Water Right 65-13566

License review and data entry by S. Keen on 12/20/2002. OVERLAPS. This right shares a point of diversion and distribution system with decreed right 65-2353A. The place of use is irrigated with water from Emmett Irrigation District as well as water diverted under this right. I did not recommend conditions making this right supplemental to EID water because both sources are surface water so it will not matter which source is used. POINT OF DIVERSION The examiner recommended two legal descriptions because he could not discern which one contained the point of diversion. The decreed point of diversion for 65-2353A is the SWNE of Sec. 4. Because the two rights share a point of diversion, I am recommending this right be licensed with the point of diversion described as the SWNE of Sec. 4. PLACE OF USE The examiner did not account for the homestead when recommending 10 acres. The digitized place of use, including the lawns around the house and outbuildings, is barely 8 acres.
