Label it **Attachment #7b**.

If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

If any part of the irrigation water right is leased to the Water Supply Bank, you must also specify the location and number of acres that will remain idled for the duration of the lease contract at the new, proposed place of use.

B. CHANGES IN NATURE OF USE (Water Balance)

- ☐ If you propose to change the nature of use or period of use of all or part of the rights(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Part 1.A.3

Overview

The applicant owns two tracts of contiguous farmland in Administrative Basin 31, irrigated from groundwater under a series of water rights with varying priority dates. Currently, groups of one to four Points of Diversion (PODs) each serve a Place of Use (POU) comprised of one or more center-pivot irrigation systems. Some PODs also serve small fields irrigated with handline or wheelline sprinkler systems.

The applicant's desire is to interconnect the piping systems so that in the event of pump or well failure, or in the event of curtailment under prior appropriation water-right administration, physically- or administratively-available water can be applied to high-value crops, and irrigation can cease on lower-value crops.

Attached Part 1.A.3 Figure 1 provides an overview of the plan. The "Hamer South Central" group would be comprised of two wells and two center pivots, and is the subject of a single Transfer Application. It is not proposed to be interconnected with the other groups due to easement complications and will not share any common elements with the other transfers; it can be processed independently of the other transfers. The other 10 groups are more complex; all the groups would be authorized to deliver via interconnected piping system(s) to the same "Large Group POU" illustrated in Figure 1, but each group would allow diversion of the associated water rights only from a smaller group of linked PODs. In Figure 1, each of the POD groups is identified by a unique symbol and group name, and each is associated with an underlying Transfer Zone.

The design of the Transfer Zones and assignment of PODs to groups eliminates material effect to river and spring reaches that are hydraulically connected to the Eastern Snake Plain Aquifer by ensuring that all linked PODs in a given Transfer Application are located in adjacent Enhanced Snake Plain Aquifer Model Version 2.2 (ESPAM2.2) model grid cells. The result is that there will be no appreciable change in the effective mean location(s) of groundwater pumping resulting from the Transfers individually or collectively.

Part 1.A.3 Figure 2 removes the Transfer Zones and provides the Public Land Survey System information.

None of the transfers seek to change or add either PODs or POU that are not already part of the applicant's systems; they simply seek to add flexibility in management for the existing PODs and POUs. No new wells are proposed to be drilled. No new acres are proposed to be irrigated.

Table 1 through Table 11 summarize the PODs proposed to comprise each group. A blank space is provided for Idaho Department of Water Resources (IDWR) to insert a transfer application number if desired.

** Rocky Mountain Environmental Associates, Inc. (RMEA) edited the GIS for this POD. The update in the Geographic Coordinate Database (GCDB) data placed the IDWR-mapped POD in a different quarter-quarter than listed on the water rights. However, the 2021 USDA NAIP aerial imagery appeared to place the POD a few meters north, moving it back into the listed QQ. RMEA moved the GIS point to the NAIP-indicated location, which is in the listed quarter-quarter. There has not been nor is there a desire to change the physical POD.
