Re: Review & Analysis of Application to Lease Water to the State Water Supply Bank

PURPOSE/NARRATIVE:

Application 2845 was sent in by D+C Properties LLC and received on December 4th, 2023, with the correct fee payment received on the same date. The applicant proposes to lease 39.5-acre portion of rights 22-7394 and 22-11900 into the water supply bank from 2024-2028. The lease place of use used for the previous contracts did not indicate where idled acres were located. However, a map was provided with the first lease application in 2014 giving a better idea of where idled acres were located but proposed more acres. Google Earth Imagery and the water right report were also used to determine currently proposed idle acres. The water rights include mitigation by non-use. The mitigation portion will not be leased into the bank. The point of diversion is within the Snake River Basin Moratorium Area, Water District 1 but not administered, and Non-Trust Water Area. This application is intended as a renewal of contract 1552 which expired on December 31st, 2023.

AUTHORITY TO FILE:

David Walters signed the application. Mr. Walters has the authority to file this agreement because he is the registered agent with the LLC according to the Idaho Secretary of States Office Database. D+C Properties LLC is the current owner of water rights 22-7394, and 22-11900 according to Department records.

WATER RIGHT VALIDITY:

Water rights 22-7394 and 22-11900 were decreed in 2008. Portions of both rights were leased into the water supply bank from 2014-December 31st, 2023. Any water right leased into or rented from the water supply bank are likely within a valid defense to forfeiture according to Idaho Code §42-223(5). Therefore, enough information is available to the bank to conclude water rights 22-7394 and 22-11900 are likely not lost to forfeiture and can be leased into the bank.

INJURY TO OTHER WATER RIGHTS:

Water right 22-7394 diverts from the South Side Ditch Pipeline which diverts from the Teton River in the State of Wyoming. Therefore, any rental in Idaho that proposes to move the point of diversion into Idaho would require the State of Wyoming to approve any change in POD. Therefore, this lease should only be rentable if the proposed POD diverts from the South Side Ditch Pipeline. Authorization for the ditch company is likely not necessary since any rental would be required to divert from the same ditch, negating conveyance losses.

ENLARGEMENT OF USE:

Water right 22-1794 and 22-11900 when combined are limited to 2.32 cfs and the irrigation of 116 acres. If the water rights were leased a rented separately it's likely more rate and irrigated acres would occur than was historically leading to enlargement. Therefore, rights 22-7394 and 22-11900 should be leased into the bank together. Since the applicant is proposing a portion of each right be idled a condition should be added limiting the unleased portion water rights 22-7394 and 22-11900 to 1.53 CFS and the irrigation of 76.5 acres. There are no other enlargement concerns.

LOCAL PUBLIC INTEREST:

Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The lease appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

The point of diversion is within basin 22 and Water District 1 but not administered. The Eastern Regional Manager was contacted for comment on February 15th, 2024. No response was received, it is assumed there are no concerns with the applicant's proposal.
