

MEMORANDUM

June 12, 2025

Water Right: 95-11653

Author: LBates

Subject: POD centroid location updated

REF: memorandum to file, same date as comment, describing change in License POD centroid location within same legally described QQ/Q.

During the beneficial use field exam for water Permit 95-16879, I validated that a single 6-inch Cased GW well, Tag D0046056 is located on parcel 0L5780030040.

In addition to Permit 95-16879's irrigation water use, prior Decreed Right 95-11653 uses well D0046056 for domestic use two homes as claimed by the Applicant during the CSRBA.

I have GPS located well D0046056 during my field exam and during licensing review for Permit 95-16879 the well centroid in ArcMap update notification was sent to State Office Well Construction staff to update the centroid, which is currently plotted to the north in the SW1/4SW1/4 Gov Lot 4 of Section 24 (inaccurate spatial data point). The well centroid should be aligned to my licensing POD centroid.

I updated the License POD for Right 95-11653 on 6/12/2025, same day as the beneficial use exam and GPS locating of well D0046056.
