Hi Jan,

I think we can proceed with the transfer approval and get it wrapped up here pretty soon. So let's go that route and I will let you know when it is approved so that you can proceed with whatever leftovers you have to do. Sound ok to you?

Thanks for your help on this one.

Subject: RE: Question

Hi Sharla,

Ok, back to this one. Sorry this was delayed, your email got lost in my inbox and was resurrected because we just received another ownership change from the De Groots to the Winds. This one has an original signature on it. So, it looks to me like we can do this a couple of ways.

- 1- Let the transfer be processed, which means likely approved, and then file an NCAP to change the recommendation to match the transfer. In the past we have done many NCAPS based on transfers including ones that change the ownership with the transfer. The only transfer that should be held by the regions are the ones where an objection has been filed and litigation is on going. These have not been objected to. The only reason the NAP was filed is because a transfer was pending. This was and is our normal procedure when a transfer is filed on a recommendation that has been submitted to the SRBA Court but has not yet been partially decreed. That's why the NAP was filed years ago.
- 2- We can NCAP the recommendation to change the ownership and the rights proceed forward as recommended and eventually the Court will issue partial decrees. The transfer is approved and the water rights changed.

I guess the decision on which way to do this depends on when the transfer is going to be done. If it can be processed right now because we have the original signature on the change of ownership, then we should go ahead and complete the transfer and we will NCAP the recommendations based on the approved transfer. Then the rights can be partially decreed reflecting the transfer.

Or, if the transfer is going to take more than a couple of months we should just do an NCAP for the Change of ownership and the partial decrees will reflect the water rights prior to the transfer. Then when the transfer is approved it will change the water rights.

One thing I do not know is what the transfer is proposing or how that would affect which way we go. Let me know whether you want us to send you the ownership change so you can proceed with the transfer or we do the NCAP for the change of ownership now rather than with an NCAP when the transfer is approved.

Thanks Sharla,
Jan

Subject: RE: Question

Hey Jan,

Finally getting back to this project. I scanned the ownership change stuff and the last correspondence relating to these files. The transfer file contains a document assigning the transfer from the DeGroot's to John and Ann Wind. The document is a copy, however, and Dan Nelson had placed a stickie note on it saying "Need Original Signatures. Ownership Info to change into Wind's name." So I think he was waiting for the ownership to be handled in the SRBA and we were also waiting for the rights to be finalized in the SRBA so we could proceed with the transfer.

I'm in no big hurry on this, just whenever you have a chance to look at it hopefully you will have some wisdom to share as to how we get these off center and wrap them up.

Thanks so much.

Sharla

Subject: RE: Question

Hi Sharla,

I am adjusting all the time. Starting to get to know everyone and can't complain. I actually do like it – pretty quiet which I'm finding isn't all bad. I miss my office and I miss you guys too. When I came over for Rob and Jean's going away luncheon it was nice to see everyone and I really missed my old office. I am right smack dab in the middle of planning over here. At first that was a little weird, but now that I know everyone I'm just a part of the family. At least I think so. I hope your family is healing as time goes by.

So, what happened to those files? Lori thinks they are in the drawers outside of Kay's old office. When Sonny moved into her office space we moved Lori's old filing cabinet beside the ones for Vicky & Kay already back there. She had some unfinished change of ownership files. If you could look and see if you could find those then I could get involved and see what needs to be done. It could be that the transfer app and attachments explain whatever Lori's problem was with them.

Would you see if you can find them and then give me a call or email me as to what you see? Does that sound ok?

Subject: Question

Hi Jan,

You might not be the right person for me to contact about this but I thought I'd start with you cuz I wanted to say hi anyway.

We have had a transfer application on file since 2005 for 6 basin 63 rights, of which 5 are part of the SRBA. All five are in the "Admin Proceed Pending" status. When I look in PowerDocs I find NAPs are the last things in the files dated 2007. The NAPs say waiting for documentation for Substitution of Party. Can you tell me what the current status is for these rights so that I can either proceed with the transfer process or hold till the rights are finalized in the SRBA.

The rights are 63-3198A, 63-3198B, 63-7425B, 63-7425C and 63-7427A. Montierth, Wind, DeGroot, VanderStelt – pick a name, any name. These are the names all over the transfer files.

Thanks for your help. How's it going over there at the S.O. We miss you.

Sharla

PART 1

6. General Information:

- a. Description of diversion system A: 3 wells in place & integrated serve NE 1/4 acres listed in license (same system serves other acres per other rights); New well will serve new dairy. Also see remarks.
- b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? _____ Yes X _____ No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.
- c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:
Reduce irrigation by 50 Acres in 5 1/2 NE 1/4 where dairy will be built.
Also see Attachment A (dairy worksheet) prepared by consultant Darwin VanderStelt.
- d. Remarks:
Transfer will reduce consumptive use overall. Wastewater & dairy runoff will be collected in lagoons & used to supplement residual irrigation. Thus, new well will indirectly serve as diversion point (RE: wastewater) for residual irrigation but is not listed as diversion point for irrigation since not directly tied into irrig system.

TRANSFER NO. 5087
WATER RIGHT NO(S). 63-03198A/63-03198B

CONDITIONS OF APPROVAL AND REMARKS

1. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
2. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
3. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
4. Prior to diversion of water under Right 63-03198A, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion
5. The total instantaneous diversion of water from all points of diversion under Right 63-03198A shall not exceed 2.00' cfs, nor nor total combined annual volume of 450.0 af.
6. After specific notification by the department, the right holder of Right 63-03198A shall measure and annually report diversions of water and/or other pertinent hydrologic and system information as required by Section 42-701, Idaho Code.
7. After specific notification by the department, the right holder of Right 63-03198B shall install a suitable measuring device or shall enter into an agreement with the department to determine the amount of water diverted from power records and shall annually report the information to the department.
8. Right 63-03198B is limited to the irrigation of 10.6 acres in the place of use described above in a single irrigation season.
9. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
- * 10. Irrigation use under Right 63-03198B and the remaining portion of Right 63-03198 in excess of this transfer approval in the amount of 0.24 cfs and 0.2 afa shall be forfeited by five (5) years of non-use.

MEMORANDUM

TO: FILE 63-03198

FROM: PAM SKAGGS^{PS}/STATE OFFICE

SUBJECT: TRANSFER 5087

DATE: October 22, 1997

=====

Transfer 5087 changes the point of diversion, nature and season of use under a portion of Right No. 63-03198 (Part B), and adds points of diversion under the remaining irrigation portion of the right (Part A.) The applicant is selling 50 acres to Mr. De Groot who wants to drill a separate well and build a new dairy facility. The remaining 100 acres will continue to be irrigated, but will also identify 2 additional existing wells currently used as part of the system.

The applicant provided a dairy requirement worksheet prepared by a consultant. This information provided the maximum requirements for the dairy and the rate of diversion proposed through system design. The application did not identify stockwater as a component of the dairy although the worksheet provided the separate information for both stockwater and commercial uses. ✓

The application also identifies the 50 acre site of the dairy and does not address the irrigation portion of the 50 acres that is in excess of the dairy requirements. While the dairy will potentially be built on the full 50 acre site, there is a possibility of partial continued irrigation or an opportunity for the right holder to otherwise dispose of the irrigation portion through another transfer or sale, assuming action is taken prior to a 5 year non-use period. b1c

The remaining portions of the right in excess of both Parts A and B were specifically identified and notification of possible forfeiture given in the conditions of the transfer approval. Disposal or use of the wastewater from the dairy is not part of this transfer approval or right. ✓

Season of use for irrigation was adjusted to current standards and year round use allowed for dairy. Irrigation, Stockwater and Commercial use were identified and quantified under Part B. Recommended conditions include measuring device & reporting requirements for each part, permissible place of use under Part B, irrigation overlap, identifying the possible forfeiture portions of the right and standard transfer conditions.
