1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. Any violation of the terms of this lease may result in enforcement procedures pursuant to Idaho Code § 42-351 for illegal diversion and use of water and may include civil penalties pursuant to Idaho Code § 42-1701B.
4. A right accepted into the bank stays in the bank until the Board releases it, or the lease term expires. A right may be released from the bank upon request, provided the Board approves the release. Unless approved by the Department, leased rights may not be immediately available for release.

Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.

WATER SUPPLY BANK LEASE CONTRACT No. 1943

9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
    a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
    b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. Leased Right Nos. 21-7089 and 21-12952 are limited to the irrigation of a combined total of 127 acres in a single irrigation season.
13. Right Nos. 21-7089 and 21-12952 are limited to a total combined diversion rate of 1.92 cfs.

15. Leased Right No. 21-12952 is for an enlargement of 31 acres within the place of use described for this right.
16. Leased Right No. 21-12952 is subordinate to all water rights with a priority date earlier than April 12, 1994, that are not decreed as enlargements pursuant to Section 42-1426, Idaho Code. As between water rights decreed as enlargements pursuant to Section 42-1426, Idaho Code, the earlier priority right is the superior right.
17. The use of Water Right No. 21-7089 for irrigation may begin as early as April 1, provided other elements of the right are not exceeded. The use of water before May 15 under this remark is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date a partial decree is entered for this right.

4. GENERAL INFORMATION

A. Is the diversion works or system owned or managed by an irrigation district or water delivery company? Yes ☐ No ☑
If yes, provide written consent from the company, corporation or irrigation district authorizing the proposed sale or lease (Attachment 4A).

B. Please provide a description of the current water diversion and delivery system.
A single well delivered water through a pivot sprinkler irrigation system

C. Describe any other water rights used for the same purpose at the same place of use as the water right being offered to the Bank. Water right 21-7089 shares the same place of use and point of diversion. It is also offered to the bank. Canal water has been obtained through Egin Bench Canals Inc that now waters the property.

D. Are any of the water rights identified in Section 4C stacked with the water right proposed for lease? Yes ☑ No ☐

If yes, explain the relationship between the different water sources and how enlargement of the authorized use will not occur if this water right is leased. In 2016, the well collapsed and the land was no longer able to receive ground water under this right. This right was not used in conjunction with canal water. No enlargement.

F. Identify annual volumes and/or rates of water diverted in the last 5 years to accomplish the beneficial use authorized by this water right. Full use of the water was used until 2016. All acres were irrigated. No measuring device was installed at the time to allow measurement of the diversion.

G. Has any portion of this water right undergone a period of five or more consecutive years of non-use? Yes ☐ No ☑

If yes, describe the circumstances and attach evidence to demonstrate how the water right has not been lost through forfeiture (Attachment 4G). See Section 42-223, Idaho Code for exceptions to forfeiture. Your application may be denied if forfeiture concerns are not addressed.

13 **Narrative**

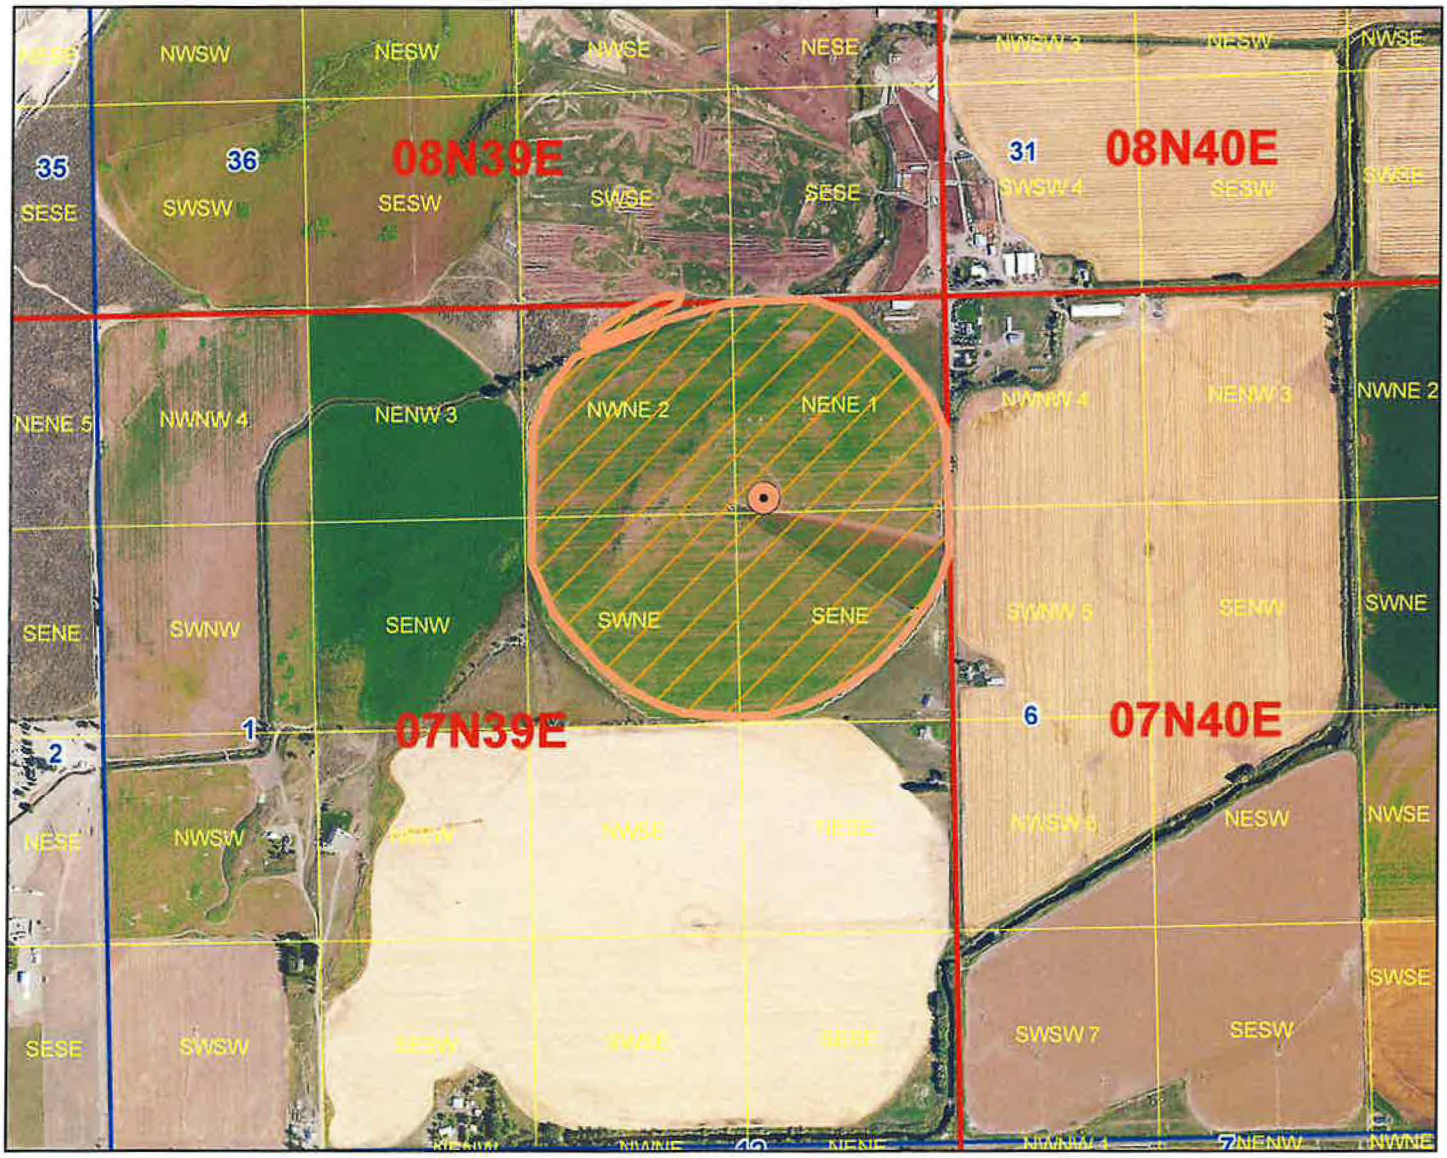

Lease application received as part of a lease/rental companion package on Sept. 30th 2024 for 5 years beginning in 2025. Both 21-7089 and 21-12952 WRs on the property are being placed in the bank. The Water Rights were previously leased into the water supply bank in 2019 and from 2020 through 2024. These are repeat applications. these two WRs were the only WRs avalible on WMIS 200601. The PCC stated that 247.77 ac-ft were recorded in 2024, however the site visit stated that the property is on surface water only. After emailing the examiner, the PCC was corrected to 0 ac-ft. The POU overlap analysis showed that Egin bench canal shares overlap the water rights. In orignal WR license, surface water was not claimed. The 2019 lease states that canal shares were purchased due to a well collapse that made ground water unaccessable. Since the two water uses were not comingled, there are no issues with POU. Water Right 21-12952 is an expanion water right to add additional acrage and volume. When used with Water Right 21-7089 the combined limits are 127 acres and a rate of 1.92 cfs.

Subject: WMIS PCC for WR #21-7089 & #21-12952

Good Afternoon, Tanner,

Currently we are processing a lease application for Charlotte Parker's Water Rights 21-7089 and 21-12952. When checking WMIS we noticed that in 2024 the PCC was measured at 247.77 ac-ft when the Water Rights

were leased to the bank. The property should be using canal shares to irrigate the land instead of ground water as stated by Charlotte in the lease application for 2020-2024 and the new lease application for 2025-2029. Was there any reason for this PCC measurement?

Thank you so much,
