Water District 29D
2023 Watermaster Report
February 26th, 2024
By: Kristin Evans

- The total volume (24 HR CFS) of water delivered to water users in the district was 998.30 24 HR CFS. This number is derived from measured diversion and an estimate of water diverted by water users that divert less than five acres and do not require measuring devices to be installed. Estimates were calculated based on the sum total of the authorized rate of the water right x 85 days.
- Points of diversion that did not have measuring devices installed or water rights out of priority with the Snake River were curtailed. Some diversions were locked. Water users were curtailed if their priority date was junior to the priority date being delivered on the Snake River. Junior water users who leased exchange water from the Tribe for mitigation were permitted to irrigate out of priority with the Snake River. 23 water users leased mitigation water from the Tribe.
- The total expenses for the district were \$25,925.00
- The total number of days I worked was 138 as of December 28th, 2023.
- Attached is the spreadsheet with my records of distribution and the Tribal delivery.
