Water Right No. 63-33799

7. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
8. When ordered by the Director, the right holder shall provide mitigation acceptable to the Director to offset depletion of lower Snake River flows needed for migrating anadromous fish. MEMORANDUM

TO Water Right 63-33799
FROM Cody Parker
RE Irrigation Recommendations for Licensing
DATE May 28, 2025

Water right 63-10871 authorizes 3.4 acres of irrigation at 0.03 cfs/acre. For 63-33799 the field examiner found a total of 5.6 acres of irrigation from the same well as 63-10871. Rather than recommending 2.2 additional acres of irrigation for 63-33799, the examiner recommended a total of 5.6 acres at 0.02 cfs/acre and a combined limit with 63-10871 for 5.6 acres at 0.02 cfs/acre.

The purpose of including all the irrigated acres on the new license, rather than just recommending the additional irrigation is to limit irrigation of all the acres to 0.02 cfs/acre rather than having a patchwork of smaller water rights at 0.03 cfs/acre which collectively add up to more than 5 acres.
