H. NARRATIVE/REMARKS/COMMENTS

This permit qualifies for an in-office exam because it is for irrigation of 5 acres or less. The exam was conducted May 5, 2025, by Jared Klay. At the time of the exam, ownership of the permit is in the name of Deborah Kishbaugh. Current Benewah County taxlot data represents the permit holder owns the land appurtenant to the place of use (POU) and point of diversion (POD). Proof of Beneficial use was submitted on July 17, 2023.

The place of use was described as 0.9 acres on both the application and the permit. However, after further review using Google Earth Imagery and GIS data, the place of use was actually measured to be 0.6 acres. Thus, I am recommending 0.6 acres for the place of use and 0.02 cfs for the diversion rate. I am not recommending volume, as this use is exempt from volume reporting requirements as per the Beneficial Use Rules.

All the conditions of this permit have been met. Permit holder confirmed via email correspondence that they are in compliance with Condition X15. Condition 26A can be dropped because proof of beneficial use has been submitted. Condition 004 will be dropped because there are no property concerns. Condition R66 will be updated to Condition X31 because the irrigation is under one acre. All other conditions on the permit will be carried over to the license.

Have conditions of permit approval been met? ☒ Yes ☐ No

Hello,

I am reviewing the statement of completion of beneficial use for Permit 91-8030 at 1336 COTTONWOOD DRIVE. I was hoping to clarify whether or not a fish screen was installed on the intake of this system in accordance with a condition on the permit, which I have referenced below. If you could let me know either way, that would be great
