

MEMORANDUM

Date: April 21, 2025
To: Transfer 89714
From: Jake Nebeker
Re: Review & Evaluation of Sufficiency of Information

The purpose of this transfer is to change the place of use and point of diversion for water right 22-11878. No physical change is taking place in this transfer.

Authority to File:

Ownership documents were submitted which show the conveyance of land from the current water right owner to the applicant. Teton County parcel data shows the applicant as the owner of the proposed place of use and point of diversion. The current place of use for this right overlaps land owned by other individuals. The applicant provided a copy of the notice that was sent to these landowners, per Idaho Code 42-248. It is presumed that the applicant has authority to make the change.

Water Right Validity:

The right included in this transfer was decreed in the SRBA in 1999. Aerial photography shows a home on the proposed place of use since 1987. Forfeiture does not appear to be an issue.

Injury to Other Water Rights:

Other rights will not be injured by the proposed change. The quantity authorized to be diverted will not change as a result of this transfer. Since this water right is not within a water district, no water master was contacted. Since it is clear that the proposed change will not adversely impact other water rights, this application will not require public notice.

Enlargement of Use:

The proposed change does not appear to result in enlargement because the rate will not increase as a result of this transfer.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
