5. Description of diverting works:

Water is captured in a small reservoir and used to gravity and pump feed sprinkler lines for irrigation.

Pump that captures water at the end of the creek to feed a pipe used for sprinkler irrigation.

This splitter box allows me to divert the water down two different ditch/stream lines.

Pump that captures water and is piped for sprinkler irrigation.

Small reservoir used to capture water that is then released for gravity sprinkler irrigation through a pipe system.

Small reservoir that captures high water that is used to assist in the delivery of water throughout the system.

A box with a screen is used to dam water with boards into the pipeline. The pipeline can either feed the lower reservoir or bypass it to be used in a mainline for sprinkle irrigation.

Small reservoir that captures high water that is used to assist in the delivery of water throughout the system.

10. Do you own the property listed above as place of use? Yes

If your answer is no, describe in remarks below the authority you have to claim this water right.

11. Other Water Rights Used:

12. Remarks:

Priority Date Explanation:

This is the date that was decreed and the use continues today. Recent transfer filed with Idaho Falls greatly increased the water right accuracy, filing the claim based on this successful transfer. Stockwater have historically drank from the system as acknowledged in the Dietrich Decree.

This right does not grant any right-of-way or easement across the land of another.

Use of water under this right may be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 11.

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.

After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.

The approval of this transfer redefines all of the elements of this water right, and the new use of water authorized by this approval shall constitute the full extent of the right.

The changes approved in Transfer 81780 are intended to replace the beneficial uses described in statutory claims 11-4072, 11-4073, 11-4074 and 11-4075.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

The total capacity of the four storage reservoirs authorized under this right is 60 acre-feet. The reservoirs may be refilled multiple times up to the total diversion volume in a single year.

The right holder shall accomplish the change authorized by this transfer within one year of the date of this approval.
