12. Remarks:

Priority Date Explanation:

This is the date that was decreed and the use has continued since. Historically, our diversion system and use existed before Twin Lakes Canal Co and Riverdale Canal Co. In the early 1900's when these two canal companies began, we agreed that our diversion system could be removed and replaced with theirs under an agreement that our water will be delivered through their systems. This diversion system has been in place since for irrigating 397.7 acres.

402.7

Stock have historically drank from this system as described in the Dietrich Decree. There is approximately .1cfs of water that is delivered through each canal for shareholder stock year round.

In addition, the canals naturally capture surface runoff and other small spring/creek systems as they make their way around the hillsides.
