DEPARTMENT OF
WATER RESOURCES**MINIMUM REQUIREMENTS CHECKLIST**
TO BE SUBMITTED WITH APPLICATION FOR TRANSFER

An application for transfer must be prepared in accordance with the minimum requirements listed below to be acceptable for processing by the Department. Incomplete applications will be returned. The instructions, fee schedule, Part 2A reports and additional Part 2B forms are available from any Department office or on the Department's website at idwr.idaho.gov.

Name of Applicant(s) Ireland Ranches**Check whether each item below is *attached* (Yes) or *not applicable* (N/A) for the proposed transfer.****Yes N/A** * Means the item is always required and must be included with the application.

- ☒ * Completed Application for Transfer of Water Right form, Part 1.
- ☒ * Signature of applicant(s) or applicant's authorized representative on Application for Transfer Part 1. Include evidence of authority labeled Attachment #3 (see below) if signed by representative.
- ☒ * Application for Transfer Part 2A. Attach a [Part 2A](#) report describing each water right in the transfer as currently recorded.
- ☐ ☒ Complete and attach an Application for Transfer [Part 2B](#) for each water right for which only a portion is proposed to be changed through this transfer application.
- ☒ * Application for Transfer Part 3A is always required (see Attachment #7a below); Parts 3B and 3C must be completed for transfer applications proposing to change the nature of use of the water right(s) or proposing changes to supplemental right(s).
- ☒ * Correct fee submitted with transfer application form. ([Fee schedule](#) is on website and instructions for application for transfer.)

Attachments to Application - Label each attachment with the corresponding number shown below as Attachment #1-10.

- ☐ ☒ #1 If the applicant is a business, partnership, organization, or association, and not currently registered in the State of Idaho as a business entity, attach documentation identifying officers authorized to sign or act on behalf of right holder. (See Part 1.)
- ☐ ☒ #2a Water Right ownership documentation if Dept. records do not show the applicant as the current water right owner. **
- ☐ ☒ #2b If the ownership of the water right will change as a result of the proposed transfer to a new place of use, attach documentation showing land and water right ownership at the new place of use. Include documentation for all affected land and owner(s). **
** Additional fee(s) required for water right ownership changes; see fee schedule.
- ☐ ☒ #3 Documentation of authority to make the change if the applicant is not the water right owner.
- ☐ ☒ #4 Power of Attorney or documentation providing authority to sign or act on the applicant's behalf. (See Part 1.)
- ☐ ☒ #5 If the transfer application proposes to change the point of diversion for a water right affecting the Eastern Snake Plain Aquifer (ESPA), attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. ESPA transfer spreadsheet and model grid labeled cells are available on the Department's website at <https://idwr.idaho.gov/water-rights/transfers/resources/>.
- ☐ ☒ #6 Notarized statement of agreement or a statement on official letterhead signed by an authorized representative from each lien holder or other entity with financial interest in the water right(s) or land affected by the proposed transfer. (See Part 1.5.c.)
- ☒ * #7a Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described on the application. Include legal description labels. If only a portion of the right is proposed to be changed, identify the current location of the part of the existing right(s) proposed to be changed. (See Part 3A.)
- ☒ ☐ #7b If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System ([GIS](#)) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. If some or all of any right is leased to the Water Supply Bank, you must also show the the specific location and/or acres to be idled at the new, proposed place of use to satisfy lease requirements.
- ☐ ☒ #8a If the transfer application proposes to change the nature of use or period of use for one or more rights, provide documentation describing the extent of historic beneficial use for the water rights proposed to be transferred and document how enlargement will be avoided. (See Part 3B.) Additional fee required for proposed changes to nature of use; see [fee schedule](#).
- ☐ ☒ #8b If the transfer application proposes to change the place of use of a supplemental irrigation right, provide documentation regarding the historic use of the supplemental right(s) and availability or reliability of the primary right(s) being supplemented, both before and after the proposed change. (See Part 3C.)
- ☐ ☒ #9 Water Supply Bank information for all rights proposed for transfer and currently leased to the Bank. ([Attachment WSB](#))
- ☐ ☒ #10 Other. Please describe: _____

A. PURPOSE OF TRANSFER

- ☐ Change point of diversion
☐ Change nature of use
 ☒ Add diversion point(s)
☐ Change period of use
 ☒ Change place of use
☐ Other _____
- Is this a transfer for changes pursuant to [Idaho Code §42-221.0.8](#)?
If yes, ☐ attach an explanation and any supporting documentation labeled as **Part 1A.2**.
- Describe your proposal in narrative form, including a detailed description of non-irrigation uses to justify amounts transferred (i.e. number of stock, etc.), and provide additional explanation of any other items on the application. Attach additional pages if necessary and label it **Part 1A.3**.
See Attachment

Part 1A.3

This application proposes to create a combined/permissible place of use for water rights 61-7171, 61-7034, 61-246, 61-247, 61-253, and 61-10429. The entire place of use will irrigate the entire 401 acres when surface water and ground water is available but provide the irrigation of a specific 283 acres when surface water is not available. The 283 acres of ground water rights will be rotated annually within the 401 acres to follow the crop rotation of higher valued crops. The application also proposes to add a point of diversion for water rights 61-7171 and 61-7034. These two rights currently have their own individual points of diversion. The application is in response to enforcement case numbers E2023-2893, E2023-2894, and E2023-2895.

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:

Two ground water wells and then one diversion on Canyon Creek with one wier. Each diversion has a department approved measuring device installed. Each diversion is lockable with controlling works.

- b. Who owns the property at the point(s) of diversion? Applicant
If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:

- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? If yes, ☐ attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6**. List the name of the entity and type of lien:

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

- d. Are any of the water rights proposed for transfer currently leased to the Water Supply Bank? If yes, ☐ complete [Attachment WSB](#).
- e. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:
No longer irrigated.

- f. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:
Uses shares from MHID.

- g. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes No

MEMORANDUM

TO: Transfer No. 88216
FROM: Blake Burkard
DATE: December 7, 2023
RE: Evaluation of Application 88216

The transfer proposes to create a combined/permissible place of use for water rights 61-246, 61-247, 61-253, 61-10429, 61-7034, and 61-7171. The application also proposes listing both ground water PODs on both ground water irrigation rights. The site is approximated 1.5 miles northeast of exit 90 of I-84, along both sides of Canyon Creek Rd.

Summary of Information Submitted

Authority to File:

Calvin Ireland filed the transfer application on behalf of Ireland Ranches, the owner of the water rights. After searching the Secretary of State website and Google for Ireland Ranches, it was evident that the company name has never been an established business. Ireland Ranch is a registered LLC, but Calvin is not a representative (Ireland Ranch is a business of a cousin of Calvin). A conversation with Calvin revealed that the family, especially his father, Roy, had used the name "Ireland Ranches" informally for various business practices.

The water rights were decreed as owned by Ireland Ranches, with care of (C/O) Roy Ireland, Calvin's father. The Ireland family has collectively owned the place of use for the water rights, and Calvin has for a long time been the owner/operator of the farming operations. However, there are no legal documents that point to the conclusion that Calvin can exclusively act as a representative for the water rights.

To establish authority to file, the Department has advertised the transfer and in addition, sent comment letters to the other family members listed on the deed for the places of use. Since no protests or responses were received, it is determined that Calvin has authority to file.

Water Right Validity:

Water right no(s). 61-246, 61-247, 61-253, 61-10429, 61-7034, and 61-7171 are presumed to be valid because they have been used in the last five years. The applicant may have been made aware of their need to file a transfer because the water rights have been used outside of their authorized places of use.

Injury to Other Water Rights:

As this transfer only proposes a permissible place of use and the sharing of ground water points of diversion between two water rights that have historically been used together, there are no injury concerns.

Enlargement of Use:

The quantities of the water rights will not be exceeded or enlarged by this transfer.

Local Public Interest:

Creating a permissible place of use for these rights are not a local public interest concern. As previously mentioned, the advertising of this transfer yielded no concerns from the public or other stakeholders. No response from a watermaster was recorded, either. For these reasons, this application proposes a change consistent with the local public interest.

Beneficial Use/Conservation of Water Resources:

A permissible place of use allows for crop rotation, which benefits soil health and leads to a better harvest. The other changes proposed should not affect the water source. The application proposes beneficial use consistent with conservation of water resources in Idaho.

The application is consistent with criteria of I. C. § 42-222 and should be processed.

Discussion

Water Right Overlap

The 6 rights associated with this transfer are also used in conjunction with water from Mountain Home Irrigation District. The sum of the surface water rights is 5.67 cfs, which is 0.01 cfs greater than the standard rate of 0.02 cfs per acre for 401 acres, which is the proposed acre limit for these rights. As surface water is not likely to be available for the whole season, I would guess that the ground water rights are used to supplement the surface water. There are no overlap concerns.

If approved the following changes should be made to the conditions of the water rights:

- Update condition C18 to T19
- Remove C15
- Add R05
- Add X27 and 206 to define PPU
- Add F06 to surface and ground water rights separately
- Add R43
- Add X35 to define the combined use limit
- Add standard transfer conditions T07 and T08

RE: Transfer 88216

Dear Calvin Ireland,

On July 12, 2023, the Department received a transfer request proposing a 401-acre permissible place of use for water rights 61-246, 61-247, 61-253, 61-10429, 61-7034, and 61-7171. The water rights were decreed in 2000 in the Snake River Basin Adjudication (SRBA) in the name of Ireland Ranches. After reviewing the transfer, it was determined that the Department would need documentation showing you have authority to file for a transfer on behalf of Ireland Ranches.

The Department requires documentation of who owned the land being irrigated under water rights 61-246, 61-247, 61-253, 61-10429, 61-7034, and 61-7171 from the date of the original licenses and/or claims up to today. Our records show that water right 61-7034 was licensed in 1974, so any deeds from that point on would be useful.

Water rights 61-246, 61-247, 61-253, 61-10429, 61-7034, and 61-7171 were decreed on October 25 and October 26, 2000. If Ireland Ranches did not own the property at the time of the decrees for water rights, the SRBA severed the water right from the land based on a Supreme Court ruling that the ownership determination in a water right decree supersedes all claims of ownership based on actions pre-dating the decree. In that case, the Department needs documentation showing how the water rights, separate from the land, were conveyed to you.

If you have any questions, please contact me at (208) 287-4870 or blake.burkard@idwr.idaho.gov.

Dear Watermaster:

The Idaho Department of Water Resources (IDWR) is seeking written comment and/or recommendations from you regarding the above referenced water right application. You can find a copy of the application attached. Please review the application, then complete the enclosed recommendation form and return it to this office within 14 days of the date of this letter.

If the application is approved, IDWR will include appropriate standard conditions of approval for a water right located within a water district, such as regulation by the watermaster, lockable controlling works, and/or measuring devices. Any special conditions or other concerns you have related to this application should be specifically addressed in your recommendation.

IDWR can finish reviewing an unprotested application as soon as the protest period has past. The protest end date was 10/23/2023. Your prompt response to this request will ensure that your recommendation can be considered. If IDWR has not received your written recommendation within 14 days from the date of this letter, IDWR will presume that you do not oppose approval of the application and that you have no comments for IDWR to consider.
