**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO(S). 2-10471, AGREEMENT 934**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of **\$594.00 per year** was calculated based on the current rental rate of \$33.00 per acre-foot times a diversion volume of 3264 acre-feet. Since you are both the lessor and the renter of the rights **you are only obligated to pay the 10% administrative fee or 594.00** The annual rental fee for 2026 is due by December 31, 2025. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check in the amount of \$594.00 for 2025 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing.

Pursuant to the Water Supply Bank Rules, \$594.00 will be retained by the Department to offset administrative costs for **2025**

If you have any questions, please contact this office at (208) 287-4800.

MEMORANDUM FOR Application 3137/AGREEMENT # 934

To: Water Right(s) 02-10471

From: Catalina Beck Water Resource Agent

Date: February 20, 2025

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: Renewal rental application for water right 02-10471 was received on December 11, 2024 proposing another five-year of 45 acres of irrigation beginning in 2025 through 2029 alongside the renewal companion lease application 3131.

AUTHORITY TO FILE: The lease application for JR Simplot was signed by James Alderman the secretary for JR Simplot. No concerns with authority to file.

WATER RIGHT VALIDITY: The right was leased in the bank since 2011 and has been rented fully for seven years. Water right 02-10471 was previously rented by the applicant during 2023-2024. No concerns with validity.

INJURY TO OTHER WATER RIGHTS: Continued renting of this water right would not cause injury to other water rights.

ENLARGEMENT OF USE: The applicant intends to lease 45 acres of water from water right 2-10471 to enhance the diversion rate for a system that irrigates 658 acres. This proposed rental would expand the beneficial use of the rented water right, as the water would be utilized to irrigate an area greater than 45 acres. To avoid any potential expansion, we have consolidated the current water rights from 658 acres down to 613 acres while maintaining the same volume of water. The resulting unit diversion rate for these acres is 0.014 cfs per acre. Furthermore, we have limited the diversion under the rental agreement to this same unit rate. By maintaining the diversion rate, we prevent the rented water right from being utilized for a larger portion of the irrigation season and from generating excess volume.

LOCAL PUBLIC INTEREST: The proposed use is consistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The location for the lease PD is within Administrative Basin 02. Comment requests were sent on March 17 2025 to Western region and watermaster.

Subject: Water Supply Bank Lease/Rental Package for Water Right 02-10471 with three rentals

Dear JR Simplot

I hope this message finds you well. I wanted to follow up regarding your lease/rental package for JR SIMPLOT Water Right 02-10471 that we have been reviewing for the Water Supply Bank. It has come to our attention that one of the rentals is missing an authorization from the Bureau of Land Management (BLM) for the place of use and the letter requesting information will be sent out tomorrow for the rental. I wanted to see if you want to move forward with the lease rental/ package and wait until all necessary authorizations are in place to proceed with the lease rental package., or would you like to withdraw the whole lease/rental package for water right 02-10471 including all the rentals and lease if the authorization is not obtained.

Please let us know your preferred course of action at your earliest convenience. If you have any questions or need further clarification, feel free to reach out.

Thank you for your prompt attention to this matter.

Catalina Beck

4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights?

Yes ☒ No ☐

If yes, specify below the elements of the water rights you are requesting to rent. If no, continue to Question 4B.

Important Information: Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via [IDWR's website](#).

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request.** For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

Water Right Elements Leased to Water Supply Bank					Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent	Water Supply Bank Rental Request		
Water Right Number (leave blank if sub-total of combined limits)	Nature of Use	Diversion Rate (CFS)	Volume (AF)	Acres (AC)		Diversion Rate (CFS)	Volume (AF)	Acres (AC)

Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank					TOTAL	0.9	180	45
						CFS	AF	AC

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

C. Does your rental request propose to change the nature of use for any water right(s) being rented?

Yes ☐ No ☒

If yes, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

5. ADDITIONAL INFORMATION

- A. Is this the first time that rental water is being requested for this purpose at the rental place of use? Yes ☐ No ☒
