11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. Pursuant to Section 42-1412(6), Idaho Code, this water right is subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.

MEMORANDUM FOR APPLICATION # 2693

To: Water Right 2-40
From: Catalina Beck Technical Records Specialist I
Date: December 19, 2023
Re: Review & Analysis of Application to Lease Water to the State Water Supply Bank

PURPOSE/NARRATIVE: Idaho Power applied for application 2693 received on July 05, 2023. The proposed lease is a portion of the water right (1.2 acres, 4.8 AFA, 0.024 cfs) for 5 years starting in 2023 ending in December 31 2027. The same portion of the water right has been leased to the Water Supply Bank (WSB) in 2015 through 2019 (lease application 1151 and 398), and renewed in 2020, However the contract has been canceled in 2022 upon request from the applicant.

Water right 2-40 shares a 20.3 acre permissible place of use (PPU) with water right 2-39 for the irrigation of Scout Park and North Park near Idaho Powers C.J. Strike Dam. The combined irrigation limit of the two rights is 12 acres. In attachment #3 the applicant states that a combined 10.8 acres are being irrigated.

The lessor application had a typo on the quarter quarter for point of diversion. The applicant was emailed to verify that the quarter quarter is correct. The email response was attached to the application.

AUTHORITY TO FILE: The application was signed by Kresta Davis, a representative who is associated with the company's waters rights and water rentals. Ryan Adelman Vice President of Power Supply authorized Kresta Davis to act on behalf of Idaho Power.

WATER RIGHT VALIDITY: The water right was decreed in 2010 and transferred to its current place of use in 2012. The water right was then leased in the Water Supply Bank (WSB) in 2015 which was within 5 years after the decree. No concerns with validity of the water right and portion offered to the bank.

INJURY TO OTHER WATER RIGHTS: There is no apparent injury through the portion of this lease water right to other water rights.

ENLARGEMENT OF USE: The combined irrigation water rights 2-39 and 2-40 do not overlap and shall not exceed the irrigation of 12 acres. No enlargement is evident through the lease.

LOCAL PUBLIC INTEREST: Review staff have no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The lease appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The lease point of diversion is subject to Water District No.02. The water master and Western Regional office were contacted for comments or concerns.

Description of Water Right and Lands That are Not Being Irrigated

In 2012 Idaho Power filed transfer number 77714 to create a common permissible place of use (PPU) and common points of diversion (PODs) for water right 2-39 and 2-40. These rights are used to irrigated Scout Park and North Park near Idaho Power's C. J. Strike Dam. The transfer was done because irrigated areas in both parks were recently changed and the establishment of a PPU allows for irrigation realignment if needed in the future. Water right 2-39 allows for the irrigation of 7.0 acres and water right 2-40 allows for the irrigation of 5.0 acres. The 12 acres of allowed irrigation can occur within a 20.3 acre PPU (Attachment 2).

Three maps are attached to this application. One map shows the permissible place of use and associated PODs for water rights 2-40 and 2-39. Maps for both Scout Park and North Park are also attached showing the acreage within the PPU that is not irrigated. The total PPU for water rights 2-40 and 2-39 is 20.3 acres. Currently, Idaho Power is irrigating 10.77 acres of the 20.3 PPU. In Scout Park, 3.45 acres remained unirrigated and in North Park 6.08 acres remain unirrigated. All areas not currently irrigated in the attached maps will remain unirrigated for the period of time water right 2-40 remains in the water bank. There is currently 1.2 acres of authorized irrigation under water right 2-40 that is not utilized within the PPU as designated by Transfer 77714. Idaho Power would like to place this 1.2 acres into the Idaho Water Resource Board water supply bank.
