8. Acceptance of a right into the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other Department application process.
9. In accordance with Idaho Code § 42-248 and § 42-1409(6), all owners of water rights are required to notify the Department of any changes in mailing address or change in ownership of all or part of a water right. Notice must be provided within 120 days of the change.
10. If a water right leased into the Water Supply Bank is sold or conveyed during the lease term, and if the leased right was rented, the rental proceeds will be disbursed in the following manner regardless of any arrangements between the buyer(s) and seller(s) to the contrary:
 - a. Rental payments will go to the lessor(s) of record at the beginning of the rental season, even if the Department processes a Notice of Change in Water Right Ownership during the rental season.
 - b. New lessor(s) of record will receive payment for any subsequent rental seasons.
11. The water right(s) is leased to the bank subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
12. The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversions.
13. The unleased portion of this right shall not exceed a total diversion rate of 0.39 cfs, a total annual maximum diversion volume of 11.1 af at the field headgate, and the irrigation of 3.7 acres.
14. The unleased portion of this right is limited to the irrigation of 3.7 acres of a specific 48.7 acres within the 343-acre place of use authorized by this right in a single irrigation season. The specific 3.7 acres to be irrigated during the term of this lease by the right holder are the 3.7 acres not identified by the lease shape associated with this right in the geographic information system component of the water rights database maintained by the department.
15. During the term of this lease, the irrigation diversion occurring from the pond that is described by rights 71-2078 and 71-10972 shall not exceed the amount of water diverted into the pond from Warm Creek under this right for irrigation purposes (0.21 cfs) and shall only occur when water is being diverted into the pond from Warm Creek under this right for irrigation purposes. When irrigation diversion is not actively occurring from the pond, diversions to the pond under this right shall be limited to 0.16 cfs and when combined with right 71-10972 the total diversion for non-irrigation purposes is limited to a combined total of 0.61 cfs.

Sascha

On January 7, 2019 the Southern Office received a Notice of change in Ownership for five Water Rights. The fee of \$125 (\$25 per water right) was receipted on receipt #S037099.

It turns out that three of the water rights are in the permit stage so they really need an Assignment of Permit, which fees are the same - \$25 per water right. I have received the Assignment of Permit, but I wasn't sure if the fees should be "credited" to the Assignment of Permit from Notice of Change in Ownership in your records, so I thought I'd send you this email.

If you need anything further from me please let me know. I've attached a copy of the original receipt for your records.
