I think I found the difference in the first two. They are based on separate grazing allotments. I've highlighted it in attached files. It's up to you and Casa Del Norte if you want to submit claims for both of them.

Should I just do one and reference the other? Or do you want them separate for the records?

Hey Bill,

I was just writing you an email. The files appear the same to me. I'm still looking through them but I can't notice a difference. I'm going to take another look but if they are identical, would you still claim both of them? I'll look into the next couple in basin 37.

I found two more that appear to be in the same situation. 37-23477 and 37-14304.
When do you think you will have an answer?

To be more specific, once we have the backfiles we can see if there are differences or if they are duplicates. I'll keep you posted.

Sorry, but that was not the question I had. Here it is again.

"I am looking at maps of 61-11511 and 61-11514 and they look the same. I can't get a

record for 61-11514. Can you explain?"

You will need to pull them both up.

Hey Bill,

We just got word from our IT department that our online services are having issues. I haven't heard if they have discovered the source of the issue yet but I'm expecting things to be back online shortly. Seeing as it's nearing the end of the work day, I'd expect there to be a fix by tomorrow. I can let you know when I hear if you'd like. Let me know.
