took place, please submit information regarding how and when this took place.

Right now, due to the above issues and the impending deadline IDWR is under to submit the Basin 63 Part 3 Directors Report in a few weeks, I must have the information I requested by 11/13/2006. Otherwise I will make a recommendation based on my best estimate of the information in the license and the 1987 aerial which show considerably less than 105 acres irrigated. Your client can then object and will have more time to submit information.

Thanks.

This claim was filed by attorney Dana Hofstetter on behalf of Erin Lord. See email to Dana attached here for the problems I found in my initial review. Her reply is in the correspondence in the claim file.

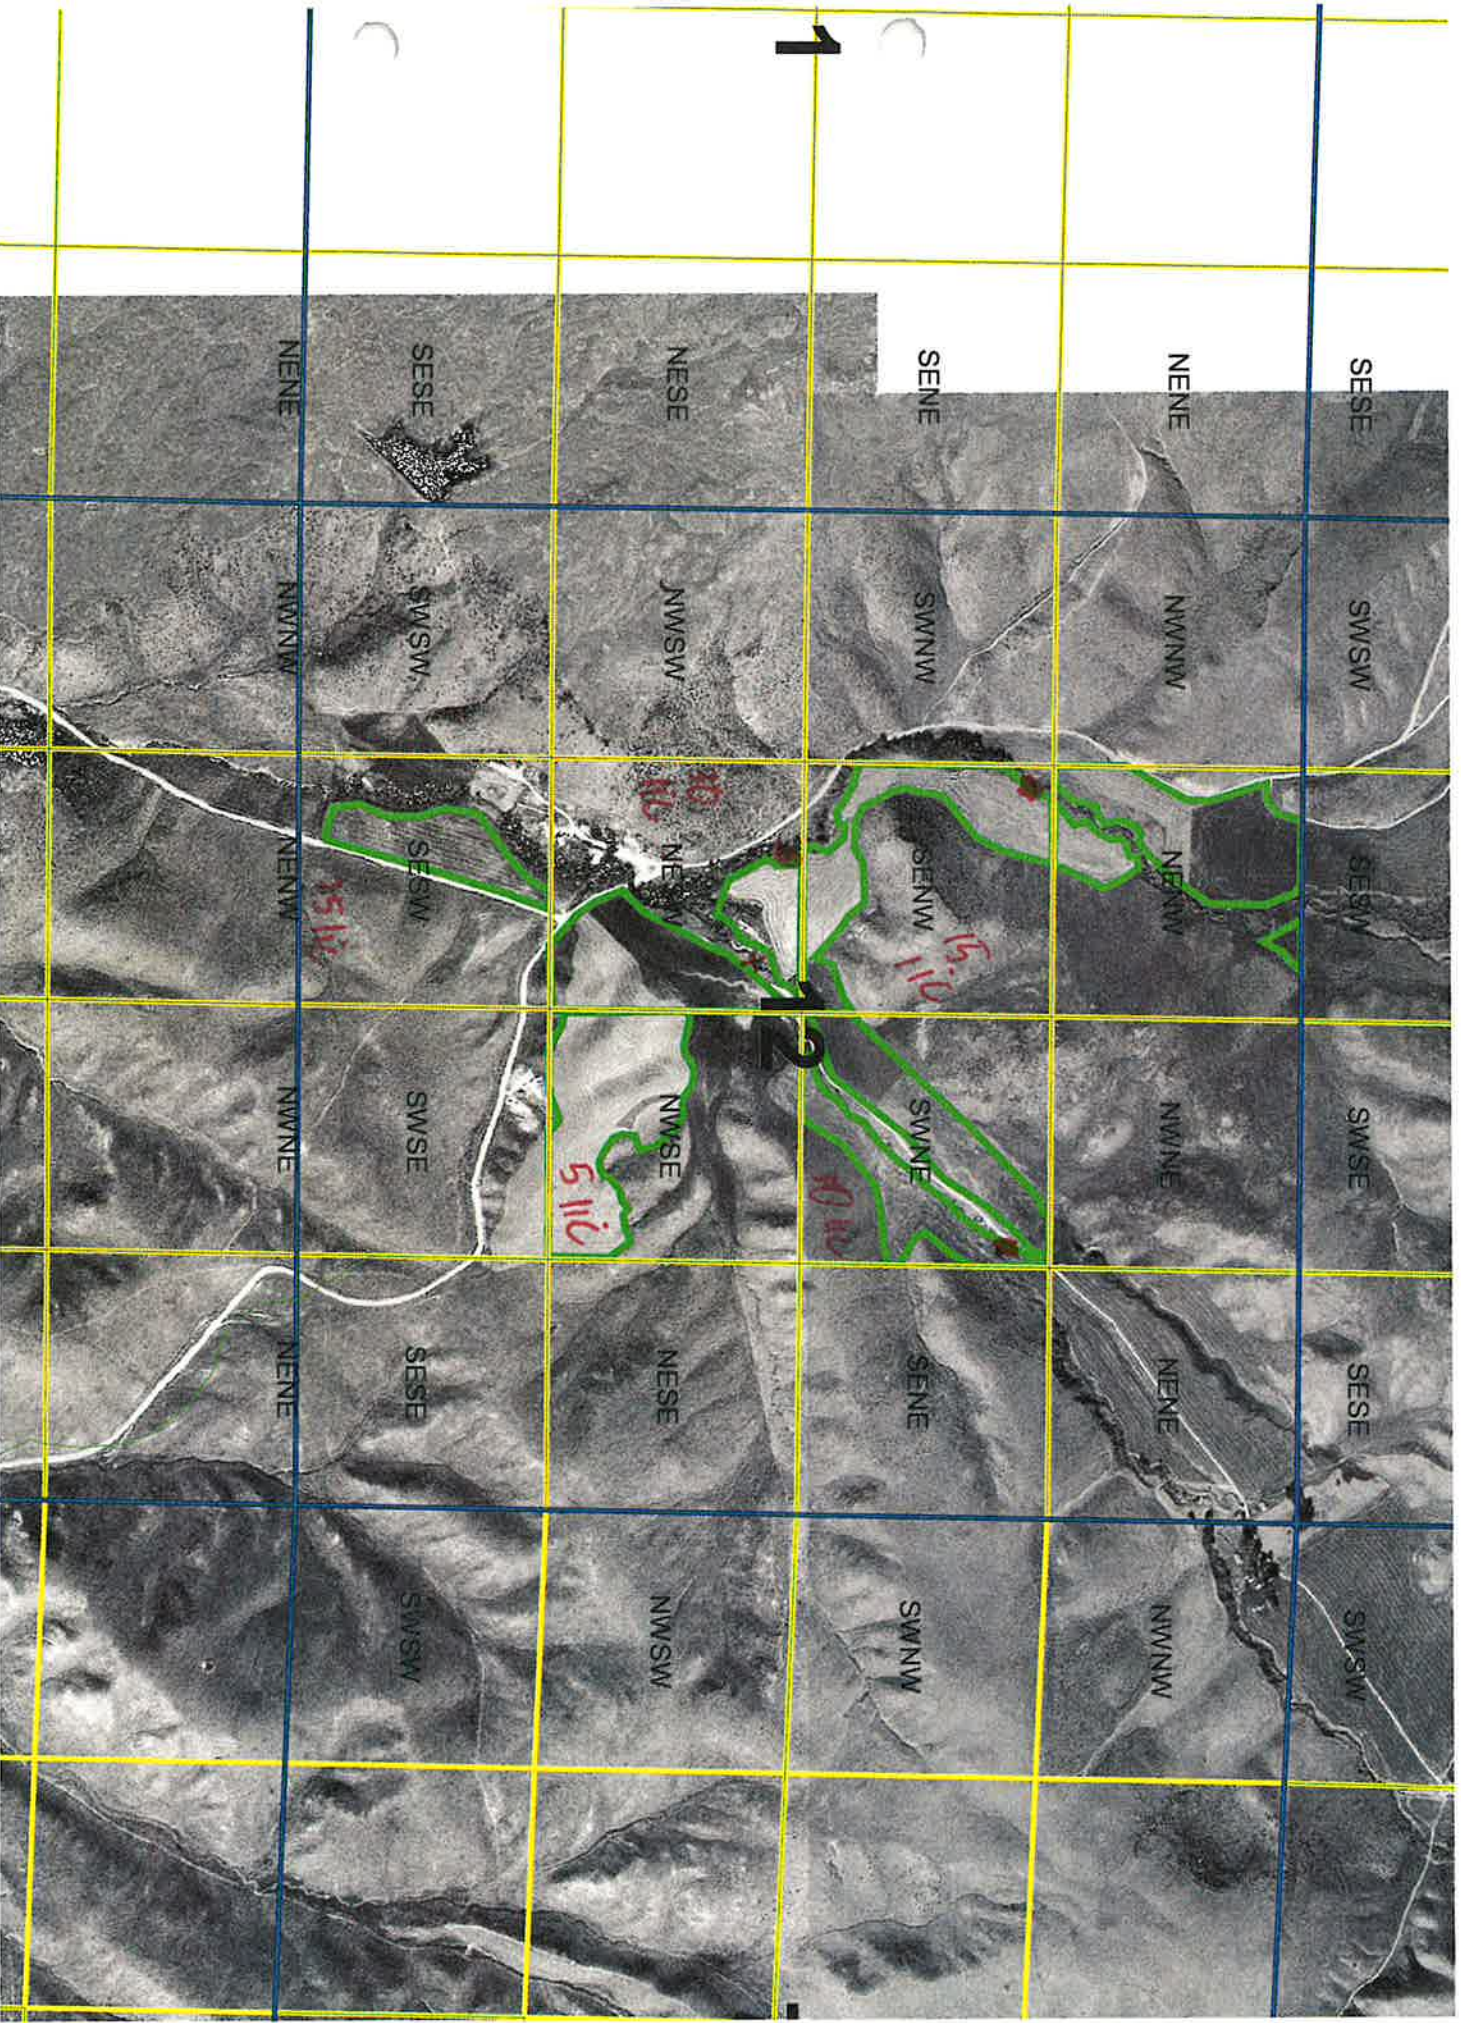

63-2118 is based on an old license for 105 acres of irrigation in the T1N R4E S 12 from Slater and N Slater Creeks, with a 1910 priority date. The claim is incomplete, claims QQ not licensed and 3 additional PODs, and does not provide information as to the where the specific PODs and POU are. The license map is likewise vague. Here is a table of QQ licensed and claimed:

| <u>QQ</u> | <u>licensed</u> | <u>claimed</u> | <u>found on 1998 aerial</u> |
|-----------|-----------------|----------------|-----------------------------|
| SEnw      | 15              | 15             | 11.7                        |
| SWNE      | 30              | 17             | 17                          |
| NESW      | 30              | 18             | 16.7                        |
| NWSE      | 5               | 18             | 15.8                        |
| SESW      | 25              | 5              | 7.2                         |
| NENW      | <u>0</u>        | <u>32</u>      | <u>15.3</u>                 |
| Total:    | 105             | 105            | 83.7                        |

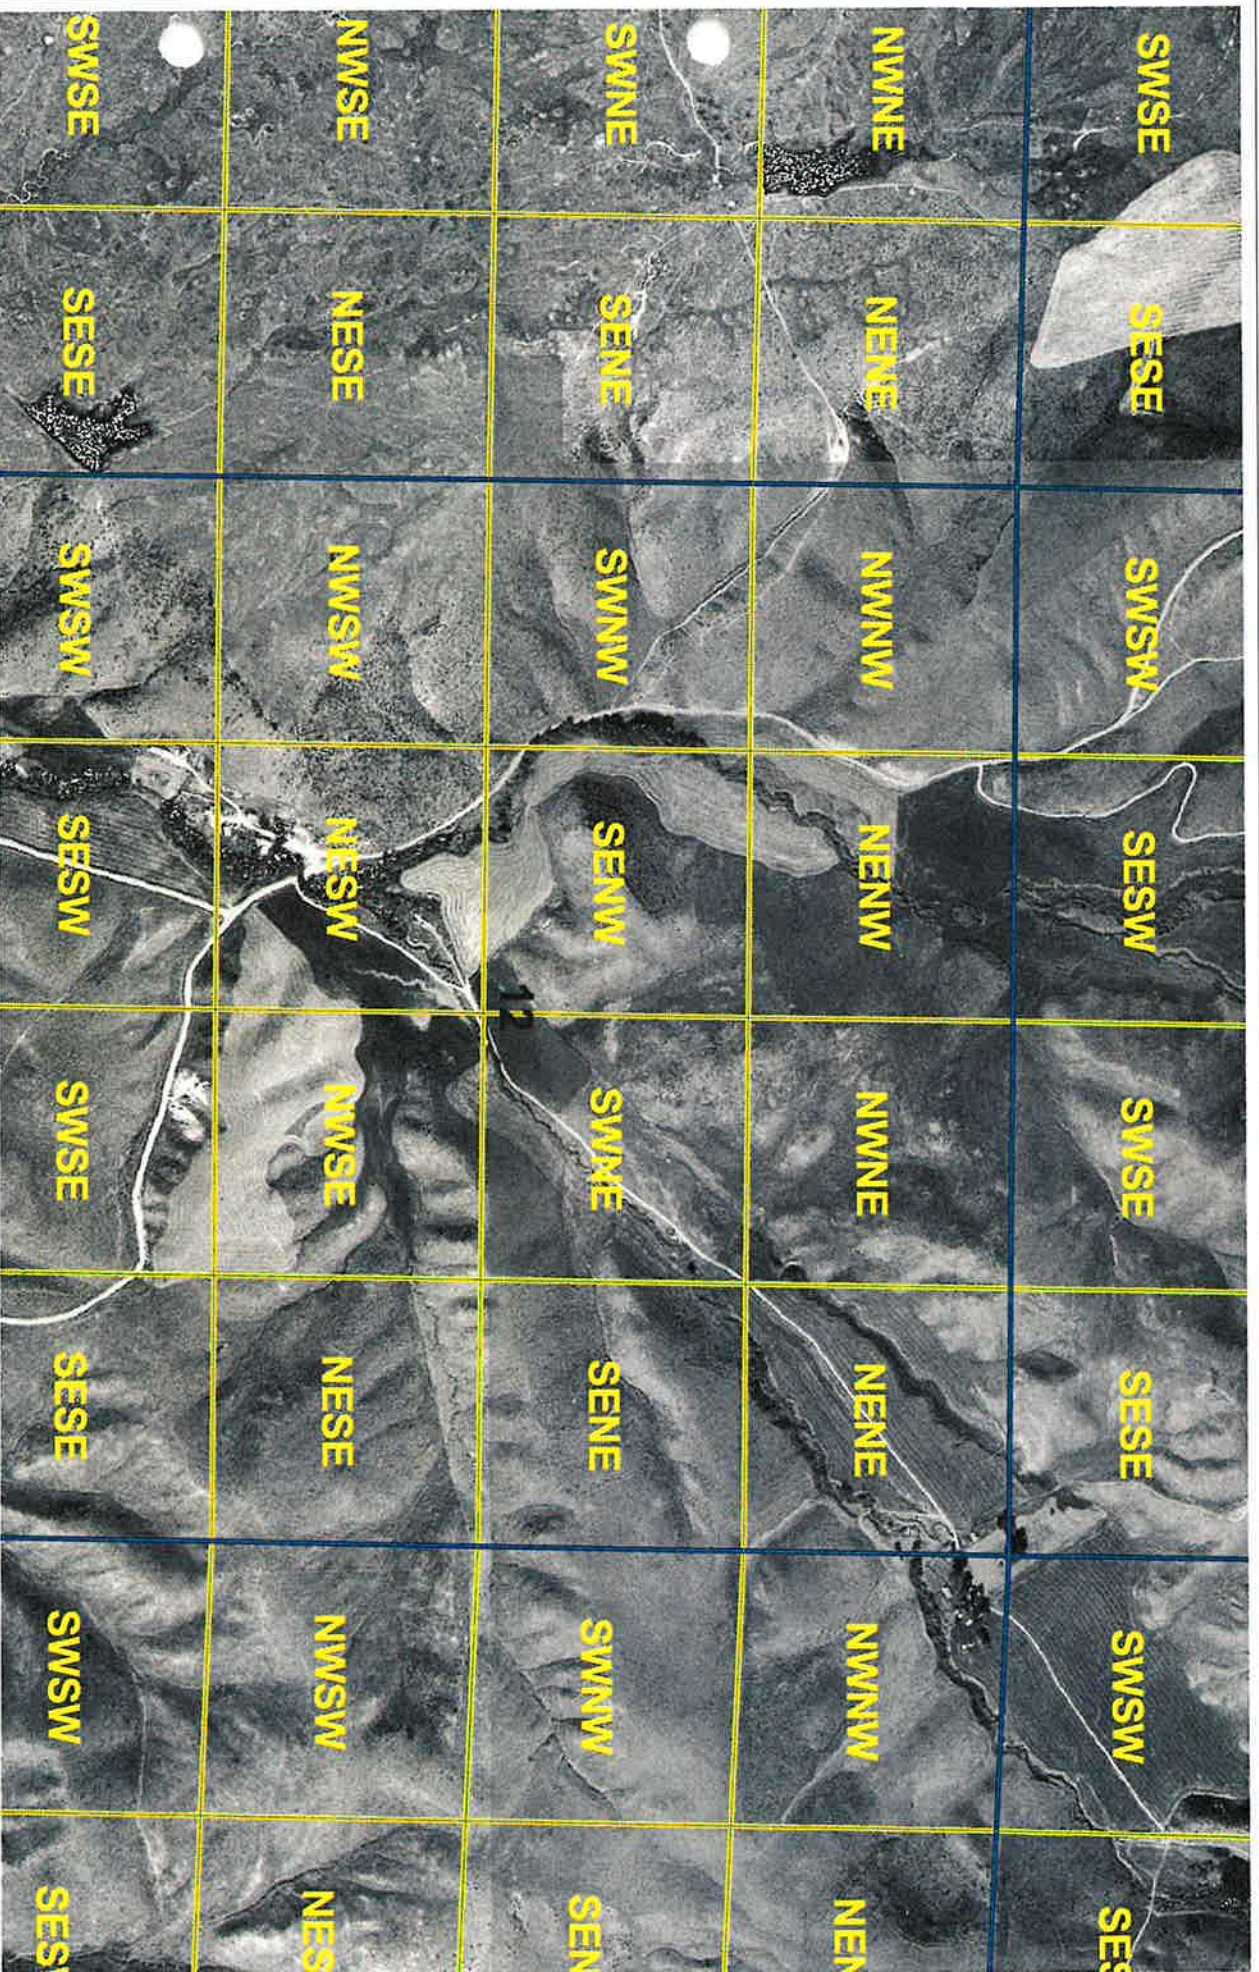

A rough estimate of the acres irrigated based on Arcview review of 1998 aerials shows about 82 acres irrigated, not the 105 licensed. The 1987 aerial shows considerably less irrigation than the 1998 photo. I emailed Dana on 11/7/06 regarding the information I needed to recommend this claim [information re accomplished transfer in POU and POD, specific locations of PODs, POU, info re diversion and delivery system]. She has not provided information as of today.

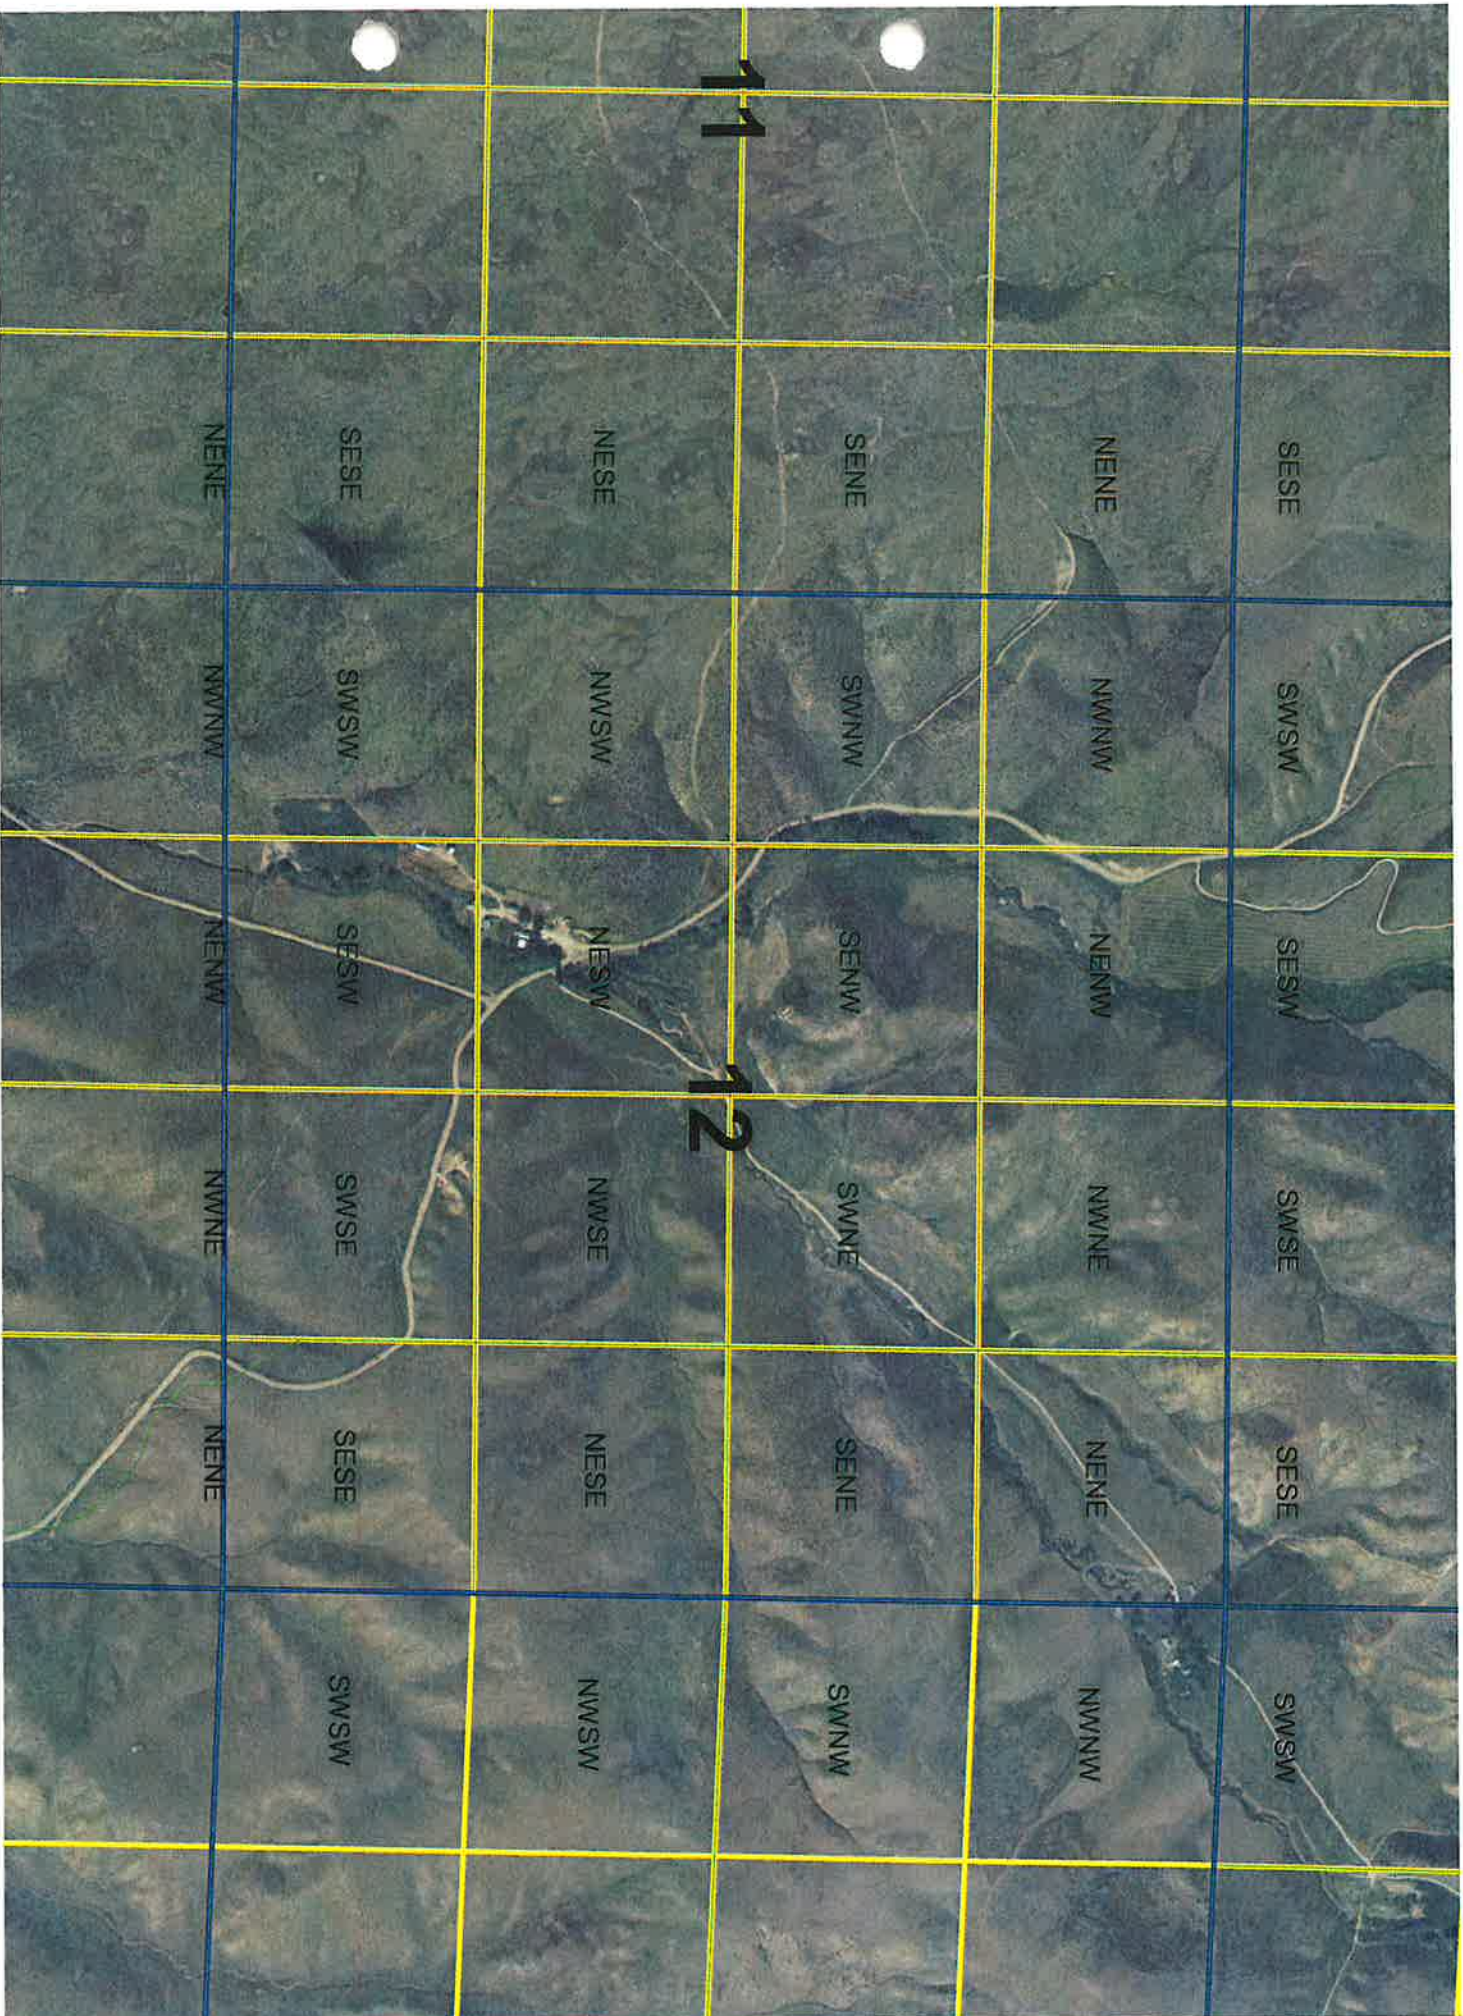

I will recommend the 3 PODs as licensed as as best I can and do the same for the POU in the QQ originally licensed. Will recommend 68 acres irrigated -- will not recommend the acres in the NENW because I cannot see that they are irrigated in the 1987 NAPP. Claimant can file an objection and provide correct information.
