RE: Annual Report: Aquifer Recharge and Pumping Report for 2024, Dry Lot LLC, License 37-22252

Dear Mr. Rauhut,

Please see the attached yearly report outlining Dry Lot LLC's activities on the aquifer recharge and pumping project for 2024 at the Valley Club HOA recharge site north of Hailey, Idaho. This report is submitted to comply with the reporting conditions required under water right license 37-22252 and Transfer 74449 in the name of Dry Lot LLC. A hard copy will follow in the mail.

Please review this report at your convenience. If you have any questions or comments, please do not hesitate to contact me at (208) 736-8543.

Sincerely,

G. Erick Powell, Ph.D., P.E.

APPENDIX A: INFILTRATION BASIN FACILITY OVERVIEW .....12

## OVERVIEW

This report documents activities and performance for the reporting year of 2024 at the Dry Lot LLC aquifer recharge site located at the Valley Club north of Hailey, Idaho (Figure 1). This report is prepared to comply with condition number two of Dry Lot LLC water right license 37-22252 and condition number five of Dry Lot LLC water rights 37-22313, 37-22318, and 37-22323 issued by the Idaho Department of Water Resources (IDWR).

Figure 1: Locations of Dry Lot LLC and Valley Club Infiltration Basins.

Dry Lot LLC water rights 37-22313, 37-22318, and 37-22323 authorize the recharge of up to 75.4 acre-feet of water from the Big Wood River through the adjacent Hiawatha Canal and Valley Club golf course irrigation system. Dry Lot LLC water right 37-22252 authorizes the extraction of irrigation water from the existing Valley Club Home Owners Association's wells in T.03N R.18E SEC.20 SW  $\frac{1}{4}$  NE  $\frac{1}{4}$  and SE  $\frac{1}{4}$  NW  $\frac{1}{4}$  for the irrigation of up to 27.5 acres within the place of use.

IDWR Permit No. 37-22252 in the name of Dry Lot LLC was approved on August 8<sup>th</sup>, 2010 authorizing 27.5 acres of irrigation. Planning and design of the infiltration system was coordinated with The Valley Club Inc. The design of the system was revised to add an additional recharge volume to accommodate a proposed project by The Valley

Club Inc. for enhanced golf course irrigation (see Figure 1). Proof of beneficial use of 37-22252 was filed with IDWR on June 11<sup>th</sup> 2015 and the water right permit was licensed as permitted on September 1<sup>st</sup> 2015 for the irrigation of 27.5 acres using 75.4 acre-feet of water.

This report has been drafted on behalf of Dry Lot LLC includes the following information: location of facilities, basin recharge, compliance summary and conclusions.

## **LOCATION OF FACILITIES**

Facilities associated with the Dry Lot LLC and The Valley Club Inc. infiltration basins are located in T.3N R.18E SEC.20 NWSE. Infiltration basin recharge water is diverted from the Valley Club Inc.'s irrigation system, flows through a 6" delivery line into an Orival OR-04-PE 100 micron mesh filter, and can enter either of the two Dry Lot LLC or one Valley Club Inc. infiltration basins. Basin layout was designed and constructed to meet the required area for infiltration, as well as to meet physical constraints such as accommodating for existing irrigation piping and golf course irrigation facilities. An infiltration basin facility overview is shown in Appendix A.

## **BASIN RECHARGE**

Condition of approval #2 on Dry Lot LLC water right license 37-22252 requires submittal of an annual report by January 31, of each year to include the following:

- a) The volume of water diverted from the authorized points of diversion for each month of the prior calendar year,
- b) The number and location (by subdivision lot number) of the acres of land irrigated in connection with this right during the prior calendar year and
- c) The number and location (by subdivision lot number) of the homes served domestic water from the authorized points of diversion pursuant to other water rights during the prior calendar year.

Water right transfer no. 74449 is also conditioned such that the daily volume of water recharged is reported to IDWR. Dry Lot LLC daily infiltration volumes are attached to this report. Table 1 shows the flow meter readings and diversion volumes from the Valley Club Owners Association Inc.'s (HOA) wells during 2024. Table 2 shows the subdivision lots that were irrigated using Dry Lot LLC water right 37-22252 during 2024. Table 3 shows the subdivision lots that were served domestic water from the Valley Club HOA's wells under water rights 37-8613A and 37-8810 during 2024.

Table 3: Lots Receiving Domestic Water from Valley Club Owners Association Inc.'s Water Rights 37-8613A and 37-8810 during 2024.

In 2024, 243.2 acre-feet (an increase of 54.0 AF over 2023) of water was pumped from the Valley Club HOA wells for domestic and irrigation uses. The reason for the increase in volume pumped when compared with 2024 is unknown.

It is important to note that water authorized to be diverted under 37-21337, owned by Village Green at the Valley Club Homeowners Assn. Inc., is also diverted through the two Valley Club HOA wells and the volume diverted in 2024 under this right is included in the 243.2 acre-foot volume reported here. An in-line meter was installed in October of 2019 at the upstream point of delivery for this right, so as to be able to determine the

yearly volume pumped and delivered under 37-21337. For 2024, 5.3 acre-feet under 37-21337 were diverted and used under the right.

The most recent publicly available aerial images are the 2024 Nearmap and ESRI images. These images were used to calculate acres irrigated during 2024 under 37-22252. 0.25 acres of irrigation occurred under 37-22252 on a lot owned by The Valley Club Inc. (Lot 97E) in 2024 (Figure 2); this lot is located directly east of Valley Club HOA Lot 97. Although this parcel is located outside of the current GIS shapefile in the IDWR database, this area can be added as discussed by Dry Lot LLC's legal counsel Travis Thompson and Shelley Keen. See the attached IDWR Memo dated 9/25/2015 that was previously submitted in the 2015 through 2023 annual reports. Brockway Engineering has confirmed that less than 28 acres were irrigated within the NWSW of Section 28 during 2024.

On all lots described in Table 2 with a residence (excludes Lot 56 and 97E) that were irrigating in the 2024 image, irrigation of 0.36 acres per lot (13.8 acres on 38 lots) is authorized and was assumed under 37-8613A during 2024. 1.0 acre of private irrigation is authorized and occurred under water right 37-4F on lot 57. Additionally, 27.5 total acres were irrigated under 37-22252 on the forty lots described in Table 2. 42.3 total acres of irrigation occurred on the lots described in Table 2 (including Lots 56 and 97E) under 37-22252, 37-8613A and 37-4F and are shown in Figure 3.

Between April 29<sup>th</sup> and May 31<sup>st</sup> 2024, 17.2 acre-feet were recharged in Dry Lot LLC basins 1 and 2. Between June 1<sup>st</sup> and June 30<sup>th</sup>, 26.1 acre-feet were infiltrated, between July 1<sup>st</sup> and July 31<sup>st</sup>, 30.2 acre-feet were infiltrated, and 1.9 acre feet were infiltrated on August 1<sup>st</sup> and 2<sup>nd</sup> in Dry Lot LLC basins 1 and 2 for a total of 75.5 acre-feet recharged in 2024. Both basins were turned off on August 2<sup>nd</sup> 2024.

Approved IDWR transfer no. 74449 is conditioned such that the recharge volume may not exceed 30 acre-feet before June 1<sup>st</sup> under 37-22313, 37-22318, and 37-22323. During 2024, 17.2 acre-feet were under-infiltrated during this time. Additionally, a recharge volume of 75.4 acre-feet is authorized under 37-22252 when all of the 27.5 acres are irrigated under 37-22252. On the forty total lots, 27.5 acres were irrigated under 37-22252, requiring 75.4 acre-feet to be recharged. In 2024, 0.1 AF of excess water was recharged in association with Dry Lot LLC water rights 37-22313, 37-22318, and 37-22323.

2024 ANNUAL REPORT  
2024 NEARMAP AERIAL

-  Valley Club Subdivision
-  2024 Irrigation Delineation

Figure 3: 2024 Irrigated Areas under 37-4F, 37-8613A and 37-22252.

## **COMPLIANCE SUMMARY**

In 2024, sixty nine residences were present within the Valley Club subdivision. 27.5 total acres are authorized to be irrigated under water right 37-22252 and all 27.5 acres were irrigated under this water right during 2024. Within the Valley Club subdivision, one half acre per lot are authorized to be irrigated under water right 37-8613A (in conjunction with a domestic use and residence) although only 0.36 acres were irrigated on 38 lots with a residence under this right, and 1.0 acre is authorized under private water right 37-4F appurtenant to Lot 57. 75.5 acre-feet of water was infiltrated into the Dry Lot LLC basins in 2024. Irrigation of 27.5 acres under 37-22252 in 2024 required 75.4 acre-feet to be infiltrated.

## **CONCLUSIONS**

1. Construction on the infiltration basins for the project commenced in early December 2011 and was completed in mid-May 2012.
2. Water right 37-22252 was licensed on September 1<sup>st</sup> 2015.
3. On the lots described in Table 2 including Lot 97E, 27.5 total acres were irrigated under 37-22252, 13.8 acres under water right 37-8613A and 1.0 acre under 37-4F on private lot 57 during 2024.
4. The total diversion volume associated with the irrigation on forty lots (irrigation not associated with a domestic or a private irrigation water right) under 37-22252 was 75.4 acre-feet. In 2024, 17.2 acre-feet were recharged before June 1<sup>st</sup> and 58.3 acre-feet of water was recharged from that date through August 2<sup>nd</sup> in the two Dry Lot LLC Basins.
5. The volume recharged in 2024 was adequate under existing Dry Lot LLC water rights 37-22313, 37-22318, and 37-22323 for the irrigation of 27.5 acres as authorized under 37-22252 and all 27.5 were irrigated.
6. In 2024, the total volume pumped from the two Valley Club HOA wells for domestic and irrigation uses associated with 37-8613A and 37-8810 within the Valley Club Subdivision was 243.2 acre-feet. Usage under Village Green water right 37-21337 was 5.3 acre-feet for 2024.
7. Facilities are designed to accommodate The Valley Club Inc.'s recharge volumes based on the approval of Valley Club Inc. water right transfer application no. 78255.

## MEMORANDUM

**DATE:** September 25, 2015

**TO:** Water Right File 37-22252

**FROM:** Shelley W. Keen <sup>SWK</sup>

**RE:** Place of Use

---

This morning Travis Thompson, attorney for Dry Lot LLC, called to discuss the place of use description for Water Right 37-22252. The place of use includes 28 acres within the NW $\frac{1}{4}$ SW $\frac{1}{4}$  of Section 28, Township 3 North, Range 18 East. The map attached to the license outlines the 28-acre area. Outside the area outlined on the map is a small, triangle-shaped parcel Dry Lot LLC may acquire from The Valley Club Inc. Travis wanted to know if the triangle-shaped parcel could be irrigated under Right 37-22252 as long as no more than 28 acres within the NW $\frac{1}{4}$ SW $\frac{1}{4}$  of Section 28 is irrigated.

We reviewed Transfer Processing Memorandum No. 24, which states on page 6:

An application for transfer is not required if a change in the location of use within 40-acre legal subdivisions is proposed that would not result in an increase in the number of acres within any 40-acre legal subdivision nor use of water at a new 40-acre legal subdivision (except for a proposed change in location outside of prescribed boundaries such as those provided for irrigation use under Section 42-219, *Idaho Code* or by court decree, even when the change in location would be included within the same 40-acre legal subdivisions existing prior to the proposed change).

An application for transfer is not required for the situation described in the preceding paragraph, even when the place of use is described by a shapefile in the department's GIS database. The department will not initiate an enforcement action against the water right owner due to a discrepancy between the department's shape file and the physical location of use within the 40-acre legal subdivisions if the discrepancy is limited to the situation described in the preceding paragraph. The department *may* update the shapefile in its GIS database from its own information or information provided by the water right owner.

Based on the guidance quoted above, I told Travis that a transfer would not be required to bring the triangle-shaped parcel into the place of use, as long as no more than 28 acres are irrigated within the NW $\frac{1}{4}$ SW $\frac{1}{4}$  of Section 28. I recommended that Dry Lot LLC notify IDWR when the change occurs by describing it in the annual report required in condition no. 2 of the license. When the change is reported, IDWR may adjust the place of use boundaries in its GIS records.
