Don and Jan,

Would you be able to meet tomorrow with Charlie with the maps to explain why the PPU is 3562.88? I'm not sure what time, but both of your calendars look pretty open.

I won't be in the office (leaving tomorrow for my 10-yr college reunion), but it would be nice to wrap this up.

Please let me know.

Thanks,

Chris

Charlie,

Don and I spoke and it looks like to us that there are overlap issues that reduce the total acreage by 113.12 instead of 96.48. If you'd like to come into the office to look at the maps and how the overlaps relate to the total, please let me know when would be a good time. It is confusing so I think this is best done by looking at maps rather than describing things over email or the phone.

Jeanne,

That's what I'd say. I also agree with you about not filing the motions to withdraw until it's all been figured out.

I don't think Dolan will have a problem with what's going on since we're trying to wrap these up and have just discovered a technical problem with the new recommendations that will need to be reviewed and fixed.

I apologize for the inconvenience that this may have caused, but am glad that the problem was identified and can be corrected.

Don just emailed me from Couer d'Alene and we have a meeting scheduled for tomorrow afternoon.

Charlie and Chris, I assume we will just explain to the Special Master where we are on this. I will hold off on filing my withdrawal of objections on the four claims until everyone is satisfied. -- Jeanne

Charlie and Jeanne,

Don's apparently in Couer d'Alene for meetings having to do with the Northern Idaho Adjudication and won't be back until after tomorrow's status conference.

So, it looks like I won't be able to get you an answer before tomorrow's status conference on the discrepancy.

Subject: SF5s

Ok folks, I have reviewed the group of SF5s for water rights that have a combined place of use with water right 51-2002 (both objected to water rights and overlapping water rights) and have sent them off for filing with the Court so that we have at least something to show the court tomorrow. I am now working on the other group (those that have a combined place of use with water right no. 55-2009) and have a question regarding the combined place of use.

The original combined place of use for all 11 of the water rights was 3676 acres. The combined place of use for the 11 water rights has now been changed to 3562.88 acres. By my calculations, the combined place of use should have been reduced by 96.48 acres, which is the sum of all acres removed from all 11 of the water rights. However, it was reduced by 113.12 acres, and I simply cannot make that number work with my numbers. Can anybody explain the discrepancy to me?

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):
 - A. Possible Alternative Season of Use
 - B. Place of Use - Combined Total Acreage
2. Describe the changes you wish to make in the proposed recommendation:
 - A. Riddle Ranches requests that the historical and licensed season of use, 4/1 - 11/1, be recommended by IDWR to the SRBA Court as the Possible Alternative Season of Use.
 - B. Riddle Ranches requests that the combined total acreage that this right may irrigate in combination with other water rights be changed to reflect place of use changes made to the recommendations for water right numbers 55-02009, 55-02016, 55-02039 and 55-13480.
3. Give a brief explanation as to why you disagree with these portions:
 - A. This water right has historically been used during the period from 4/1 - 11/1, and has been so licensed by IDWR.
 - B. Because IDWR inadvertently did not include irrigated acreage in its place of use recommendations for water right numbers 55-02009, 55-02016, 55-02039 and 55-13480, it and claimant agreed to include that acreage in those recommendations on 04/03/98. Because those water rights are limited with this right to irrigation of a total combined

number of acres, the total combined irrigated acres recommended for this right must reflect changes made to the recommendations for those rights.

 I AGREE with this proposed recommendation; no changes need to be made.

DESCRIPTION OF DIVERTING WORKS - BLUE CREEK, LITTLE BLUE CREEK,
SHOOFLY RESERVOIR & BYBEE RESERVOIR
55-02009, 55-02016, 55-02035, 55-02039, 55-02064, 55-02174, 55-
02211, 55-02435, 55-07002, 55-07009 & 55-13480

Diversion works begin with Blue Creek Reservoir which is a 29' high on stream dam in the NESE, S11, T13S, R2E, resulting in a reservoir capacity of 2050 AF. Water is rediverted from Blue Creek via diversion dams, dikes, ditches and gravity irrigation. Little Blue Creek water comes from Little Blue Creek Reservoir which is a 32' high dam in the SESE, S17, T13S, R3E, resulting in a reservoir capacity of 2,100 AF. Water is diverted directly from Little Blue Creek in one diversion below the dam in the SWSW, S20, T13S, R3E and injected into Blue Creek in the SWSE, S19, T13S, R3E. The comingled Blue Creek and Little Blue Creek is diverted via Blue Creek as explained above and the two sources irrigate lands in Secs. 19, 29, 30, 31, 32, T13S, R3E, Secs. 12, 13 & 14, T14S, R2E, prior to the injection point of Bybee & Shoofly Reservoir water as explained below.

Shoofly reservoir is an on-stream reservoir on the West Fork Shoofly Creek and has a 38' high dam located in the NESW, S26, T13S, R1E, with a reservoir capacity of 1100 af. Water is rediverted from the West Fork Shoofly Creek for irrigation in Sec. 25, 26 & 36, T13S, R1E. It is then rediverted for irrigation of a portion of Sec. 1 & 12, T14S, R1E. In the SENE, S12, T14S, R1E, Shoofly Reservoir water injects into Shoofly Creek and comingles with Bybee Reservoir.

Bybee reservoir is an on-stream reservoir on the main Shoofly Creek with a 52' high dam located in the NESW, S31, T13S, R2E, with a reservoir capacity of 7,970 af. Water is rediverted from Shoofly Creek to irrigate portions of Sec. 6 & 7, T14S, R2E, and portions of Sec. 1 & 12, T14S, R1E. In the SENE, S12, T14S, R1E, Bybee Reservoir water comingles with Shoofly Reservoir water after the Shoofly Reservoir water is injected into Shoofly Creek. Both sources flow down Shoofly Creek and are diverted in the NWSE, S15, T14S, R2E, irrigating lands in the SW1/4, S14 and the NW1/4 S23, before injecting into Blue Creek in the NE1/4 S23, T14S, R2E. At this point all four sources are comingled, Bybee Reservoir, Shoofly Reservoir, Blue Creek and Little Blue Creek waters. These are rediverted from Blue Creek to irrigate lands in Sec. 23, 26 & 35, T14S, R2E.

+ - - Other Rights for Same Use -

[illegible]

This right is subject to provisions of the State of Idaho and to all prior rights on streams to which Shoshly Creek is tributary including the rights of the Indians. If adequate facilities are constructed by the Paiute & Shoshone Indians to use the waters of Blue Creek, the right holder may be required to allow the water to pass downstream.

The right holder shall allow employees of the Department of Water Resources and any appointed watermaster reasonable access to the dam for the purpose of supervising storage & use of the water.

In any given year that Owyhee Reservoir does not fill to its full capacity, the water stored by the right holder must be released and passed downstream unless the right holder can negotiate an agreement to compensate for the lost water. Such agreement could include payment to offset the increased cost of pumping Snake River water.
