1. The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
2. Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
3. Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.
4. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
5. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
6. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.

8. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
9. This rental agreement does not authorize the construction of a well.
10. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the place of use.

2. MAP

Create a map of the proposed point(s) of diversion, place(s) of use and water diversion, delivery and distribution systems. Make sure the rental place of use is outlined and annotated with legal land descriptions (Township, Range, Section and Quarter-Quarters) or with GPS coordinates. For irrigation purposes, mark the number of acres you desire to irrigate. Attach the map to this application and label it **Attachment 2**.

3. DESCRIPTION OF PROPOSED USE FOR RENTAL WATER

A. Describe why you desire to rent water and provide a detailed description of your proposed use. If the proposed use is not for irrigation, describe in detail how you determined the amount of rental water required. If the space below is insufficient, attach additional sheets as required and label them **Attachment 3A**:

The rental water is desired to cover 24.1 acres of an approximate 50 acre field not covered by other leased (#1187 in 2020-2024), and appurtenant private water rights. The rental application seeks to rent the water for irrigation purposes from portions of the irrigation water rights as described in this application.

B. Enter the desired and/or minimum rates of flow, volume, or irrigable acres requested for your rental purposes:

Desired Rate (Cubic Feet/Second)	Desired Volume (Acre-Foot)	Minimum Rate* (Cubic Feet/Second)	Minimum Volume* (Acre-Foot)	Desired Acres (if applicable)
0.40 CFS	96.4 AF	.40 CFS	96.4 AF	24.1 AC

* Sometimes water rights provide an exceptionally low rate per acre and/or low volume per acre. This section is meant to establish an acceptable range of water sufficient for your proposed water use. Please see question 4B and complete if necessary.

C. This section must be completed in full. Enter the proposed start date and latest possible start date for using rental water as well as the number of years you would like to rent water. The latest possible start is the latest possible date by which you would be willing to pay for a rental and be able to benefit from utilizing rental water.

Desired Start Date (month/day/year)	Latest Possible Start Date (month/day/year)	*Mark Desired Rental Duration (Calendar Years)					**Applicant's preference if rental application cannot be processed prior to the latest possible start?	
4/1/2025	5/1/2025	☐ 1	☒ 2	☐ 3	☐ 4	☐ 5	☐ Process application as soon as possible	☐ Return application to applicant

* The number of years permissible for a rental is subject to the lease contract duration for the water right(s) being rented.

** Per Idaho Code 42-201, it is unlawful to divert or use water without a valid water right. Water Supply Bank rental applicants are not authorized to utilize rental water prior to the execution of an approved rental agreement. Rental requests may be returned to applicants if no water is available from the Bank to fulfill a rental request.

Application to Rent Water (Continued)

- D. Describe your water distribution system and how rental water will be delivered from the point(s) of diversion (POD) to the proposed place of use (POU):

Existing wells, mainlines to two small pivots and handlines to some corners

- E. Describe the physical type (pump, headgate, etc.) and location of the POD from which rental water is proposed to be diverted:

POD Description	Water Source	Other Water Rights Diverted from this POD
08S 26E Sec 6 NWNWNE	Groundwater	36-2101 et al.
08S 26E Sec 1 NESE	Groundwater	

If the POD(s) above are located where water is turned into a canal, lateral or ditch, or if they are located on your property but are serviced by water that is delivered via a canal, lateral or ditch, your rental request must include documented authorization from all relevant canal companies, irrigation districts and/or water delivery entities, confirming that they consent to your diversion of water from their system.

- F. Has documented consent from all relevant water delivery entities been obtained? Yes ☐ N/A ☒

If yes, include documented consent as Attachment 3F.

- G. Do any POD(s) identified in Question 3E divert from a water source that may require water modeling? Yes ☒ No ☐

Refer to the Water Modeling Requirements Information Sheet to determine if a rental POD may require water modeling.

- H. Has water modeling been provided with your rental request? Yes ☒ N/A ☐

If yes, label modeling Attachment 3 H.

Rental applications that require modeling will be returned if modeling is not provided.

- I. Specify the desired beneficial use of water and the requested season of use or number of acres required:

- ☒ Irrigation 24.1 (number of acres) Duration: Subject to IDWR standard seasons of use
- ☐ Commercial from: _____ (mm/dd) to: _____ (mm/dd)
- ☐ Stockwater from: _____ (mm/dd) to: _____ (mm/dd)

- J. For irrigation uses, do you propose to divert water at a rate greater than 0.02 cfs/acre? N/A ☐ Yes ☐ No ☒

If yes, justify the rate of flow and attach any supporting documents as Attachment 3J. Justification may include information on soil composition, conveyance losses, crop type, irrigation systems, public access areas, etc. A rate of 0.03 cfs/acre is permissible for irrigation of 5 acres or less.

- K. Do you own the land at the proposed rental place of use (POU)? Yes ☒ No ☐

If no, attach documentation from the POU owner/operator confirming your authorization to use the POU and label it Attachment 3K.

- L. List all other water rights and sources of water at the rental place of use for the same purpose, including privately owned water rights and water received from a municipal supplier, an irrigation district, a canal company or any other water delivery entity. Explain why additional water is required:

None - Groundwater is the only source.

Application to Rent Water (Continued)

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)
36-2684	Irrigation	0.40	96.4	24.1		0.40	96.4	24.1
Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.40	96.4	24.1
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO(S). 36-2684, AGREEMENT 944**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of **\$3,181.2 for 2025** was calculated based on the current rental rate of \$33.00 per acre-foot times a diversion volume of 96.4 acre-feet. Since you have a private agreement with the lessor, **you are only obligated to pay the 10% administrative fee or \$318.12.** The annual rental fee for 2026 is due by December 31, 2025. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check in the amount of \$318.12 for 2025 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing.

Pursuant to the Water Supply Bank Rules, \$318.12 will be retained by the Department to offset administrative costs for **2025**.

If you have any questions, please contact this office at (208) 287-4800.

Sincerely,

Debra Mansfield

MEMORANDUM FOR APPLICATION # 3129 / AGREEMENT # 944

To: Water Right(s) 36-2684

From: Mary Condon

Date: April 24, 2025

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: Repeat rental application of ground water within the Eastern Snake Plain Aquifer Ground Water Management Area (ESPA GWMA) for the irrigation of 24.1 acres for two years beginning in 2025 through 2026 was received on December 9, 2024. This rental will be used in combination with approved Rental Agreement 926 executed on April 10, 2025 of rights 36-2130C, 36-7850 C, and 36-8106 C for 6.8 acres worth of irrigation. Renter has owner share payment arrangement with lessor of WR 36-2684; rental fee is an administrative fee only.

AUTHORITY TO FILE: Rental Application is signed by Mr. Duane Grant, who is authorized to sign on behalf of Grant 4D Farms, LLC, through Grant 4-D Management, LLC, per the 2024 Annual Report filed with the Idaho Secretary of State. The proposed rental place of use and the land under the proposed diversion wells are owned by RLDR Farm LLC. Water right 36-17285 adjacent to the rental POU is owned by Grant 4D Farms. Half of the water rights from the proposed diversion wells (WMIS IDs 100755 & 100797) are co-owned by Grant 4D Farms with RLDR Farm, LLC. A land lease authorization from RLDR to Grant 4-D Farms to irrigate the place of use received on March 5, 2025 that covers years 2025-2029. No concerns with authority to file.

WATER RIGHT VALIDITY: The requested waters are leased into the bank through 2026 and were rented every year under multi-year terms since 2004. No concerns with validity.

INJURY TO OTHER WATER RIGHTS: Location of rental ground water rental diversion is within the ESPA GWMA. ETRAN modeling and mitigation analysis for new rental was included with the rental application, but the analysis was only provided on the current requested term for years 2025-2026. This right has been rented previously under multi-year terms since 2004 to the same lands for irrigation by the applicant. The ESPA mitigation analysis therefore requires an evaluation of all years from 2004 through the end of this rental in 2026. Additional information and calculations for ETRAN review are at end of memo. Review staff confirmed mitigation is not required for another two-year rental of these water rights and injury is not expected.

ENLARGEMENT OF USE: The rental location and requested water right location both have a headgate standard of 4.0 acre-feet per acre. Additionally, existing water right 36-17285 for the adjacent field that will likely be irrigated with wheel- or handlines in conjunction with this rental has a low duty of water equal to about 0.013 cfs per acre with a condition that when combined with other water rights the duty of water will not exceed 0.02 cfs per acre. The requested water rights are equal to 0.017 cfs per acre, and when combined with 36-17285 and approved rental agreement 926, they will not exceed 0.02 cfs per acre. No enlargement concerns with the rental as proposed.

LOCAL PUBLIC INTEREST: This is a repeat rental for the same field and from the same water rights as previous rentals. No local public interest is known to exist to the prior rentals and review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental is for a beneficial use and appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location of the Rental POD is within IDWR Southern Region, the ESPA GWMA, Blaine and Minidoka County, and the Magic Valley Ground Water District boundary. Rental is subject to Water District # 130 administration. An email requesting comments or concerns was sent to the IDWR regional manager and WM on April 28, 2025.

ETRAN CALCULATIONS AND SUMMARY:

Rental Request – Start 2025 thru 2026; Grid Cell R80, C72; TO Well – 24.1 acres authorized Combined Leased Rights; Grid Cell R76, C71; FROM Well – 24.1 acres required

Area standard consumptive use is 3 acre-feet, therefore the trimester value is equal to acres rented: 24.1 acres x 3 acre-feet = 72.3 afa / trimester value of 3 = 24.1 acre-feet per trimester

Requested right 36-2684 has been rented previously under multi-year terms since 2004 to the same lands for irrigation, except for year 2009 when a rental was not in place. The ESPA mitigation analysis therefore requires an evaluation of all years from 2004 through the end of this rental in 2026. A review of all previously approved rentals for the same water right to the same POD and POU was conducted and the amounts rented are tabulated in the tables, below, in order of oldest to newest, and reflects data entry to the ETRAN modeling spreadsheet.

Additionally, the acres rented from this particular right has not been the same for each approved rental. In order to properly analyze the rentals across all rental years, the highest trimester volume rented for the 23-year period is used as a starting point in the From Well without transfer, the amount authorized under the previous rentals in the TO well, and the difference between the two remaining in the FROM well with transfer. The change impact for the 23-year period modeled shows no mitigation is necessary.
