DESCRIPTIVE SUMMARY

This is a Director's Report of Deferred *De Minimis* Domestic and/or Stock Water Use submitted by the Director of the Idaho Department of Water Resources (IDWR).

INTRODUCTION

A Motion for Determination of Deferred *De Minimis* Domestic and/or Stock Water Use (Motion), as well as a Notice of Claim to Water Right, was received by the Court on March 15, 2022, for water right claim nos. 86-12145 through 86-12151. The Director published notice of the Motion, and has now completed his examination of the water right claim. The examination was conducted by Jared Klay, Water Resource Agent, Adjudication Section, on behalf of the Director. The materials used in and results of the examination of the elements of water right claim nos. 86-12145 through 86-12151 are discussed below.

DISCUSSION

Priority Date

The claimed priority date for claim nos. 86-12145 through 86-12151 is December 31, 1917. Land patents available on-line through the Bureau of Land Management General Land Office Records have been used to support the priority date of each claim. Patent Nos. ID0420.125, ID0420.126, ID0440.038 and ID0630.240 were issued under the May 20, 1862 Homestead Act¹.

Patent Nos. ID0350.325 and ID0370.372 were issued under the April 24, 1820 Sale Act. The 1820 Sale Act allowed someone to obtain a patent through purchase of land. A patent obtained through the 1820 Sale Act doesn't, in itself, prove evidence that stock were grazing the

¹ Patent Nos ID0420.125, ID0420.126, ID0440.038 and ID0630.240 were established under the Homestead Act of 1862. To receive a patent, applicants were required to live on the property for 5 years for the purpose of settlement and cultivation. It's reasonable to assume that applicants would have stock that drank from available water sources. IDWR has regularly accepted land patents as evidence of in-stream or non-diverted stock water use.

property when the patent was issued, but the property established under the 1820 Sale Act patents is adjacent to property obtained through the Homestead Act of 1862 and it is reasonable to assume that stock associated with the 1862 patented property also grazed on adjacent properties.

See the table below for summary of claims and associated patents:

Claim No.	Patent No	Date Issued	Act
86-12145	ID0420.125	2/2/1889	May 20, 1862 Homestead Act

86-12151	ID0420.125	3/2/1889	May 20, 1862 Homestead Act

The evidence provided supports the claimed priority date for all claim nos. 86-12145 through 86-12151. The priority date for all claims is recommended as December 31, 1917.

Point of Diversion

The claimed points of diversion for claim nos. 86-12145 through 86-12151 are located on the claimant's property within Township 38 North, Range 03 West, and Sections 27, 28, 33 and 34. Specifically, these points of diversion lie on the following Latah County parcels: RP38N03W287805, RP38N03W288405, RP38N03W276504, RP38N03W330162 and RP38N03W342511. The claimed points of diversion are all recommended as claimed.

Source

The claimed sources and tributaries are summarized in the table below:

Claim	Source	Tributary

All sources and tributaries were verified using USGS Quadrangle maps in conjunction with aerial photography available to IDWR through our GIS system. The sources claimed for claim nos. 86-12145 through 86-12151 are recommended as claimed.

Place of Use

The claimed places of use for claim nos. 86-12145 through 86-12151 are located on the claimant's property within Township 38 North, Range 03 West, and Sections 27, 28, 33 and 34. Specifically, these places of use lie on the following Latah County parcels: RP38N03W287805, RP38N03W288405, RP38N03W276504, RP38N03W330162 and RP38N03W342511. The places of use are all recommended as claimed.

Purpose of Use and Period of Use

The claimed purpose of use for claim nos. 86-12145 through 86-12151 is in-stream stockwater for up to 35 head of cattle.

Historical photograph provided by the claimant supports historical water use for this purpose by showing a stock barn and several head of cattle. The purpose of use for claim nos. 86-12145 through 86-12151 is recommended as claimed.

The claimed year-round period of use for all claims is standard for in-stream stock. A year-round period of use for stockwater for claim nos. 86-12145 through 86-12151 is

² The source recommended for 86-12147 was recommended as "unnamed stream" tributary to "Potlach River".

recommended as claimed.

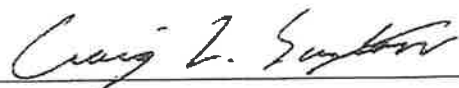

Quantity

The claimed quantity for claim nos. 86-12145, 86-12146, 86-12147, and 86-12149 are 0.02 cubic feet per second ("cfs"). The claimed quantity for claim nos. 86-12148, 86-12150, and 86-12151 are 0.03 cubic feet per second ("cfs"). The stockwater use for all 7 claims is described as in-stream stockwater use. In-stream stockwater rights are limited to 0.02 cubic feet per second ("cfs")³. Therefore, the total quantity recommended for claim nos. 86-12145 through 86-12151 is 0.02 cfs.

CONCLUSION

There is sufficient evidence to recommend water right claims 86-12145 through 86-12151, as claimed, for in-stream stockwater use. Pursuant to Judge Wildman's *Order Amending Procedures in the SRBA for Adjudication of Deferred De Minimis Stockwater Claims*, dated *October 17, 2017*, the Director submits this Director's Report of Deferred *De Minimis* Domestic and/or Stock Water Use, claim nos. 86-12145 through 86-12151, which includes the recommendation of deferred *de minimis* water right nos. 86-12145 through 86-12151.

Respectfully submitted this 25th day of September, 2023.

Manager, Adjudication Section
