2. Measurement Comments:

No measurement is required for an in-office examination per IDAPA 37.03.02.035.01.r.

E. FLOW CALCULATIONS

____Additional Computation Sheets Attached

Measured Method:

Domestic: 0.04 CFS is a standard rate for domestic use for one home per Application Processing Memo #22. However, the permit holder was allocated 0.02 cfs on their permit. Therefore, 0.02 cfs will be recommended.

Stockwater: 0.02 CFS is standard for 0-10 stock per Application Processing Memo #3.

0.02 (stockwater) + 0.02 cfs (domestic) = 0.04 cfs.

Comments:

No measurement is required for an in-office examination per IDAPA 37.03.02.035.01.r.

F. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = \frac{\text{I.R.}}{\text{D.R.}}$$

$$V = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation season}) \times 1.9835 = \frac{\text{I.R.}}{\text{D.R.}}$$

$$V = \text{Smaller of } \frac{V}{\text{I.R.}} \text{ and } \frac{V}{\text{D.R.}} =$$

2. Volume Calculations for Other Uses:

Domestic: 1.2 AF is standard for domestic use for one home per Application Processing Memo #22.

Stockwater: 0.2 AF is standard for 0-10 stock per Application Processing Memo #3.

G. PURPOSE OF USE

H. NARRATIVE/REMARKS/COMMENTS

This permit qualifies for an in-office exam because it is for domestic use for one home and the total diversion rate is less than 0.24 cfs. The exam was conducted on March 12, 2025, by Jared Klay. At the time of the exam, ownership of the permit is in the name of Kirri Mann & Poppy Darby. Current Boise County taxlot data represents Falcon Ridge LLC owns the land appurtenant to the place of use (POU) and Point of Diversion (POD). Email correspondence with the permit holders on 3/12/2025 confirmed that Poppy Darby is the owner of Falcon Ridge LLC. Proof of Beneficial Use was submitted on April 18, 2024.

Boise County aerial imagery verified domestic use on the permit holder's property. I am recommending a diversion rate of 0.02 CFS and an annual volume of 1.2 AF for domestic use, per Application Processing Memo #22. During a phone call with Poppy Darby on 6/2/2025, the permit holder confirmed that the stockwater use has been developed and there is a stock tank just south of the spring. Therefore, I am recommending a diversion rate of 0.02 CFS and an annual volume of 0.2 AF for stockwater, per Application Processing Memo #3.

All the conditions of this permit have been met. Condition 26A can be dropped from the license because the statement of completion of beneficial use has been submitted. Condition 004 will be dropped because there are no property concerns. Condition X02 will be dropped per the usage description. Condition 01H will be updated to Condition 199 because the Watermaster advised that the lockable device should only be required for this use when specifically requested. All other conditions will be carried over to the license.

Have conditions of permit approval been met? ☒ Yes ☐ No

Good morning Jared,

I would recommend that the requirements for the lockable headworks, and measuring device be suspended until such time as they were needed to solve a delivery call.
