IDWR/Preston

July 18, 2025

We are correcting IDWR records through the Bear River Adjudication. While filing our claims we determined that in 2007 our parents had filed a statutory claim, 11-7575, on a decreed water right, 11-7639, that they owned at the time. At the time they thought that it were required to file the statutory claim. In the Adjudication we have claimed both 11-7639 and the statutory claim 11-7575, however we are withdrawing the claim on the statutory because they are one and the same. We are only claiming 11-7639, and the Statutory Claim 11-7575 should no longer be in existence.
