To whom it may concern,

I married into the family in 1959. The following water right claims are to the best of my knowledge from that time.

Claim # 11-4301: I have been using the water from Sheep Hollow Creek to water my lawn from the time I was married and my home was built.

Claim # 11-8003: The water from Sheep Hollow Creek has been used to irrigate the field below my home from the beginning of the homestead. I remember times when the family would talk about having to keep the creek clear of debris to make sure it would flow freely to maximize the flood irrigating in that field.

Claim# 11-8005: The water from Sheep Hollow Creek has been used to water stock animals in the field below my home from the beginning of the homestead. I remember times when the family would talk about having to keep the creek clear of debris to make sure it would flow freely to maximize the water for the animals.

Claim # 11-8006: The water from Sheep Hollow Creek was used to water stock animals during the summer months, when they used the field to summer animals, from very early in the homestead years. I remember the family talking about the young boys going up to watch the animals for days at a time.
