MEMO

To: David Shaw, Clive Strong, David Barber, Jim Tucker, Jayne Davis, Susan Hamlin
From: Charlie Honsinger
Subject: Riddle Ranches/Shoshone-Paiute Tribes Negotiations
Date: October 25, 2000

The purpose of this memorandum is to apprise you of the progress of negotiations between Riddle Ranches and the Shoshone-Paiute Tribes over their objections to each other's SRBA claims to water rights.

We recently met with representatives of the Tribes and the Bureau of Indian Affairs to discuss a settlement proposal made by the Tribes. A copy of the proposal is enclosed with this memorandum.

At the close of the meeting, Riddle Ranches and the Tribes both agreed that the concepts expressed in the proposal were "workable" and agreed to continue negotiations to refine those concepts, and to eventually settle their differences in a manner similar to that described in the proposal.

Within the next few days, either Jeanne Whiteing or I will be sending each of the parties a draft Joint Status Report to be filed with the Court on October 31 and to advise the Court as to the progress in the negotiations. In the meantime, I ask that each of you contact me with any questions, comments or suggestions you may have regarding the proposal or our future negotiations with the Tribes.

Thank you.

Shoshone-Paiute Tribes' Settlement Proposal

The general basis of this proposal is to provide the Tribes with sufficient water to irrigate 1,303 acres which were historically irrigated with water from Blue Creek. The claim filed by the United States includes 2,152 acres of historically irrigated land in the Blue Creek basin. Of this amount, 849 acres were irrigated with water which arises on the Duck Valley Reservation and does not affect Riddle Ranches. This proposal is limited to the remaining 1,303 acres which were irrigated from Blue Creek. Assuming a crop net consumptive use requirement of 1.41 acre-feet per acre and an efficiency rate of 65%, the water duty is 2.17 acre-feet per acre, resulting in a total maximum diversion of 2,828 acre-feet per year. The proposal seeks to define a combination of direct flow and storage to provide the Tribes with an annual water right of 2,828 acre-feet.

1. The Tribes will have an April 16, 1887 water right to 2,384 acre-feet from the Blue Creek drainage, with a maximum diversion rate of 33 cubic feet per second (cfs) based on 1 cfs per 40 acres. (This right is referred to herein as the "direct flow right".)

[Technical issues regarding measurement of flows will need to be resolved.]

2. In addition to the direct flow right identified in paragraph 1, the Tribes will have a storage right with the following elements: (1) 1,063 acre-feet of storage space in Big Blue Reservoir and (2) a water allocation equal to 52 percent of the flow into Big Blue Reservoir. The Tribes will pay 52 percent of the annual operation and maintenance costs (O&M) of Big Blue Reservoir, and Riddle Ranches will pay 48 percent of O&M. The Tribes may carry over their storage from year to year.

[The 52% figure is derived from the proportion of the Tribes' storage right to the total 2,050 acre-foot capacity of Big Blue Reservoir.]

3. The Tribes may use up to 2,828 acre-feet annually from the direct flow right and the storage right (including any carryover storage) defined in paragraphs 1 and 2. The Tribes may use the water for any purpose authorized by tribal law, or any other applicable law, provided that, if the water is used for irrigation purposes, it shall be subject to the following:
- a. A maximum annual diversion of 2,828 acre-feet at a maximum rate of diversion of 33 cfs.
 - b. A water duty measured at the point of diversion of 2.17 acre-feet per acre (2,828 acre-feet).
 - c. Water used for irrigation purposes can only be called for and delivered during the irrigation season, which is April 1 through October 31.
4. If the Tribes' water rights are used for purposes other than irrigation, the Tribes may call for its water from either source (direct flow or storage) at any time and at any rate applicable to the designated use, provided that it does not exceed provisions identified for full irrigation use (subsections a-c above) if called for during the irrigation season.
- [The intent of paragraph 4 is to allow the Tribes flexibility to use their Blue Creek water rights for a variety of purposes while protecting Riddle Ranches from any adverse affects which could arise from those changes.]**
5. The Tribes' point of diversion for purposes of this agreement shall be defined as the point where Blue Creek enters the Duck Valley Indian Reservation. The Tribes' storage rights shall be measured at Big Blue Reservoir according to a methodology to be defined. Releases from Big Blue Reservoir shall be measured at the point of diversion.

6. The Tribes' storage space in Big Blue Reservoir will fill at the same time as, and on a pro rata basis with Riddle Ranches. If space is still available in the Tribes' storage space at any time during the irrigation season, the Tribes may store any unused direct flow.
7. If the Tribes' storage space in Big Blue Reservoir decreases by 25 percent or more due to siltation or the inadequacy or failure of any Reservoir works or facilities, the Tribes shall send a notice of such event to all parties to this agreement, and the Tribes shall have the option of declaring this agreement null and void if the Tribe's full storage space is not made available within 5 years of the date of the notice.

FIFTH JOINT STATUS REPORT

The parties to the above referenced subcases hereby submit this Third Joint Status Report pursuant to the Special Master's July 13, 2000 Second Order Requiring Written Status Reports. All parties, through their counsel of record concur in the representations made in this Third Joint Status Report.

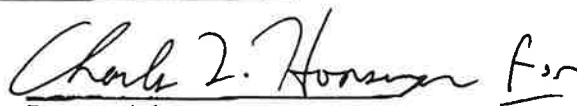

The parties hereby report to the Special Master the following:

1. The Shoshone-Paiute Tribes and Riddle Ranches have exchanged counter-proposals to settle their respective water right claims.
2. On October 25, 2000, representatives of the Shoshone-Paiute Tribes, the United States and Riddle Ranches met and agreed upon a basic framework for settlement of the issues between those parties.
3. In order to fill in the terms of the settlement framework between the Tribes, the United States and Riddle Ranches, the parties must conduct and complete data collection and analysis. It is expected that the collection and analysis will be complete in approximately six months.
4. Over the next six months, the Shoshone-Paiute Tribes and the United States will be conducting settlement discussions with Idaho Power, the State of Idaho, and the Simplot entities in an effort to settle the issues between those parties.

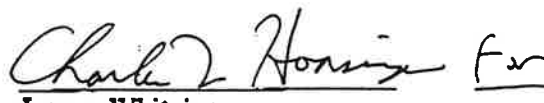

The parties believe that much progress towards settlement has been made since the filing of the August 30, 2000 Joint Status Report. Based upon that progress, the parties are confident of settlement after the completion of data collection and analysis necessary to fill in the terms of the settlement framework. Therefore, the parties request that the Special Master alter the current schedule in these subcases such that the next Joint Status Report is due on April 30, 2001, and the Joint Scheduling Conference Report Scheduling Conference Report currently due on January 31, 2001 is instead due on June 30, 2001.

Dear Jeff:

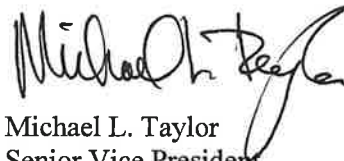

As you know, Northwest Economic Associates is a contractor to the Department of the Interior, Bureau of Indian Affairs. We are in charge of the technical analysis in support of the United States' objections to the water right claims of Riddle Ranches, Inc. This case is now before the SRBA court.

The United States filed a "Request to Permit Entry Upon Lands" and was granted permission by the owner of Riddle Ranches. The technical team is planning a field inspection of lands claimed and irrigated by Riddle Ranches during the week of June 7th. The details of the trip will be determined this week.

On behalf of the United States, I would like to invite you and appropriate personnel from IDWR to participate in the site visit. We believe this field inspection will be extremely valuable in resolving Riddle Ranches' water right claims.

I will be in touch with you later in the week to discuss the details of our itinerary. I hope you can make it.

Sincerely,

Michael L. Taylor

The United States was granted permission by the owner of Riddle Ranches, Inc. to conduct a field inspection of lands claimed and irrigated by Riddle Ranches. The technical team is planning a field during the week of June 7th. This memorandum concerns the itinerary and details of the site visit.

The primary purpose of the field inspection is for the United States' technical experts to collect information that will assist them in their litigation testimony regarding the water right claims of Riddle Ranches. A secondary purpose is to gather additional information that would assist the United States in preparing a settlement proposal. The site visit is oriented toward serving these two purposes. The owner of Riddle Ranches, Mr. Pete Jackson, and/or his designee(s) are invited to attend.

The visit will be conducted in two phases. Phase I will consist of an orientation discussion and a reconnaissance visit to pertinent reservoirs and diversion, distribution, drainage, and conveyance facilities. The field visit will take place Monday afternoon and Tuesday, and is open to all above named individuals or their designees. We will meet in the parking lot of the store in Riddle on State Highway 51 promptly at 1:00PM on Monday and 8:30AM on Tuesday.

Phase II will consist of a detailed assessment of lands that are included in Riddle Ranches' claims. This assessment will involve an inspection of fields; taking of pictures, notes, and measurements; and walking perimeters of fields with GPS equipment. Phase II will take place Wednesday through Friday as necessary. Due to the nature and amount of work required, this phase is limited to the technical experts of the United States, Tribes, and State of Idaho, and any representatives of Riddle Ranches. At this point, we plan to meet at the store in Riddle at 8:30AM on Wednesday.

If you are planning on attending this site visit, please let me know as soon as possible when and for how long so that we may inform Mr. Jackson as to our plans and attendees. We wish to minimize the inconvenience of and interruption to the day-to-day operations of Riddle Ranches.

If you have questions or comments, feel free to contact me by phone ((360) 883-0191) or e-mail (mtaylor@nwecon.com).

DESCRIPTION OF DIVERTING WORKS - BLUE CREEK, LITTLE BLUE CREEK,
SHOOFLY RESERVOIR & BYBEE RESERVOIR
55-02009, 55-02016, 55-02035, 55-02039, 55-02064, 55-02174, 55-
02211, 55-02435, 55-07002, 55-07009 & 55-13480

Diversion works begin with Blue Creek Reservoir which is a 29' high on stream dam in the NESE, S11, T13S, R2E, resulting in a reservoir capacity of 2050 AF. Water is rediverted from Blue Creek via diversion dams, dikes, ditches and gravity irrigation. Little Blue Creek water comes from Little Blue Creek Reservoir which is a 32' high dam in the SESE, S17, T13S, R3E, resulting in a reservoir capacity of 2,100 AF. Water is diverted directly from Little Blue Creek in one diversion below the dam in the SWSW, S20, T13S, R3E and injected into Blue Creek in the SWSE, S19, T13S, R3E. The comingled Blue Creek and Little Blue Creek is diverted via Blue Creek as explained above and the two sources irrigate lands in Secs. 19, 29, 30, 31, 32, T13S, R3E, Secs. 12, 13 & 14, T14S, R2E, prior to the injection point of Bybee & Shoofly Reservoir water as explained below.

Shoofly reservoir is an on-stream reservoir on the West Fork Shoofly Creek and has a 38' high dam located in the NESW, S26, T13S, R1E, with a reservoir capacity of 1100 af. Water is rediverted from the West Fork Shoofly Creek for irrigation in Sec. 25, 26 & 36, T13S, R1E. It is then rediverted for irrigation of a portion of Sec. 1 & 12, T14S, R1E. In the SENE, S12, T14S, R1E, Shoofly Reservoir water injects into Shoofly Creek and comingles with Bybee Reservoir.

Bybee reservoir is an on-stream reservoir on the main Shoofly Creek with a 52' high dam located in the NESW, S31, T13S, R2E, with a reservoir capacity of 7,970 af. Water is rediverted from Shoofly Creek to irrigate portions of Sec. 6 & 7, T14S, R2E, and portions of Sec. 1 & 12, T14S, R1E. In the SENE, S12, T14S, R1E, Bybee Reservoir water comingles with Shoofly Reservoir water after the Shoofly Reservoir water is injected into Shoofly Creek. Both sources flow down Shoofly Creek and are diverted in the NWSE, S15, T14S, R2E, irrigating lands in the SW1/4, S14 and the NW1/4 S23, before injecting into Blue Creek in the NE1/4 S23, T14S, R2E. At this point all four sources are comingled, Bybee Reservoir, Shoofly Reservoir, Blue Creek and Little Blue Creek waters. These are rediverted from Blue Creek to irrigate lands in Sec. 23, 26 & 35, T14S, R2E.

Mr. Linn N. Buley, Representative

Walla Walla, Washington

Dear Mr. Buley:

In answer to your letter of August 5, 1956, in which you request to know the capacity of the Big Blue Reservoir, Little Blue Reservoir and Alder Reservoir located in Cwyhee County.

The capacity of the Big Blue Reservoir is 1,131 acre feet, the capacity of the Little Blue Reservoir is 2,000 acre feet, and the capacity of the Alder Reservoir is 1,240 acre feet.

When License was issued on this water right for storage water the right was given for the filling of the Reservoir only once, however, there is a note in the Alder Creek Reservoir file stating that this Reservoir fills two to three times during the summer months. This note was signed by our home examiner from this Office.

You also wish to know the amount of filings on Shoofly Creek, Payne Creek, Nit Creek, Squaw Creek, and Big and Little Blue Creeks. The information as well as other information will be found on the attached sheets.

Very truly yours,

MARK R. KULP
