Originally the water right was delivered through a community ditch system. The ditch is now piped. We have a cutoff valve on the pipe that supplies our mainline and laterals with water. There are risers along the laterals that we hook our sprinklers up to, including hand lines, wheel lines and a pivot. We do have two risers on a lateral across the street that we use to irrigate the hill. This system has been in place since before we bought the property in 2009.

11. Other Water Rights Used:

13-764

12. Remarks:

Priority Date Explanation:

This is the date given on the decree. We bought the property in 2009. We have continued to use the system as it was when we bought the property. There are at least two water rights that supply the irrigation. The water is all delivered through the same system. Originally the water was applied through flood irrigation. It has been converted to a sprinkler system. There has been additional acreage added to the system since the water rights began. We will be filing either an enlargement claim or another claim once we determine when the additional acreage was added on.
