WATER DISTRICT 29H – MARSH CREEK
ANNUAL MEETING MINUTES
JANUARY 12, 2023 – 7 P.M.
MARSH VALLEY MIDDLE SCHOOL - LIBRARY

IDWR Update: Steve Visosky said that as of three (3) days ago, the snow water equivalent (SWE) was at 166% of the medium (30-year average) for this time of year. Steve said the IDWR is preparing for ground water meetings in Basin 29. They have started measuring ground water levels in the basin. If you have or know someone that will allow IDWR to measure, please let him know. It does not need to be a working well. He said that IDWR is Conjunctively managing ground water and surface water all around Basin 29.

Randy Morris asked if 1st in right, 1st in time is different for ground and surface water users? Steve said, no, if you are being injured regardless of the source, IDWR will do what they can. Randy Morris said the senior surface users in Basin 29 are being harmed by the junior ground water users. Randy suggested water district 29H write a letter stating that Basin 29 senior surface users are being harmed by junior ground water users and curtailment should be ceased until ground water and surface water are conjunctively managed.

Randy Wheatley explained the advisory committee role and gave an update on the meetings he and Dales Lish were a party to. Randy said that 80% of our users in district 29H are shut-off and the district needs and wants a voice in the negotiations. He stated that according to The Constitution of the State of Idaho, Article 15 "they" have a duty to represent us.

Chris Redman made a motion to allow the Advisory Committee to represent us and our water rights. To contact other Advisory Committees, any and all users of the Upper Snake River and tributaries and to have discussions with them about joining together to form a Collation or legal entity.
