16. Prior to December 31 of each year, the Board may review this rental agreement to determine whether it is consistent with the management plan that may be approved for the Eastern Snake Plain Aquifer Ground Water Management Area ("ESPA GWMA Plan") pursuant to Idaho Code § 42-233b. ### 4. RENTAL REQUESTS FOR SPECIFIC WATER RIGHTS

A. Are you requesting to rent specific water rights? Yes ☑ No ☐

**If yes**, specify below the elements of the water rights you are requesting to rent. **If no,** continue to Question 4B.

**Important Information:** Diversion rates and volumes sought for rent must be proportionate to the per acre diversion rates and per acre volume limits of the water right under lease contract to the Water Supply Bank. Prior to completing this section, applicants should review all water right lease contracts and any active rental agreements to determine which elements of a water right are available to satisfy a rental request. Lease and rental documents are searchable via IDWR's website.

Water rights identified below must either already be leased to the Bank or a lease proposal should accompany this rental request. **Rental requests for water rights not yet leased to the Bank will be returned if companion lease applications are not provided with the rental request**. For leased rights featuring combined limits, rentals must be consistent with combined diversion rate, volume or acre limits. Combined limits should be listed on a row below water right numbers.

| Water Right Elements Leased to Water Supply Bank | | | | | Leased totals, minus water right elements involved in active rental agreements, equals water right elements available for rent | Water Supply Bank Rental Request | | |
|---|---|---|---|---|---|---|---|---|
| Water Right Number (leave blank if sub-total of combined limits) | Nature of Use | Diversion Rate (CFS) | Volume (AF) | Acres (AC) | | Diversion Rate (CFS) | Volume (AF) | Acres (AC) |
| 29-2924 | Irrigation | 1.43 | 306 | 83.0 | | 1.43 | 306 | |

| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| | | | | | | | | |
| *Applicants must ensure the requested rate per acre and volume per acre do not exceed the rate per acre and volume per acre limits of water rights leased to the Water Supply Bank* | | | | | TOTAL | 0.88 | 190.0 | |
| | | | | | | CFS | AF | AC |

**Attach multiple copies of this page if space above is insufficient to list all water rights requested to be rented on this application.*

B. If water right conditions, combined limits, or the sum of all water right elements being requested provide an unconventional duty of water (e.g., an unusually low rate per acre or volume per acre for irrigation use), explain how your proposed rental will sufficiently accomplish your intended purposes. Attach a separate page if space is insufficient and label it **Attachment 4B**:

N/A

C. Does your rental request propose to change the nature of use for any water right(s) being rented? Yes ☐ No ☑

**If yes**, explain how the water right(s) will be converted to new uses. Include the historic, consumptive use amounts for the water right being rented if you have it, as well as the new consumptive use amount for your proposed beneficial use. If space below is insufficient, attach a separate page and label it **Attachment 4C**:

A specific water right has not been identified to be rented. If an irrigation water right is identified by Water Bank staff, then a consumptive use analysis will have to be performed.

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK**
**WATER RIGHT NO(S). 29-14263 AGREEMENT 941**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of $9,471.00 **per year** was calculated based on the current rental rate of $33.00 per acre-foot times a diversion volume of 287.0 acre-feet. The annual rental fee for 2026 is due by December 31, 2025. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

**Please send a check in the amount of $9,471.00** for **2025** made payable to the Idaho Department of Water Resources, **together with the signed rental agreement**, **within 14 days** so I can complete processing.

Pursuant to the Water Supply Bank Rules, 90% or $8,793.90 of the rental fee will be paid to the lessor(s) and 10% or $947.10 will be retained by the Department to offset administrative costs for **2025.**

If you have any questions, please contact this office at bank@idwr.idaho.gov or (208) 287-4800.

Sincerely,

*Debra Mansfield*

**MEMORANDUM FOR APPLICATION # 3112 / AGREEMENT # 941**

**To:** Water Right(s) 29-14263

**From:** Mary Condon

**Date:** March 25, 2025 - April 16, 2025

**Re:** Review & Analysis of Application to Rent Water from the State Water Supply Bank

---

**PURPOSE/NARRATIVE:** A repeat rental application of ground water for industrial purposes within the Eastern Snake Plain Aquifer Ground Water Management Area (ESPA GWMA) with a requested start in 2025 for five consecutive years, was received by the Department on November 14, 2024. The rental application requested to rent the same water right that was previously rented, however, the water right had not been offered back to the Bank. Additionally, all the other suitable ground water rights in the ESPA were already allocated to either existing rental agreements or under application for new rentals. As such, the rental application was put on hold until a ground water right in the ESPA could be identified so that the consultant could provide successful ESPAM analysis.

Water right 29-14263 was offered to the Bank beginning in 2025 for five years on March 10, 2025, and notice was given to the rental applicants' consultant. The consultant provided acceptable modeling on March 13, 2025 for a five-year rental of this right.

**AUTHORITY TO FILE:** Application to rent by Great Western Malting Company was prepared by Greg Sullivan of Brockway Engineering PLLC. The rental application was signed by Mr. John Drake on behalf of Great Western Malting Co; however, his authority to sign was not included with the rental application, nor was it easily discernable from an internet search of the company. An email to the representative requesting Mr. Drake's authority to sign was requested on March 25, 2025. An updated rental application signed by Jean-Christophe Figueroa's was provided to the Department on April 8, 2025 and a webpage link was provided on April 15th showing Mr. Figueroa reported as the Director for the America's division of Soufflet Malt, a parent company for Great Western Malting Co. A review of 2024 Bannock County tax lot data for the place of use and points of diversion lists Great Western Malting Co as the owner.

**WATER RIGHT VALIDITY:** Water right 29-14263 is a split of right 29-2395 and is under recommendation to approve for another lease into the Bank for years 2025-2029. The water right was rented during the previous lease term for years 2022-2024. Water right meets Idaho Code § 42-1764. No concerns with validity.

**INJURY TO OTHER WATER RIGHTS:** The rental diversion of ground water is within the ESPA GWMA, and as such, ETRAN 3.4 modeling and mitigation analysis is required to calculate impacts. Modeling based on the calculated consumptive use of leased right 29-14263 with a change in nature of use to Industrial from Irrigation was provided on March 10, 2025. The proposed modeling did not pass without providing mitigation and an email was sent to the consultant on March 26th asking how they would like to proceed. The consultant provided a reply and updated modeling via email on March 27th requesting to increase the rental to 71.8 acre-feet per trimester but allow only 63.3 acre-feet per trimester, with a mitigation offset of 8.5 acre-feet per trimester. Review staff verified the updated calculations and modeling in ETRAN

v3.4 with the 8.5 ac-ft per trimester rented for mitigation offset that impact at the Near Blackfoot to Neeley is now less than 10%. No injury to other water rights is expected.

**ENLARGEMENT OF USE:** Industrial use at the factory is primarily provided under water right 29-7504 at a rate of 600,000 gallons per day 365 days per year. Additional water needs were met using City of Pocatello municipal water until rentals from the Bank for 180 acre-feet annually were secured each year since 2018.

The requested leased water right 29-14263 was developed and licensed for irrigation, while the rental will be used for industrial, and as such, only the calculated consumptive use under the rented right will be made available for diversion under the rental. The area standard consumptive use for the lease and rental location is 3.0 af per acre and a rental of 71.8 acres and 287.2 afa based on the licensed annual volume equal to 4.0 af per acre, with a reduction to account for the required mitigation and the consumptive amount for the diversion of 189.9 acre-feet annually under the rental.

**LOCAL PUBLIC INTEREST**: This is a repeat rental and review staff have no information to suggest continuation of the rental for Industrial use is inconsistent with the local public interest.

**BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:** The rental is for a beneficial use and appears consistent with the conservation of water resources in Idaho.

**DEPARTMENT STAFF OR WATERMASTER COMMENTS:** The location for the rental PD is within the ESPA GWMA, IDWR Eastern Region, and is subject to Water District # 129. Location is not within a Ground Water District. An email to the regional manager and watermaster soliciting comments or concerns was sent on April 16, 2025.

John,

The water supply bank is working to process the rental but the agent processing the rental is asking that Great Western Malting provide evidence that you, John Drake, can sign on behalf of Great Western Malting.

Can you email me a document that authorizes you to sign on behalf of the company?

Hello Greg,
Well that is great news! Yes, we are interested in renting this water. Looking at future projections for usage we would also need an additional 89AF. Any chance there is more available to rent?
Thank you,
John

John,

I was told by a Water Supply Bank agent today that different water right than we have previously rented in the Pocatello area has been received by IDWR to be leased into the Water Supply Bank. I ran the model analysis for this different water right and the analysis indicates that you would be able to rent 190.0 acre feet of water for the years 2025, 2026, 2027 and 2028. In the year 2029, the rental volume would be reduced to 159.0 acre feet.

Let me know if you would like the Water Supply Bank to rent this water to the Great Western facility.

Mary,

See the attached model analysis data entry and results. Will this work for the Water Supply Bank? Great Western Malting would rent 71.8 afa each trimester but only be allowed to pump 63.3 per trimester for the duration of the rental 2025-2029.

Hi Greg,

Please provide the updated signature page of the rental application with Jean-Christophe Figueroa and their signature.

Also, I have a question and two comments about the rental application:

1 – the requested rate is 0.88 cfs, but the updated requested right only provides 0.71 cfs if fully rented. Please let me know if Great Western is requiring rate or volume for the rental, and the minimum acceptable for both in reply.

2A – The modeling you provided zeroed out years 2022-2024 for a lease term, but the amounts should still be accounted for as if the right was fully rented elsewhere (it was) in the With Transfer column.

2B – The modeling had a reduced amount that would be diverted in year five of the rental in the modeling you provided, likely accounting for mitigation, but stepped mitigation is not something we provide for in rentals. We would reduce the volume each year as the same amount or reduce the term.

With the addition of accounting for the period the requested right 29-14263 was in a federal set-aside program from 1997 to 2010 (zeroed out in With Transfer column), the modeling still fails for a rental for years 2025-2029 of 63 af/trimester.

The modeling will pass without any mitigation required if limited to 63 af for 2025, only.

Thank you,
Mary

Mary,

It is my understanding that the Water Supply Bank received a lease application for water right 29-14263. My client, Great Wester Malting has previously submitted a rental application to the Water Supply Bank. I would like to rent a portion of 29-14263 to Great Western Malting for the years 2025-2029.

Attached to this email is the ESPA Transfer analysis for the proposed 190 acre foot rental. Great Western Malting is located in ESPA cell 97 120 and water right 29-14263 is located in ESPA Cell 97 124. Water right 29-14263 has been under lease contract since 2022, which is why the with transfer values in the model analysis are 0 for the years 2022-2024 indicating that no water was pumped from the authorized POD of 29-14263. The proposed volumes to be rented are 190 acre feet for the years 2025, 2026, 2027 and 2028. The rental volume in 2029 will be reduced to 159.0 acre feet.

Let me know if you have any questions about the model analysis or the submitted rental application.

Thank you,

Re: Great Western Malting Co.

Dear Ms. Condon:

Great Western Malting Co. desires to rent 190.0 acre feet of industrial water for the year 2025 through 2029. The proposed rental can be approved anytime during the 2025 year. Great Western Malting Co. has rented water from 29-2924 in the past but the lease contract for 29-2924 expires December 31, 2024.

The application has been prepared and submitted with the expectation that 29-2924 will be leased into the Water Supply Bank for the years 2025 through 2029. If 29-2924 is not leased into the Water Supply Bank, Great Western Malting would still like to pursue any available water to rent in 2025.

ESPA Model analysis of the proposed rental has been performed and no mitigation is required. Additional ESPA Modeling can be performed if a different water right is identified to be rented instead of 29-2924.

Please copy our office on all correspondence regarding this application.

Sincerely,

Greg Sullivan, M.S., Engineer
