1. The water rights referenced above will be rented from the bank at the current rental rate.
2. There is no rental payment to the lessor of the water right if the right or a part thereof is not rented from the bank.
3. While a right is in the bank, the lessor may not use the right without approval of the Department even if the right is not rented from the bank. 8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. The unleased portion of right 37-7505A shall not exceed a total diversion rate of 1.79 cfs, a total annual maximum diversion volume of 657 af at the field headgate, and the irrigation of 219 acres.
13. The unleased portion of right 37-7505B shall not exceed a total diversion rate of 3.35 cfs, a total annual maximum diversion volume of 1080 af at the field headgate, and the irrigation of 360 acres.
14. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation of the place of use.
15. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).
16. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37B.

Enclosures: Proposed Lease Contracts

MEMORANDUM FOR APPLICATION # 2428

To: Water Right No(s). 37-7505A, 37-7505B
From: Skyler Cheever – Water Resource Agent
Date: 12/5/2022
Re: Review & Analysis of Application to Lease Water to the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 2428 was sent in by Michelle Wolf and received on August 29th, 2022, with fee payment received on August 31st, 2022. The application proposes to lease an 80-acre portion of water right 37-7505A and a 47-acre portion of right 37-7505B into the water supply bank from 2023-2027. This application is an amendment of current lease contract 1425, adding end gun acres of 37-7505A and portion of 37-7505B. The points of diversion are located within the Big Wood River GWMA, Snake River Moratorium, and Trust Water area. The portion of right 37-7505A has been leased continuously into the water supply bank continually since 2016.

AUTHORITY TO FILE:

Michelle Wolf Signed the application. Ms. Wolf has the authority to file this application because she is the current owner of both water rights and a co-owner of the property according to Department records and GIS Tax Parcel Data.

WATER RIGHT VALIDITY:

31.5 acres of Water right 37-7505A has been lease continuously into the water supply bank since 2016. There is no concern with continued lease of those acres of 37-7505A. The additional 48.5 acres from 37-7505A were irrigated in 2020 according to Landsat Imagery (Figure 1). Although imagery was patchy, the majority of the 80 acres were irrigated and it would be unlikely that the remaining acres are unirrigated (Figure 1). According to GIS Aerial Imagery the proposed portions of right 37-7505B were irrigated in 2021. Therefore, there are no validity concerns.

ENLARGEMENT OF USE:

Both rights were decreed in 2010. They do not share the same place of use or point of diversion and there are no combined limits. Therefore, 37-7505A and 37-7505B should be rentable separately without causing an enlargement of either water right.

Water right 37-7505A authorizes the use of 2.45 cfs and 897 af for the irrigation of 299 acres. 37-7505B authorizes the use of 3.79 cfs and 1221 af for the irrigation of 407 acres within a 1000-acre area. To prevent water spreading or the use of leased rate and volume, a condition will be added limiting each right to their unleased portions. 37-7505A will be limited to 1.79 cfs, 657 af and the irrigation of 219 acres. 37-7505B will be limited to 3.35 cfs, 1080 af and the irrigation of 360 acres.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The lease appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The point of diversion is within Basin 37 and Water District 37B. The Water Master and Southern Regional Manager were contacted for comment on December 5th, 2022. No response received; it is assumed there is no concern.

Figure 1. A map of the place of use, outlined in green, indicating irrigation occurred on June 6th, 2020.

Hello Mr. Skinner and Mr. Kramer,

I am currently reviewing a Water Supply Bank Lease within Basin 37 and Water District 37B. The applicant is the Michelle Wolf. The lease proposes to lease a portion of rights 37-7505A and 37-7505B into the water supply bank. These rights can be rented separately so there are two contracts, one for each right. These rights divert surface water from groundwater for irrigation. This property has been leased in the supply bank since 2017 and the current lease will be changed over to this lease in 2023. Attached to this email is the draft review memo, draft map of the place of use and draft contract. Please send any comments if applicable in 14 days. If you have any questions or need clarification, please let me know.

RE: APPLICATION(S) TO LEASE WATER RIGHT NO(S). 37-7505A & 37-7505B TO THE WATER SUPPLY BANK

Dear Applicant:

The Idaho Department of Water Resources (Department) acknowledges receipt of the application(s) to lease the above referenced water right(s) to the Idaho Water Resource Board's Water Supply Bank (Bank). The Department will review your application as resources allow. If the application(s) is not processed prior to the end of the proposed lease period, it will be returned to the applicant. The Department regrets any inconvenience caused by the delay.

If the right(s) is determined to be eligible for acceptance into the Bank, the right will be entered as of the date of receipt of the application. The acceptance date may be adjusted if additional information is required.

Please note the forfeiture period is not tolled unless a right is accepted into the Bank, or unless an exception or defense to forfeiture applies as described under Idaho Code § 42-223. If forfeiture is a concern, you may consider filing an Application for Extension of Time to Avoid Forfeiture of a Water Right form. This and other water right forms are available from the Department's web site at www.idwr.idaho.gov.

If you have any questions, please contact me at (208) 287-4822.

Sincerely,

A handwritten signature in black ink, appearing to read "Mackenzie Kienholz".
