Remarks:

IDAHO DEPARTMENT OF WATER RESOURCES

Water Right Report 63-165L

1. General Prior to diversion and use of water under Transfer No. 4232, a totalizing flow measuring device and lockable controlling works acceptable to the Department shall be permanently installed and maintained as part of the diverting works.
- Place of use is located within the city limits of Boise and the surrounding service area.
- Four points of diversion are located within Lot 7, SENE, S14, T03N, R02E.
- Transfer No. 4232 adds a point of diversion identified as the Warm Springs Water Treatment Plant River Intake to the three existing points of diversion known as Ranney collector diversions. Construction of diversion works is subject to the application of best management practices in accordance with standards utilized in the State of Idaho Stream Protection Program. Specific requirements include the following:
- a. Turbid water pumped from the construction site shall not be returned directly to the stream (Alternatives are: settling pond, sump hole, irrigation ditch, etc.). Any discharge to a natural waterway shall be in compliance with Idaho Water Quality Standards and Wastewater Treatment Requirements and EPS NPDES permit requirements.
 - b. Fuel, oil, and other hazardous materials shall be stored, and equipment refueled, away from the stream to ensure that a spill cannot enter the stream channel.
 - c. All construction activities shall be conducted in such a manner as to minimize turbidity and other water quality impacts.
 - d. Any structure(s) placed within the stream channel of the Boise River shall be constructed in such a manner as to allow float boat traffic to pass over or around the structure(s) except at very low flows. The IDWR and the Idaho Department of Fish and Game will evaluate the structure(s) as constructed.
 - e. Stream bank vegetation shall be protected to the extent practicable during construction. Care shall be taken to select locations for ingress and egress from the stream that will minimize bank and riparian vegetation damage. Disturbed and eroded areas shall be revegetated with perennial shrubs, grasses, and forbs as recommended by Idaho Department of Fish and Game and/or the local office of the Soil Conservation Service, to reduce erosion, restore bank cover and habitat and inhibit the invasion of noxious weeds.
 - f. All temporary cofferdams shall be constructed of either jersey barriers, sandbags, sheet piling, or other materials reviewed and approved by this Department prior to construction of the cofferdams.

Comments:

1. SKAGGS 11/5/1993 TRANSFER NO. 4232

Comment: Transfer No. 4232 was filed to add a point of diversion to Right Nos. 63-00165L/00169F/00243E and H. The new point of diversion is identified as Warm Springs Water Treatment Plant River Intake.
