STATEMENT OF COMPLETION

FOR SUBMITTING PROOF OF BENEFICIAL USE

FOR OFFICE USE ONLY

Amt. of Fee \$ 50.00Receipt No. 1004490Received By NSDate Received 8/9/24

IDWR / NORTH

The Idaho Department of Water Resources (Department) considers this form a statement that the permit holder(s) applied water to beneficial use and completed development of a water right to the extent described below. **This form must be accompanied by an examination fee, when necessary, or by a completed Beneficial Use Field Report prepared by a certified water right examiner (CWRE).** Please refer to the instructions and fee schedule for this form. If ownership of the permit has changed, complete a Notice of Change in Water Right Ownership form. If you wish to relinquish your permit because you have not established the authorized water use and are not applying for an extension, please notify the Department in writing.

1. Permit No. 95-18139 Name of Permit Holder(s) DAVID S. WEINERTelephone No. 1-208-449-2406 Email WAND9601@GMAIL.COMMailing Address 212 W IRVINGWOOD DR. STE D PMB 246 City CDA State ID Zip 838142. Source of Water COEUR D'ALENE LAKE If Ground Water (well), Date Drilled mo. NA / yr. NADrilling Permit/Tag No. NA Drilling Company's Name NA

3. Extent of use(s) completed as authorized by the water right permit:

Domestic (No. households) 1 Irrigation (No. acres) 6.4 Stockwater (No. and stock type) NAOther NA4. Total diversion rate or volume (storage only) for which proof is submitted 0.04 cfs OR NA af
If the total developed water use is 5 acres of irrigation or less, is stockwater storage of 14.6 acre-feet or less, or has a diversion rate of less than 0.24 cfs, attach a map of the place of use and point of diversion and photographs showing beneficial use.

5. Describe the diversion and delivery system from the water source to the use (pump, lift, irrigation method, etc.)

SEE ATTACHED DESCRIPTION PROVIDED BY R.C. WORST CO.

6. Permit condition compliance. Refer to the permit approval conditions and check all the items required, then check "Yes" or "No" to indicate whether the required items were established, submitted, and/or installed:

Required? Yes No (If "Yes", attach required data, evidence of compliance, or evidence of installation)

THIS IS A BUDGETARY PRICE ESTIMATE ONLY. PRICING MAY VARY DEPENDING ON THE PROGRESSION OF THE JOB, AND DUE TO AN EVER INCREASING COST OF MATERIALS. PRICING MAY BE SUBJECT TO CHANGE AT THE TIME OF INVOICING.

We propose to install an A.Y.McDonald lake pumping system with an in-line heat tape for freeze protection and a Pura UV filtration system for your project at S Captains Rd Coeur d'Alene, Id 83814 for a budgetary price cost of \$18,920.00. The following major pieces of equipment along with accessories will be installed to provide a complete, functional system.

A.Y. McDonald Submersible Lake Pumping System

The pumping unit will consist of an A.Y. McDonald model AYM23150P3, 20 gallon per minute, 1.5 HP pump end coupled to a 1.5 HP, 230/1 VAC A.Y.McDonald 4" submersible motor. A.Y. McDonald 2300 series submersible pumps feature stainless steel motor bracket and discharge nozzle, 7/16" stainless steel hex shaft, polished stainless steel shell and removable check valve built into discharge nozzle. Factory warranty on the pump and motor will be 3 years. The pump and motor will be set into the lake by an experienced diver. The pump will be set on 150-feet of 1-1/4-inch poly pipe, weighted to prevent flotation. This estimate also includes a PVC intake structure, submersible pump cable, waterproof splice kit, emergency stop button at the lakes edge per Dept. of Building Safety and associated fittings.

Amtrol Pressure System

The pressure tank will be an Amtrol model WX-255, 81 gallon pressure tank. Amtrol tanks feature seamless heavy-duty butyl diaphragm, polypropylene liner, 100% non-metallic water reservoir, 100% corrosion resistant water reservoir, and enamel exterior finish. Factory warranty on the tank will be 7 years. The pressure system will also include a Square D pressure switch, pressure gage, Wilkens pressure relief valve, drain valve, 1-1/4 and 1 inch galvanized piping and associated fittings. Our portion of the job will end at the ball valve on the discharge side of the UV filtration system.

PURA UVBB3 Ultraviolet Disinfection System

The PURA UVBB3 Ultraviolet Disinfection System removes sediment, removes Cryptosporidium and Giardia cysts, and kills viruses and bacteria. Treatment is accomplished in three stages: 1.) The 4" X 20" pre-filter cartridge removes sedimentary particles 5 micron and larger. 2.) The 4" x 20" Carbon block filter is for taste and odor. 3.) The PURA ultraviolet disinfectant eliminates bacteria and viruses including E-Coli, Coliform, and Cholera (greater than 99.9% kill rate).

Note: This product is not recommended for use in systems containing more than 0.5 mg/L of iron.

WARNING:

NEVER LOOK DIRECTLY AT A LIGHTED UV LAMP.
ULTRAVIOLET RAYS CAN BE HARMFUL TO EYES.

Heat Line in Pipe Heating Cable

Freeze protection will be accomplished by means of an in pipe heating cable. The cable will extend inside the poly pipe from the crawl space 180 -feet. The cable will be thermostatically controlled using an outdoor temperature sensor.
